Based on over 45 years of research, BioGeometry Signatures are linear diagrams that help balance the subtle energy of body organs. The organ subtle energy patterns are accessed through BioGeometry Signatures placed externally in the body's energy fields to create a connection through Resonance of Shape. "This is a book that will change the way you think about your body and your health. It shows that we are not separate from the shapes, angles and proportions that surround us all the time, and that these shapes create energetic patterns that can introduce equilibrium and harmony into our own biological makeup. This is a modern science of energy balancing that provides the key to the hidden ancient knowledge of great civilizations. With BioGeometry, Dr. Ibrahim Karim has demonstrated how powerful simple shapes can be in altering the functioning of our physical, mental, and spiritual worlds. This has been frequently demonstrated in architectural and design projects, environmental balancing solutions including the mitigation of the effects of electro-pollution and geopathic stress, in health and wellness projects, and in the efforts of individuals in their personal spiritual development. In this book on BioGeometry Signatures, once again you see how powerful certain carefully created shapes can be in altering the physical functioning of organ systems, in supporting healing, and in changing physical and mental states. Work with them, let them touch you, and feel how they can assist you in your own search for harmony." Michael J. Maley, Ph.D. Instructor in BioGeometry

Reflecting on his past, President John Adams mused that it was religion that had shaped his family's fortunes and young America's future. For the nineteenth century's first family, the Adamsons of Massachusetts, the history of how they lived religion was dynamic and well-documented. Christianity supplied the language that Abigail used to interpret husband John's political setbacks. Scripture armed their son John Quincy to act as father, statesman, and antislavery advocate. Unitarianism gave Abigail's Victorian grandson, Charles Francis, the religious confidence to persevere in political battles on the Civil War homefront. By contrast, his son Henry found religion hollow and repellent compared to the purity of modern science. A renewal of faith led Abigail's great-grandson Brooks, a Gilded Age critic of capitalism, to prophesy two world wars. Globetrotters who chronicled their religious journeys extensively, the Adamsons ultimately developed a cosmopolitan Christianity that blended discovery and criticism, faith and doubt. Drawing from their rich archive, Sara Georgini, series editor for The Papers of John Adams, demonstrates how pivotal Christianity--as the different generations understood it--was in shaping the family's decisions, great and small. Spanning three centuries of faith from Puritan New England to the Jazz Age, *Household Gods* tells a new story of American religion, as the Adams family lived it.

The founders of a respected Silicon Valley advisory firm study legendary category-creating companies and reveal a groundbreaking discipline called category design. Winning today isn't about beating the competition at the old game. It's about inventing a whole new game—defining a new market category, developing it, and dominating it over time. You can't build a legendary company without building a legendary category. If you think that having the best product is all it takes to win, you're going to lose. In this farsighted, pioneering guide, the founders of Silicon Valley advisory firm Play Bigger rely on data analysis and interviews to understand the inner workings of “category kings”— companies such as Amazon, Salesforce, Uber, and IKEA—that give us new ways of living, thinking or doing business, often solving problems we didn't know we had. In *Play Bigger*, the authors assemble their findings to introduce the new discipline of category design. By applying category design, companies can create new demand where none existed, conditioning customers' brains so they change their expectations and buying habits. While this discipline defines the tech industry, it applies to every kind of industry and even to personal careers. Crossing the Chasm revolutionized how we think about new products in an existing market. The Innovator's Dilemma taught us about disrupting an aging market. Now, *Play Bigger* is transforming business once again, showing us how to create the market itself.

I wrote *Perfect SoloPreneur* to answer the question: how would I become a SoloPreneur if I had to start from scratch all over again? Today, everybody has the opportunity to create a personal brand and become a SoloPreneur or an entrepreneur using mostly free tools on the World Wide Web. But the path is littered with traps, sharks and missing information. If you're hustling to build your own side business - your own digital empire - then you already know about the endless temptations for cool tools and software and the endless monthly subscriptions that are required to run these tools. You know also about the countless motivational videos and tips out there telling us to just go for it, make it happen, etc. In this book, I talk about the things not to fall for and the mindset the SoloPreneur needs to cultivate. I talk about the things to be mindful of when you're building your personal brand and the ways others may try to attack it in future. I talk about the problem with all these motivational videos (they're great to watch and I recommend that you use them to get inspired, but we need to remember context because context is everything. The fact is that today, there is an incredible opportunity for anyone to become a SoloPreneur and build a successful business online in their spare time from their spare room, and every day more people join the laptop lifestyle (aka the Internet lifestyle) and become financially independent. But the idea of achieving online success is being romanticised into a work your b\*tt off and it will happen formula (well, those make great videos...) I tried and failed more times than I care to remember and ended up in ugly situations from following a lot of similar advice blindly. I finally got things to work after a lot of effort and backtracking and applying certain rules based on common sense. At the end of that 'little journey' it struck me that it should not have been this hard, and I should not have had to go through so much stress both financially and emotionally. I realised that the reason I made things a lot harder than they need to be is because I followed other people's models without applying any criteria of my own. This book is about the things I've learnt on this journey, and about how I would do this next time, to make it as easy and efficient as possible. Enjoy. Hoz About Hoz: Hoz has worked with clients in 21 countries. He has created 3 physical product brands of his own which he runs to this day as well as a digital marketing agency and a publishing business. Before that he was a touring musician. Recently, Hoz decided to start blogging and vlogging to share his journey with other SoloPreneurs. He's just getting started in the blogosphere but he brings all his experience and humour with him. He decided to put his hindsight to use and write *Perfect SoloPreneur* as the blueprint he would have followed if he had to do this whole thing again from scratch. *Perfect SoloPreneur* is a bird's eye view of what it takes to create digital empires. The premise of the book is a call to action to today's unprecedented opportunity to create a personal brand and generate revenue online working from home or anywhere else and designing the life you want. Q&As What's the difference between a solopreneur and an entrepreneur? Entrepreneurs have teams on whom they rely on to carry out their ideas. SoloPreneurs come up with ideas and then roll up their sleeves and do the work. Because of this limitation, SoloPreneurs have less scale than entrepreneurs - especially those on a budget. This book talks about the most important things SoloPreneurs can leverage to increase their output.

“A l’ombre des jeunes filles en fleurs” est le deuxième tome de “A la recherche du temps perdu” de Marcel Proust publiée en 1919. Dans cette première partie du roman, le narrateur parle de ses relations à Paris, entre autres celles eues avec M. de Norpois ou encore avec son idole littéraire Bergotte. Il va également pour la première fois au théâtre où il voit enfin l’actrice qu’il aime tant, la Berma, interprétant Phèdre de Racine. On y lit ses déceptions comprises par les autres vis-à-vis de sa première vision théâtrale.”
