Project Management is designed to appeal
to undergraduate and postgraduate
students studying project management on

a business degree. It provides a
comprehensive overview of project
management practice, while carefully
balancing the unique aspects of project
management curricula with the more
general business skills, including quality,
risk, teams, and leadership. The text
includes a wide range of cases to connect
the academic principles and the
complexity of real-life projects. The text is

also supported by web-based multiple
choice questions, as well as in-text
exercises and examples to illustrate the
concepts and ideas throughout the book.
Also available is a companion website with
extra features to accompany the text,
please take a look by clicking below -

Higher Education: Implications for Policy and Practice IGI Global

The proper understanding and managing of project risks and uncertainties is crucial to any organization. It is of paramount importance at all phases of project development and execution to avoid poor project results from meager economics, overspending, reputation and environmental damage, and even loss of life. The Handbook of Research on Leveraging Risk and Uncertainties for Effective Project Management is a comprehensive reference source for emerging perspectives of managing risks associated with the execution and development of projects. Highlighting innovative coverage written by top industry specialists, such as complexity theory, psychological bias and risk management fallacies, probabilistic risk analysis, and various aspects of project decision making, this book is ideally designed for project and risk managers, project engineers, cost estimators, schedulers, safety and environmental protection specialists, corporate planners, financial and insurance specialists, corporate decision makers, as well as

academics and lecturers working in the area of project management and students pursuing PMP, PMI-RMP, ISO 31000, etc. certification.

Empowering India Through Digital Literacy (Vol. 1) Rowman & Littlefield

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Innovative Approaches for Museums IGI Global

Collections Care and Stewardship: Innovative Approaches for Museums considers best practices and innovations related to documenting collections with regard to movement and safe handling of items for transport, display, photography, and treatment; collections storage; and information-sharing within and beyond the museum.

Department of Transportation: Coast Guard IGI Global

The java projects book enables you to

develop java applications using an easy and simple approach. The book is designed for the readers, who are familiar with java programming. The book provides numerous listings and figures for an affective understanding of java concepts. The book consists of a CD that includes source code for all the java applications. Table of contents: Chapter 1 Creating a calculator applications Chapter 2 Creating analog clock applications Chapter 3 Creating a 9-box puzzle game Chapter 4 Student information management system Chapter 5 Creating a text editor applications Chapter 6 Creating an online test applications Chapter 7 Creating a shopping cart applications Chapter 8 Share trading application Chapter 9 Online banking applications
Information Modeling for Internet Applications Springer Publishing Company

As with any industry, the education sector goes through frequent changes due to modern technological advancements. It is every educator's duty to keep up with these shifting requirements and alter their teaching style to best fit the needs of their classroom. Pre-Service and In-Service

Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. It also emphasizes the growing role of technology in teacher skill development and training as well as key pedagogical developments and methods. Highlighting a range of topics such as teacher preparation programs, teaching standards, and fieldwork and practicum experiences, this multi-volume book is designed for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field. [Resources in Education](#) IGI Global Information Modeling for Internet Applications considers the fundamentals of web site modeling. It gives theoretical background as well as practical modeling techniques, which assist in the planning and development of web sites, other collections of hyperdocument and web-based information systems in general. Besides the modeling of page structures, navigation paths, and presentation functions, this will help to perform a variety of additional tasks, such as

adaptation to user groups. *A Plan for Community College Computer Development Design and Implementation of a College Course Selection Management System* Contains an inventory of evaluation reports produced by and for selected Federal agencies, including GAO evaluation reports that relate to the programs of those agencies. *IPA Projects for Improved State and Local Management* Ministerio de Educación This volume gathers selected, peer-reviewed original contributions presented at the International Conference on Computational Vision and Bio-inspired Computing (ICCVBIC) conference which was held in Coimbatore, India, on November 29-30, 2018. The works included here offer a rich and diverse sampling of recent developments in the fields of Computational Vision, Fuzzy, Image Processing and Bio-inspired Computing. The topics covered include computer vision; cryptography and digital privacy; machine learning and artificial neural networks; genetic algorithms and computational intelligence; the Internet of Things; and biometric systems, to name

but a few. The applications discussed range from security, healthcare and epidemic control to urban computing, agriculture and robotics. In this book, researchers, graduate students and professionals will find innovative solutions to real-world problems in industry and society as a whole, together with inspirations for further research. STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!, 3rd Edition, will help you choose or confirm a career path and develop the skills needed to be successful in college and in your career. You'll get to see what the research says about which strategies work best so you can do what works to reach your goals. A unique

feature of this textbook is that it includes actual research studies, so you'll get the opportunity to learn how to read and use research, building your information literacy and critical-thinking skills. These skills will serve you well in your other courses and in your career. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Directory for the Congress

Bachelor Thesis from the year 2020 in the subject Computer Science - Software, grade: 87.2, , language: English, abstract: This final year project is the central part of the educational administration system for Nanjing University of Information Science and Technology (NUIST), which allows students to select courses and gives students access to course offerings via online as well as the ability to complete various administrative functions allowing for a better management of curriculum decisions in the context of academic objectives. The objective of these systems is to make this process more convenient and easier to achieve which has been met with varying levels of success. This Course Selection Portal will be operated by three

users, the administrator, students and lecturers. This system will be developed using PHP, MySQL, jQuery, HTML, JavaScript, CSS and Bootstrap. The front-end is designed using PHP with excerpts of code written using jQuery, HTML, JavaScript, CSS and Bootstrap. The back-end is designed and managed through MySQL using a software called WAMP Server. This system software is more secured, user-friendly and less time-consuming.

Recherche en matière d'économie des transports

Cost models underlie all the techniques used in construction cost and price forecasting, yet until relatively recently industry has been unfamiliar with their characteristics and properties. An understanding of the various types of cost model is vital to enable effective cost control and the development of future forecasting techniques. This volume brings together more than 20 seminal contributions to building cost modelling and introduces the major landmarks in progress and thinking in this field: * strategies and directions * explorations in cost modelling * cost-product/process

modelling * dealing with uncertainty The
strong techniques bias of this book will
appeal to construction professionals

involved in estimating, as well as
researchers and students of building
economics.
