*90 Recipes for Making
Your Own Ice Cream
and Frozen Treats from
Bi-Rite Creamery [A
Cookbook]* Harvard
Business Review Press
San Francisco's Bi-Rite
Creamery is as well
known for its small-
batch, handcrafted,
show-stoppingly
inventive ice cream as
it is for the long line
that snakes around the
block. Guests young
and old flock to the
destination ice cream
shop, craving a toasty
banana split, a jewel-
toned ice pop, a scoop
of cooling sorbet, a
mouthwatering ice

cream sandwich, or
one of the best ice
cream cakes around.
Lucky for ice cream
lovers, Bi-Rite
Creamery's secret is in
plain sight: their
irresistible goods are
all made using top
quality, farm-fresh,
seasonal
ingredients—locally
sourced, whenever
possible—and now you
can bring their
legendary creations
into your home. This
essential guide to
making your own
delicious ice cream and
treats covers all the
classic flavors and
delectable variations,
plus creative
combinations like
Orange-
Cardamom, Chai-Spiced

Milk Chocolate, Balsamic Strawberry, Malted Vanilla with Peanut Brittle and Milk Chocolate, and Honey Lavender. Driven by the Creamery's most popular flavors, each chapter in Sweet Cream and Sugar Cones serves as a meditation on a particular ingredient. Featuring recipes for Bi-Rite's famed cakes, frostings, pie crusts, and cookies, you can easily mix and match to create an infinite array of delicious custom frozen treats. Filled with step-by-step techniques and insider's secrets, this lavishly illustrated cookbook will turn your kitchen into a personal Bi-Rite Creamery (without the long line). demand edition of a hard to find publication. In FY 2009, the VA provided more than 59 million prosthetic items to more than 2 million vets. After VA physicians prescribe prosthetic items, VA's Prosthetic and Sensory Aids Service (PSAS) is responsible for providing prosthetic items to vets. PSAS is also responsible for managing VA's spending for prosthetic items -- more than \$1.6 billion in FY 2009. This report examined: (1) how, for FY 2005 through 2009, VA's spending for prosthetic items compared to budget estimates, and the extent to which VA reallocated funding for prosthetic items; (2) how PSAS monitors its performance in processing and

providing prosthetic items to vets; and (3) the efforts VA has undertaken to improve PSAS's performance. Charts and tables.

"In fiscal year 2009, the Department of Veterans Affairs (VA) provided more than 59 million prosthetic items to more than 2 million veterans. After VA physicians and other clinicians prescribe prosthetic items, VA's Prosthetic and Sensory Aids Service (PSAS) is responsible for processing prescriptions and providing prosthetic items to veterans. PSAS is also responsible for managing VA's spending for prosthetic items-more than \$1.6 billion in fiscal year

2009. In fiscal year 2008, this spending exceeded VA's budget estimates. Each year, VA makes an initial funding allocation for prosthetic items, and may reallocate by increasing or decreasing the funding available for prosthetic items during the fiscal year. GAO was asked to examine (1) how, for fiscal years 2005 through 2009, VA's spending for prosthetic items compared to budget estimates, and the extent to which VA reallocated funding for prosthetic items; (2) how PSAS monitors its performance in processing and providing prosthetic items to veterans; and (3) the efforts VA has undertaken to improve PSAS's performance. GAO reviewed VA's spending and funding

allocation data for fiscal years 2005 through 2009. GAO also reviewed documents and interviewed VA officials at headquarters, 5 of VA's 21 regional health care networks, called VISNs, and 13 VA medical centers (VAMC..."

The entrance of fast-paced technology into the workplace necessitates a proper re-look into performance management whether it is in education, marketing, finance, or information technology.

Maintaining happiness and wellbeing despite the pressure of performance at work is a serious challenge. Happiness is not only

important for work performance, but also for the physical and mental health of human beings. This book provides different concepts, theories, and methods to better understand the relationship between performance and happiness in the context of work in this information and technology era.

Various domains of performance management are covered in the context of management and information technology, including topics related to the performance of digital wallets from the customer's point of view; evaluating the sustainability of micro-finance institutions; challenges in employee retention; problems the workforce faces in IT

and management; dimensions of happiness for women in the workplace; the role of happiness in building a meaningful life; and the quality of work life. The findings are useful for practical applications in management and business scenarios. They also provide informative insights for researchers, academicians, industry professionals, and scholars.

[Your Federal Income Tax for Individuals](#) Rand Corporation
How can management cure health care's ills? This digital collection, curated by Harvard

Business Review, includes the ideas and best practices for transforming health care in these books and articles: [Leading Change, Redefining Health Care, "The Strategy That Will Fix Health Care," HBR's 10 Must Reads on Leadership, HBR's 10 Must Reads on Strategy, HBR's 10 Must Reads on Managing Yourself, HBR's 10 Must Reads on Managing People, and HBR on Fixing Health Care from Inside & Out.](#) [Hearings ... 86th Congress, 1st Session](#) Springer Publishing Company
Using a structured consensus process, RAND worked with health plans to identify the specific issues of concern to them regarding the usability

of CAHPS results for quality-improvement actions. Results of interviews with health plans confirmed their desire to have supplemental items available that they could use to collect more action-oriented data for quality improvement. In response to this issue, priority domains—coordination of care, access to care, information and materials, and customer service—and topic areas for item development were identified, and items for those areas were developed and field-tested.

Neonatal Nursing

CareFifth Edition

"Like a Maestro who orchestrates multiple virtuosos to perform an exquisite musical symphony, Dr. Kyle and her editorial team have united a remarkable group of national pediatric clinicians, educators, scientists, advocates and thought leaders to share their expertise in this textbook dedicated for nurse practitioner students...Using a wealth of evidence-based, multifaceted tools to cultivate competence and confidence, this textbook offers a

refined approach toward successful certification and professional credentialing in pediatric primary care. [It is] an academic tool to promote excellence among our future pediatric providers who will undoubtedly recall this resource as a foundation in their development." -Anne Derouin, DNP, APRN, CPNP, PMHS, FAANP Professor, Assistant Dean, MSN Program Duke University School of Nursing Durham, NC Distinguished by its reader-friendly, streamlined presentation of essential information, this comprehensive text delivers all of the core content covered in the Pediatric Nurse Practitioner Primary Care curriculum. With a focus on practical

application of knowledge and the development of sound diagnostic reasoning, this text emphasizes health supervision and promotion, and disease prevention and management from the standpoint of the nurse practitioner. Information mirrors the Pediatric Nurse Certification Board test blueprint--including an exam chapter map linking content areas to the exam outline--to ensure mastery of all components of evidence-based care. Organized in four units, each chapter within a unit is structured similarly to ease the learning process for the reader. Beginning with a section on the foundations of child health, the content progresses through growth and

development during the pediatric lifespan, child health promotion and wellness visits, into the final section on pediatric disease management presented in SOAP format. Current evidence-based guidelines, useful decision-making algorithms, procedures, and resources for families and nurse practitioners are referenced throughout the text. A comprehensive ancillary resource bundle includes an instructor's manual with WHAT-WHY-APPLY case studies, a test bank including certification exam style questions, PowerPoints, and a color image bank, as well as student resources containing an online prescribing

guide for the top 10 pediatric disorders, and patient education downloads. Key Features: Designed in user-friendly, accessible style with brief paragraphs and bulleted lists. Chapters include student learning outcomes, an introduction, a CPNP-PC exam content chapter map, Pro Tips and Alerts, and summarizing key points. Provides distinct sections on health promotion/prevention and disease diagnosis/management . Presents separate coverage of acute and chronic disorders and their necessary referrals. Offers user-friendly algorithms for differential diagnosis. Contains resource links to Bright Futures and Mass General Pediatric

symptom checklists, CDC immunization schedules, and other tools. Ancillary resource bundle includes an instructor's manual, test bank, PowerPoints, image bank, online prescribing guide, and patient education downloads.

VA Health Care

The larger part of the present volume is about Slavic historical linguistics while the second part is about more general issues and methodological aspects. The initial chapters contain a revision of the author's

Slavic Accentuation and a discussion of the Slovene evidence for the Late Proto-Slavic accentual system and of the Kiev Leaflets.

These are complemented by an extensive review of Garde's theory and an introductory article about the work of earlier authors for those who are unfamiliar with the subject. Then follows a discussion of changes in the vowel system, Bulgarian developments, final syllables in Slavic, early changes in the consonant system, and of Halle and Kiparsky's review of Garde's book. This results in a relative chronology of 70 stages from Proto-Indo-European to Slavic. The following chapters deal with the progressive

palatalization, the accentuation of West and South Slavic languages, various aspects of the Old Slovene manuscripts, the chronology of nominal paradigms, and other issues under discussion in recent publications. The second part of the present volume contains a number of case studies exemplifying specific theoretical problems, most of them of a semantic nature. The synchronic studies deal with Russian and Japanese syntax and semantics, the diachronic studies with tonogenesis in different languages and with semantic reconstruction in Altaic and Chinese.

1949-1984

Wat ooit begon als een Surinaams taalproject

in Paramaribo in 1980 en later in Nederland werd voortgezet met steun van de stichting Wetenschappelijk Onderzoek van de Tropen (WOTRO), kreeg na twintig jaar zijn beslag in dit woordenboek van het Surinaams-Javaans. Het legt voor de sprekers van deze variant van het Javaans voor het eerst hun taal vast; een taal die een geheel eigen ontwikkeling heeft doorgemaakt.

People sometimes remember events that

never happened. These illusory or false memories have important practical implications in various aspects of everyday life, and also have significant theoretical implications for cognitive and neuropsychological models of memory. Cognitive psychologists and neuropsychologists have long been aware of false recognition, confabulation, and related kinds of memory distortions, but during the past several years research on these topics has increased rapidly. In recognition of this emerging domain of interest, this special issue of *Cognitive Neuropsychology* is devoted to the cognitive neuropsychology of false memories. Edited

by Daniel L. Schacter, the special issue features experimental and theoretical contributions from leading cognitive psychologists, neuropsychologists, and neurologists that explore such issues as false recognition after frontal lobe damage, the nature of confabulation, amnesia and false memories, physiological correlates of memory illusions, memory distortions in normal and abnormal aging, and computational models of true and false memories. gical correlates of memory illusions, memory distortions in normal and abnormal aging, and computational models of true and false memories. *Landing Craft, Utility, 115 Feet LCU 1466A*
