## PRECIOUS LANG

The Energy of the New Century Cambridge Scholars Publishing  
Parliaments risk becoming the main losers of internationalisation; a process that privileges executives and experts. Still, parliamentarians have developed a range of responses to catch up with international decision-making: they coordinate their actions with other parliamentarians; engage in international parliamentary forums; and some even opt to pursue political careers at the supranational level, such as in the European Parliament. This volume provides a thorough empirical examination of how an internationalising context drives parliamentarians to engage in inter-parliamentary coordination; how it affects their power positions vis-à-vis executive actors; among themselves; and in society in general. Furthermore, building upon these empirical insights, the book assesses whether parliamentary democracy can remain sustainable under these changing conditions. Indeed, if parliaments are, and remain, central to our understanding of modern democracy, it is of crucial importance to track their responses to internationalisation, the fragmentation of political sovereignty, and the proliferation of multilevel politics.

Breakthrough courses are aimed at adult education classes and also at the self-study learner. Each course offers authentic, lively, conversational language through a coherent and carefully structured approach. The books are in full colour with attractive photographs and artwork giving a real sense of the country and its culture. There are four hours of audio material to accompany this course available in cassette and audio CD format. The new edition has been brought up to date with the inclusion of the Euro, and there is also a comprehensive companion website offering both teacher and student a wealth of extra resources including on line multi-choice exercises.

A Historical and Political Comparison with the United States  
Böhlau Verlag Wien

French: These courses offer beginners a new level of interactive learning. Packages include full-color course book, four 60-minute cassettes, & a CD-ROM. The CD-ROM features audio & video dialogues, record & replay features, over 200 interactive practice sessions & drop-down grammar & vocabulary menus.

1 Penguin

Audio CDs to accompany the Breakthrough French 2 course. The tracking function allows easy access to individual dialogues and exercises. Use them while on the go as a self-study learner or in the language lab.

The End of Europe? Routledge

Global Economics: A Holistic Approach integrates real world examples and case studies with economic analysis to examine the emerging global economy. It covers topics not typically considered by international economics, such as migration, in addition to taking a fresh approach to traditional topics.

*The Washington Post Index* ECPR Press

This reference on the whole of Europe, from Gibraltar to Georgia, Andorra to Azerbaijan, provides both an analytical overview of the region and specific data for each of the 40 countries it comprises. Introductory chapters cover regional issues including: a regional review, with the year's trends, developments and key events; which EU countries have attracted the most and least Foreign Direct Investment; how national governments and the EU are addressing the issue of refugees and asylum; patterns of household debt and savings in Europe; and the impact of EU enlargement.; Comprehensive economic and business reports for each country include: political and economic surveys identifying the trends, developments, problems and solutions; country profiles, including information on economic sectors, political parties and systems, demographics and languages; key facts and analysis of vital statistics; a business guide offering practical information for visitors to the country, including local contact addresses; and key indicators setting out the country's key economic indicators between 1998 and 2003.

The Art and Practice of Breakthrough Thinking Springer Nature

As a result of extensive research Macmillan have produced Teacher's Notes and Teacher's Cassettes to work in conjunction

with the New Editions of Breakthrough. The notes provide support and additional resources to tutors who are using the course with a group of students. Features include: clearly set out ideas and suggestions for additional classroom activities and exercises, four pages per unit of photocopiable resources, full transcripts of the pre-recorded listening and speaking exercises. The cassettes have been produced for the classroom, taking the teacher's role into account and omitting superfluous presenter narratives. *Committed Pro-Europeans Strike Back* Univ of California Press  
The doctrine of moral rights is based on the idea that authors have a special bond with their own creative work. At present, the legal status of moral rights demands clarification and assessment as never before, particularly as the international expansion of moral rights occurs in the new environment of digital technology. Just as the survival of copyright law depends on its capacity to adapt effectively to the new technological environment, a new approach to moral rights is imperative. *Moral Rights: Principles, Practice and New Technology* is the first work to comprehensively address the role and challenges of moral rights in an environment of digital technology The problem is addressed from both practical and theoretical channels, and examples drawn from the legislation and practice of key jurisdictions around the world. The book concludes with a consideration of how the concept of moral rights can contribute to the re-organization of copyright law in a digital context.

*The Quick and Easy Way to Speak and Understand French* Ntc Pub Audio

A free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. While portrayals of immigrants and their descendants in France and throughout Europe often center on burning cars and radical Islam, *Citizen Outsider: Children of North African Immigrants in France* paints a different picture. Through fieldwork and interviews in Paris and its banlieues, Jean Beaman examines middle-class and upwardly mobile children of Maghrébin, or North African immigrants. By showing how these individuals are denied cultural citizenship because of their North African origin, she puts to rest the notion

of a French exceptionalism regarding cultural difference, race, and ethnicity and further centers race and ethnicity as crucial for understanding marginalization in French society.

**Breakthrough French** Routledge

A fascinating insight into how regional organizations in Europe and East Asia are currently grappling with a striking number of essentially similar challenges. This issue-based overview of political integration focuses on the differences and similarities in regional integration levels and processes in the two regions, to examine how the long-term future, role and impact of organizations such as the EU and ASEAN may depend heavily on how well they deal with complex and conflict-laden issues in the next few years. This volume analyzes the historical development, current state and prospective future evolution of political integration in the two regions. These leading authors identify key variables that account for the contrasting political integration levels, clearly demonstrating and explaining why the rhythm of integration in both regions varies. With contributions from both Asian and European scholars on each topic, this book delivers: comparative rather than a single region focus breakdowns of regional integration into key issue areas analysis of monetary cooperation and integration incisive assessments of institutional reform key topics of enlargement, including: identity, distributional equity, the distribution of power and effectiveness or decision-making efficiency discussion of regional and international security crises expert scholarship from both European and Asian perspectives This volume will be of great interest to students and scholars of IPE, international relations, political science, contemporary history and European studies and Asian studies.

**The Crisis of Representation in Europe** Springer Science & Business Media

This book looks at the role of the Association for Monetary Union in Europe's role in the construction of the Euro. It argues that the AMUE played a prominent role in the adoption of a number of proposals related to the single currency and had a guiding influence on the transition from a market-led to an institution-centred approach to monetary union.

*Britain and the European Union* Lulu.com

As the new century came, the world began to turn its back on the reckless developments of the past that resulted in global pollution

and the deep misery it entails, a climate getting out of kilter, the threat of a nuclear war, and all perils brought about by the unchecked use of fossil and atomic resources. We have now resolutely begun to move to a life that believes in harmony with nature, with the Sun. Not only the climate but everyone is a winner going with the Sun, the celestial body that distinguishes itself with its constancy and bounties. Thanks to innovation and mass production, the power derived from the Sun now beats the conventional energy sector with its own strength: socio-economy. Solar energy has become cheaper than the energy harvested from conventional resources. The result is a booming economy that is not just sustainable, but is also capable of producing millions of new jobs. In this book, Wolfgang Palz, an independent expert on energy matters and the economy, presents his views on a solar revolution to which he made significant contributions. It is not a compendium of ecological dreams and wishful thinking for a better world, but a thorough report, buttressed with facts and figures, on what happened. Beginning with fundamentals, the book discusses the key role of the Sun in nature and life. It details what happened when the search for a cleaner world began and elaborates the efforts of the people who brought about the change.

The European Union and Beyond Macmillan International Higher Education

This book analyses emerging trends in the politicisation of EU conflicts in Western Europe between 2006 and 2019, evaluating the transformative effects arising from multiple crises – the Euro crisis, the migration crisis and the Brexit Referendum. It describes how EU issues have been increasingly emphasised and polarised by various political parties – both the mainstream pro-EU and anti-EU protest parties – and have been transformed into more meaningful determinants of voting. The respective chapters investigate the fluctuations in EU issue entrepreneurship and EU issue voting, identifying which party types have been more likely to benefit from their EU issue proximity to voters, and assessing the growing politicisation of the EU conflict in both South European and North-Western countries. This book will be of particular interest to students and scholars of political parties, European politics, Euroscepticism and voting behaviour.

**Private Sector Involvement in the Euro** Rowman & Littlefield

This engaging and concise new edition offers the student and

general reader a compact, readable treatment of British membership of the European Union (EU) from 1973 up until the present day and Brexit, with detailed analysis of the period 1945-1972 accounting for Britain's absence from the formation of the EU. It provides a highly distilled and accessible analysis and overview of some of the parameters and recurring features of Britain's membership of the European Union, touching on all the major facets of membership at this critical time in Britain's relationship with Europe. Key features of the new edition: examines the constant and changing character of British membership of the EU; discusses the problematical and often paradoxical features of EU membership; familiarises the reader with both academic and public debates about the subject; offers thematic treatment of all aspects of policy and attitudes towards the EU; significantly restructured and updated to include the origins of the decision to hold a referendum on UK membership of the EU, the campaign, explanations for its outcome, and the course, substance and implications of the UK-EU Brexit negotiations. This book will be of key interest to scholars, students and the generally interested reader in the areas of European Politics/Studies, British Politics, EU Politics/Studies, Area Studies and International Relations.

Transnational Neofascism in France and Italy Routledge

Explores the health systems of 17 countries through comparative study. Using a consistent framework, the chapters offer an overview of each country's history, geography, government, and economy, as well as a detailed analysis of the country's healthcare system facilities, workforce, technology, cost, quality, and access. Current and emerging issues are also explored. The book concludes with a look at the changing U.S. healthcare system and the global challenges and opportunities for health. Ideal for courses in global health, international affairs, health administration, and public health, this innovative text challenges its readers to reflect deeply about how health care is organized and delivered.

Breakthrough French 1 Lulu.com

Foreign films once enjoyed a position of prominence on American theater screens. By the start of World War I, however, the United States' film industry was strong enough to challenge that foreign presence and foreign films in America have been insignificant ever since. For about a century, the Hollywood cartel has

dominated the production, distribution, and exhibition of movies domestically and around the world. This work traces the history of the foreign film in America from its domination in the early days to its low standing in the present, looking at the attempts made by foreign producers to increase their presence on American cinema screens, the responses by Hollywood to those attempts, and the oligopoly of Hollywood's few producers. The work discusses the cultural differences between foreign artistic expression and the commercialism of the American film and analyzes Hollywood's explanations for the lack of a foreign presence: Americans have "unique" tastes, they don't like subtitles, foreign films are immoral or badly made, trade union pressure, and so on. An appendix detailing the all-time gross earnings of foreign-language films and a full bibliography conclude the work, which is illustrated with stills and posters.

**The Wall Street Journal** Palgrave MacMillan

France Mineral & Mining Sector Investment and Business Guide - Strategic and Practical Information

**Global Economics** Taylor & Francis

The university in Europe – as a central institution of society – is presently met with many new expectations challenging established practices and self-understandings of academics across Europe. In the European Union, the higher education and research system has become a foremost tool of change. Current reforms across national higher education systems are seen as a potential for creating a European Higher Education Area, as well as an opportunity to introduce EU policies and ideas addressing how reforms can contribute to promote this as an EU dimension.

An argument that only reforms of the higher education institution – in particular the research university, as a European institution – can make Europe regain its competitive force and economic growth-potential has gained currency in the last decade with reference to the US. The university system of the US, particularly its highly regarded elite universities, is also held forth as a model for the developments in the EU, and thus for the reforms of the different countries of EU. In this book, however, it is demonstrated that much of the political rhetoric about the construction of the future knowledge economy of Europe and the promotion of a European Higher Education Area may contradict basic values that give Europe its identity as a cultural region. Promoting the US university as an ideal model does not do justice to the kind of problems the US is facing in their own reform efforts, nor does it reflect properly the social costs of copying such an elite system. The book raises a number of issues relating to elitism and democracy, internationalisation and regionalisation, and new forms of governance in higher education and research which current EU policies seem to neglect.

*French Politics and Society* Springer Nature

This volume represents a historical comparison of the American and the EU European constitutional experiences and lessons to be derived therefrom for the present time. It is designed to deepen the understanding of the historical and political dimensions of constitutional designs and practises on two continents. Hopefully, such historical depth charts will expand the horizon of debates among experts and decision-makers. The first part concentrates

on the historical dimension. It deals with the experiences and perceptions of basic American political principles, developments of international and humanitarian law, and the historical dimension of constitutional debates. The second part of the book aims at culling potential lessons from the American constitutional experience and the remarkable longevity of the U.S. constitution. Additional chapters concentrate on specific aspects and elements of the European constitutional debate (courts of law, human rights, minority protections, as well as gender equality). Still other contributions focus on the historical context of the recent European Constitutional Convention. Chapters on writing a European 'bill of rights', the EU reform debates of the 1990s, and finally an analysis of the Brussels Constitutional Summit of June 2004 are also included. The spillover effects of the economic and monetary union on the constitutional debates are covered here, as well as Asian perceptions of European integration. Practitioners and scholars address in this volume historical, political and diplomatic dimensions and achievements in the process of European constitution making and its chances of success in the future. Finally, the current tensions in the Atlantic world are analysed and what they may portend for the future of European Union security options.

*Convergence or Divergence?* CRC Press

The 1994 European Elections focused public attention on the perception that representatives put integration above public interest. The contributors here critically assess the diagnosis of the ailment and the solutions that have been canvassed to remedy its causes and consequences.
