Auditing Cases Routledge

Revised edition of: Cases in healthcare finance / Louis C. Gapenski, George H. Pink. Fifth edition. [2014]

*Property Development* Wiley

Instructor Resources Case questions and solutions, complete instructor versions of the spreadsheet models, PowerPoint slides, and a transition guide to the new edition. Student Spreadsheets (click here for access) With this casebook, students have the opportunity to apply finance principles and concepts to settings that simulate actual work environments. In that way, the book allows instructors to create a bridge between academic learning and applied practice. Each of the 32 finance cases presents a scenario and relevant background on a healthcare organization and poses a financial management issue that students must analyze in order to recommend appropriate courses of action. The majority of cases are accompanied by spreadsheet models to help students perform the required analyses. The casebook also contains seven qualitative mini-cases created to highlight the ethical dilemmas that occasionally arise in the practice of healthcare finance. Important changes to this edition: All cases have been updated, and many have been revised extensively, including new exhibits, timely topics, and new calculations Two new cases have been added to the book: One focuses on bond refunding and the other covers revenue cycle management A new mini-case focuses on the potential ethical conflicts involved with physician-owned distributors (PODs) The PowerPoint slides have been changed to allow instructors to first present a short introduction to the case and then, after students have completed their analyses, review each case by discussing three key learning points

Infrastructure is a priority around the world for all stakeholders. Infrastructure projects can continue for several years, from planning and construction to the provision of services. As development in Asia and the Pacific accelerates, governments must invest more in infrastructure to ensure continued economic growth. This book draws on lessons and case studies from Japan and worldwide, covering broad and long-term infrastructure projects. It describes the principles of developing quality infrastructure and focuses on the various steps of a project--from design, planning, and construction to operation and management. It also discusses overseas development assistance, taking examples from Asian Development Bank and World Bank projects. This book is an important reference tool for policy makers in Asia who are planning and implementing large-scale public infrastructure.

**Managing Your Personal Finances** Cengage Learning

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants--restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"--succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits--utilitarian, expressive, and emotional--distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Case Studies in Finance links managerial decisions to capital markets and the expectations of investors. At the core of almost all of the cases is a valuation task that requires students to look to financial markets for guidance in resolving the case problem. The focus on value helps managers understand the impact of the firm on the world around it. These cases also invite students to apply modern information technology to the analysis of managerial decisions. The cases may be taught in many different combinations. The eight-part sequence indicated by the table of contents relates to course designs used at the authors' schools. Each part of the casebook suggests a concept module, with a particular orientation.

**Cases in Healthcare Finance, Seventh Edition** McGraw-Hill Education

This book comprises multiple finance and ethics case studies. The purpose of the book is twofold. First, the case studies teach readers how to evaluate and determine resolutions to ethical issues in

finance. Second, the reader will enjoy a journey with the author, a woman, over her years working in finance, through the use of case studies. These studies focus on ethical issues in finance which the author encountered over nearly a 30-year career in the industry. There are 10 case studies extracted from different sectors of finance. This broad range is a consequence of the author's experience from almost all sides of the business: the buy side, the sell side, equity research in Asia, equity sales, mutual funds, hedge funds, the finance academy, and consulting. Each case study has an engaging narrative describing the background, transactions, players, and ethical issues. The ethical issue is analyzed and resolved using the appropriate theories of moral philosophy. Descriptions and analyses are rigorous yet comprehensible, approachable, and entertaining. Apart from ethics determinations, the material in the book covers and explains a variety of specific, and even complex, financial transactions. In every transaction there is an explanation of the roles of various players involved. In this way, readers will learn about the work of people in different positions in finance from investment bankers and equity traders to portfolio managers and equity analysts. Through these case studies, readers also will get an understanding of major financial transactions and activities such as IPOs, secondary offerings, equity trading, and equity valuations. The book will appeal to practitioners, college and high school students, and lecturers who can use it to supplement courses in finance or business ethics.

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.
