The Gender-Sensitive University explores the prevailing forces that pose obstacles to driving a gender-sensitive university, which include the emergence of far-right movements that seek to subvert advances towards gender equality and managerialism that promotes creeping corporatism. This book demonstrates that awareness of gender equality and gender sensitivity are essential for pulling contemporary academia back from the brink. New forms of leadership are fundamental to reforming our institutions. The concept of a gender-sensitive university requires re-envisioning academia to meet these challenges, as does a different engagement of men and a shift towards fluidity in how gender is formulated and performed. Academia can only be truly gender sensitive if, learning from the past, it can avoid repeating the same mistakes and addressing existing and new biases. The book chapters analyse these challenges and advocate the possibilities to 'fix it forward' in all areas. Representing ten EU countries and multiple disciplines, contributors to this volume highlight the evidence of persistent gender inequalities in academia, while advocating a blueprint for addressing them. The book will be of interest to a global readership of students, academics, researchers, practitioners, academic and political leaders and policymakers who share an interest in what it takes to establish gender-sensitive universities. This book is available for free in PDF format as Open Access from the individual product page at www.routledge.com. ASVAB Secrets Study Guide Using Information TechnologyMarketing ResearchOnline Research ApplicationsSuitable for undergraduate courses in marketing research, this textbook centres on online marketing research methods. Examples and applications are included throughout the text to help students understand how the Internet and new technologies have revolutionized the marketing research industry.Encyclopedia of Television Film Directors From live productions of the 1950s like Requiem for a Heavyweight to big budget mini-series like Band of Brothers, long-form television programs have been helmed by some of the most creative and accomplished names in directing. Encyclopedia of Television Film Directors brings attention to the directors of these productions, citing every director of stand alone long-form television programs: made for TV movies, movie-length pilots, mini-series, and feature-length anthology programs, as well as drama, comedy, and musical specials of more than 60 minutes. Each of the nearly 2,000 entries provides a brief career sketch of the director, his or her notable works, awards, and a filmography. Many entries also provide brief discussions of key shows, movies, and other productions. Appendixes include Emmy Awards, DGA Awards, and other accolades, as well as a list of anthology programs. A much-needed reference that celebrates these often-neglected artists, Encyclopedia of Television Film Directors is an indispensable resource for anyone interested in the history of the medium.

A Guide to Popular Reading Interests Sams Publishing

Expanded and updated to provide information on the newest popular fiction, this guide to genre fiction covers westerns, thrillers, science fiction, fantasy, supernatural/horror fiction, and romance. It defines the various genres; analyses their characteristics, grouping authors according to type or subject content; and provides a selective, annotated bibliography of the history and criticism of each genre. New authors are profiled in this edition, and a number of new subgenres, including the ice-age epic and techno-thriller, are outlined.

The Sales Acceleration's Formula. A Winner Training to Manage Sales Conversations with Customers and Potential Customers Rose

Originally published in 1981. Risk is a problem which all business decision makers have to cope with. The problem is not insurmountable, however, as there now exist well-established techniques for minimising risk and for calculating which of various available options is the optimal one to pursue. This book outlines and discusses these techniques and the theories behind them. Unlike many economic theories which only rarely have any practical applications, the techniques put forward in this book can be used by real businessmen to solve real business problems. The book concentrates on decision-making in two main areas: the allocation of a firm's resources and the selection of new investments; and the techniques and theories discussed fall into three broad groups: linear programming, decision theory and capital market theory. Intended as an advanced undergraduate textbook for students taking business economics or managerial economics courses, this valuable book will interest specialists and students involved in management studies, microeconomics, strategic planning, operational research, accounting and MBA programmes.

Excerpt from Roosevelt and the Republic In taking this excursion, we shall try to hamper ourselves as little as possible with the baggage of preconceived opinion. Our own opinion, we shall give for what it is worth, indicating where possible its foundation. Those who prefer to take their opinions of men, their political philosophy, or even their politics, blind folded, would do well not to travel with us. If you want to boost your sales, you have to focus your attention on communication. What kind of communication? All types of communication are important: spoken, written, verbal, visive or gestural. A winning communication can make the difference between a sale or a missed sale. It's necessary to understand the psychology of selling: the buyer is listening to you but he is also reflecting by himself about the utility of the potential purchase. At this point, a successful seller will start an honest conversation to allow the buyer to freely express his concerns and direct winning negotiations or resolve the problem. These are the most important qualities that a salesman should have: Knowledge of the Product (you have to learn as much as possible of the item you're selling); Strategic Exploration Skills; Continue to Connect (ability to connect with strangers); Buyer and Seller Contract (A verbal agreement, at the beginning of the sale, to set the expectations of the parties); Effective Communication (tone, humor, clarity in communication are winning keys); Impressive Qualification (good qualifications are essential); Time Management (you can have several sales in a day); Prevention of Objections (search in advance for the typical objections that occur in most cases). This is just a glimpse... In this book, you will find all the answers you're looking for, to increase and expand your business.

Detergents and Textile Washing Routledge

"In *Romeo and Juliet*, Shakespeare creates a violent world, in which two young people fall in love. It is not simply that their families disapprove; the Montagues and the Capulets are engaged in a blood feud. In this death-filled setting, the movement from love at first sight to the lovers' final union in death seems almost inevitable. And yet, this play set in an extraordinary world has become the quintessential story of young love. In part because of its exquisite language, it is easy to respond as if it were about all young lovers."
