 France and Germany have played a pivotal role in European politics and integration. Shaping Europe systematically investigates the interrelated reality of Franco-German bilateralism and multilateral European integration from the Elysée Treaty into the Twenty-first Century.

 Many product markets have gone global already. Others are following. The globalization of markets is well understood by business. It has also come to dominate the economic policy agenda of nation states and supranational organizations. They all compete for inward investment to create and preserve employment opportunities. Economic law is one of several parameters in the global competition of systems. This study takes note of that new and additional function of economic law. Part I sets out to examine the making of economic law by states, by business and by international and supranational organizations. Part II discusses some of the main rules of substantive economic law divided into chapters on market law, transactions law and property rights law, and Part III addresses key issues of enforcement by the executive branch, on the one hand, and by the judiciary and arbitral tribunals, on the other. Each of the 32 chapters contains an essay on a current cross-border related problem of economic law, often as reflected in recent case law. Nearly 300 cases are discussed, or at least referred to, in that way. They were selected from international case law and from cases decided by EC, US and German courts (and courts of ten more countries)

as well as by ICC, ICSID and other arbitral tribunals. The introductory notes to, and summaries of, the various parts and chapters integrate economic and political theory, and provide the common thread. The overall conclusion is to advocate a transnational approach, problem oriented and cutting right across all layers of sources of law (international, supranational, national and transnational law). It distinguishes neatly between public and private law aspects of economic law but decidedly treats them together. The book is of interest to academia and practitioners, both for references to current problems and for a vue d'ensemble. Advanced students might use the book to understand the logic of today's economic law. In addition to decades of research in international economic law, the author capitalizes on his exposure to a wide array of practical issues as well as on six years of English language teaching in Geneva. STUDIES IN TRANSNATIONAL ECONOMIC LAW 20

New Instruments for Environmental Policy in the EU provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union. The conclusions draw

attention to critical aspects of instrument design, as well as the difficulty of accommodating national policy diversity without contravening EU and international trade rules. Drawing on critical research and practical experience, this book presents a number of recommendations for improving the next generation of environmental policies and explores comparisons between the search for new environmental instruments in the EU and similar regulatory transitions worldwide.

This thorough manual for advanced students and their supervisors, and anyone researching or writing on the Gospel of Mark, is the opening volume in an important new series of Guides to Advanced Biblical Research. Together with an essay on the current state of research and a discussion of the future of Markan study, it provides a chrestomathy of samples of Markan research together with a review of recent dissertations and a full, annotated bibliography.

Numerous scholars have noted various elements of literary structure in the Gospel of Luke, many of them patterned, such as chiasm. Several of these scholars have rigorously explored the significance of such structure. A common conclusion is that if Luke is consistent with other ancient writers, then the observation of some elements of patterned structure, e.g., what has already been

discovered in the Gospel, suggests that there is probably considerably more. This book offers a comprehensive literary structure for the Gospel of Luke, thoroughly and critically evaluates it, and ultimately focuses on theology that may be derived from this structure. As groundwork, the Introduction provides rigorous tests for assessing the intentionality behind proposals of parallelism. The first chapter then employs the tests in an evaluation of Robert C. Tannehill's work on Luke-Acts, which is representative of studies on correspondences that are not strictly structural in nature. His contribution enables us to grasp how Luke encourages the reader to read passages in the light of other passages within the Gospel and, accordingly, provides an interpretive aid for our study. The second chapter applies the tests to the Lukan correspondences suggested by Charles H. Talbert, which are inherently structural. His analysis of Luke-Acts and other Greco-Roman literature provides a strong theoretical foundation for our own proposal. Chapter three surveys OT, Greco-Roman, and NT texts that bear a similar patterned structure to what we discover in Luke. The structure of Luke is presented and carefully evaluated in chapter four, and the theological implications of that structure are developed in chapter five, shedding much fresh light on Lukan theology.
