When you purchase a new version of this casebook from the LIFT Program, you receive 1-year FREE digital access to the corresponding Examples & Explanations in your course area. Now available in an interactive study center, Examples & Explanations offer hypothetical questions complemented by detailed explanations that allow you to test your knowledge of the topics covered in class. Starting July 1, 2017, if your new casebook purchase does not come with an access code on the inside cover of the book, please contact Wolters Kluwer customer service. The email address and phone number for customer service are on the copyright page, found within the first few pages, of your casebook. Environmental Law & Policy: Nature, Law & Society is a coursebook designed to access the law of environmental protection through a "taxonomic" approach. It explores the range of legal structures and legal methodologies of the field--rather than simply designing it according to air, water, toxics, etc. as subject media (which often results in duplicative legal coverage). All the major subject areas of pollution and resource conservation are covered, but they are covered according to the legal approaches they represent. The book is "Saxist," because it originally arose and continues to carry on themes from the teaching, guidance, and writings of the late Joseph Sax, the eminent pioneer of the environment law field. Sax emphasized the interaction between common law and public law statutory structures, and introduced the public trust doctrine as a thread undergirding and running through the entire field of environmental law. Features: Coverage of the December 2015 Paris COP-21 climate agreement in its several different aspects, incorporating analysis by co-author Prof. David Wirth who played an active role in international preparations for the Paris accord. Expanded material on carbon pricing--carbon taxes--until recently widely thought to be a politically impossible alternative avenue for mitigation of global climate disruption. Fracking--case and discussion materials on fracking, the major new fossil energy extraction technology that is changing the energy profile and landscape of the U.S. Tracking major recent revisions in toxic substance regulation, with essential comparisons to the contemporary European model of market access chemical regulation. Regulation of Greenhouse Gases under the Clean Air Act and otherwise. The Flint, Michigan toxic lead water pollution disaster, with both civil and criminal repercussions. An updated guide through the complexities of tensions between private

property rights and environmental protections, and an innovative clarification of recent Supreme Court caselaw. An innovative chapter on official "planning"-- a basic and problematic element of environmental governance, whether at the local level or the national public lands level.

 Introducing Public Administration
 Now in its third edition, Encyclopedia of Public Administration and Public Policy remains the definitive source for article-length presentations spanning the fields of public administration and public policy. It includes entries for: Budgeting Bureaucracy Conflict resolution Countries and regions Court administration Gender issues Health care Human resource management Law Local government Methods Organization Performance Policy areas Policy-making process Procurement State government Theories This revamped five-volume edition is a reconceptualization of the first edition by Jack Rabin. It incorporates over 225 new entries and over 100 revisions, including a range of contributions and updates from the renowned academic and practitioner leaders of today as well as the next generation of top scholars. The entries address topics in clear and coherent language and include references to additional sources for further study.

Nature, Law, and Society IGI Global
 In March 2004, the U.S. Department of Homeland Security implemented the National Incident Management System (NIMS), the country's first-ever standardized approach to incident management and response. Response agencies nationwide will need to become NIMS compliant in 2005. National Incident Management System: Principles and Practice translates the goals of the original NIMS document from concepts into capabilities, and provides responders with a step-by-step process to understanding and implementing NIMS. Through the use of case studies, readers will gain valuable insight on how to incorporate NIMS effectively into their departments or jurisdictions. As responders are faced with the tasks of reforming training curricula and incorporating NIMS into Standard Operating Procedures, it is essential that they have a practical resource to guide them through the nation's homeland security strategies, as well as to assist them with NIMS implementation in their own locality. *USDA Forest Service General Technical Report PNW*. Information Gatekeepers Inc
 Legal and Ethical Issues for Health Professionals, Fifth Edition is a concise and practical guide to legal and ethical dilemmas facing healthcare professionals in the real-world today. Thoroughly

updated and featuring new case studies, this dynamic text will help students to better understand the issues they will face on the job and the implications in the legal arena. With contemporary topics, real-world examples, and accessible language, this comprehensive text offers students an applied perspective and the opportunity to develop critical thinking skills. Legal and Ethical Issues for Health Professionals provides an effective transition from the classroom to the reality of a clinical environment.

Environmental Law and Policy CRC Press

Provides research on e-government and its implications within the global context. Covers topics such as digital government, electronic justice, government-to-government, information policy, and cyber-infrastructure research and methodologies.

Fiber Optics Illustrated Dictionary Jones & Bartlett Learning
 Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Concepts, Methodologies, Tools, and Applications Information Gatekeepers Inc

Within a few short years, fiber optics has skyrocketed from an interesting laboratory experiment to a billion-dollar industry. But with such meteoric growth and recent, exciting advances, even references published less than five years ago are already out of date. The Fiber Optics Illustrated Dictionary fills a gap in the literature by providing instructors, hobbyists, and top-level engineers with an accessible, current reference. From the author of the best-selling Telecommunications Illustrated Dictionary, this comprehensive reference includes fundamental physics, basic technical information for fiber splicing, installation, maintenance, and repair, and follow-up information for communications and other professionals using fiber optic components. Well-balanced, well-researched, and extensively cross-referenced, it also includes hundreds of photographs, charts, and diagrams that clarify the more complex ideas and put simpler ideas into their applications context. Fiber optics is a vibrant field, not just in terms of its growth and increasing sophistication, but also in terms of the people, places, and details that make up this challenging and rewarding industry. In addition to furnishing an authoritative, up-

to-date resource for relevant industry definitions, this dictionary introduces many exciting recent applications as well as hinting at emerging future technologies.

Principles and Practice IGI Global

With the use of high-level soil management technology, Africa could feed several billion people, yet food production has generally stagnated since the 1960s. No matter how powerful the seed technology, the seedling emerging from it can flourish only in a healthy soil. Accordingly, crop yields in Africa, South Asia, and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management. Principles of Sustainable Soil Management in Agroecosystems describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use. With chapters contributed by world-class soil scientists, ecologists, and social scientists, this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population. These changes include conversion to no-till and conservation agriculture; adoption of strategies of integrated nutrient management, water harvesting, and use of drip sub-irrigation; complex cropping/farming systems such as cover cropping and agroforestry; and use of nano-enhanced fertilizers. The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality. The strategy is to replace what is removed, respond wisely to what is changed, and be pro-active to what may happen because of natural and anthropogenic perturbations. The chapters, which exemplify these ideas, cover a range of topics including organic farming, soil fertility, crop-symbiotic soil microbiota, human-driven soil degradation, soil degradation and restoration, carbon sink capacity of soils, soil renewal and sustainability, and the marginality principle.

Public Hearings of the National Advisory Commission on Food and Fiber; August 1967 Routledge

This book investigates new enabling technologies for Fi-Wi convergence. The editors discuss Fi-Wi technologies at the three major network levels involved in the path towards convergence: system level, network architecture level, and network management level. The main topics will be: a. At system level: Radio over Fiber (digitalized vs. analogic, standardization, E-band and beyond) and 5G wireless technologies; b. Network architecture level: NGPON, WDM-PON, BBU Hotelling, Cloud Radio Access Networks (C-RANs), HetNets. c. Network management level: SDN for convergence, Next-generation Point-of-Presence, Wi-Fi LTE Handover, Cooperative MultiPoint.

Wood Residue Springer Nature

Updated in its 8th edition, Introducing Public Administration provides readers with a solid, conceptual foundation in public administration, and contains the latest information on important trends in the discipline. Known for their lively and witty writing style, Shafritz, Russell, and Borick cover the most important issues in public administration using examples from various disciplines and modern culture. This approach captivates readers and encourages them to think critically about the nature of public administration today.

Black Enterprise Springer

A Digest of the National Conference [1959] CRC Press

BLACK ENTERPRISE is the ultimate source for wealth creation for African American professionals, entrepreneurs and corporate executives. Every month, BLACK ENTERPRISE delivers timely, useful information on careers, small business and personal finance.

Acreage, Use, Potential : Report to the Outdoor Recreation Resources Review Commission Routledge

This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other

disciplines with relevance for concepts and practice of water resources management. It provides comprehensive, but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections, or as entire chapters. They illustrate success stories, but also lessons to be remembered, to avoid repeating the same mistakes. Based on consolidated state-of-the-art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water, but also about concepts, methods and aspirations of different professional, disciplinary communities and stakeholders professionalizes the debate and enhances the decision making.

Encyclopedia of Public Administration and Public Policy - 5 Volume Set Jones & Bartlett Learning

This is a leading basic text on advanced FR composite materials, including plastic, metal and ceramic matrix materials. An interdisciplinary approach is used with the emphasis on analytical methods for better understanding of key concepts. Many case histories, and fully worked examples illustrate concepts. Also included are current techniques for non-destructive testing, in-service monitoring, and failure analysis. More than 200 schematics, microphotographs and photographs illustrate concepts, materials and design.
