what we choose to remember and what we choose to forget about the places we call home. Inspired by the story of New York's capital region, Susan Petrie uses poetry, prose, photos, and drawings to uncover a place of intense natural beauty, legendary people, and remarkable events. She follows the course of its fabled Hudson River from Troy to Olana and back again, turning

down dirt roads, wandering into forgotten terrains, and discovering layers of natural and human history that have become invisible. As a work of art, *Hundred-Mile Home* moves between past and present. It revives a sense of wonder for what we speed past on our way to somewhere else, and reanimates the forgotten history and often-overlooked natural beauty of the mid-

Hudson region. As a work of landscape and memory, it celebrates a place that—despite its instrumental role in the opening of America—has yet to take hold in the national imagination. Susan Petrie is a writer, editor, and artist with an MFA from Bennington College. She lives in Albany, New York. [Making Machu Picchu](#) Lerner Publications It was only supposed to

be a short visit. It turned into a love affair. Melanie White is in trouble. Young, unmarried, with no resources to speak of, she's forced to flee home and hide out with her aunt on a ranch in a western mining town. She's just passing through on her way farther West, and it's a good thing, too: she can't stand the ranch owner. He's rowdy, immature...and undeniably attractive.

David Tanner has his life just the way he likes it: he does what he wants, when he wants, and nobody can tell him any different--least of all, his former nanny's niece Melanie, who likes books more than people. But when a family emergency forces Melanie and David to work together, she discovers that there's more to him than meets the eye. And he finds out that life as a bachelor may not be what he likes after

all. Contains mild language and sensual content within marriage. Timber Press Pinocchio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out,

"Don't strike me too hard!" Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. Pinocchio, *The Tale of a Puppet* is a novel for children by Carlo Collodi is about the mischievous adventures of

Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinocchio. It includes 40 illustrations. Canada Sydney West enjoys sampling summer boys, but this year, one refuses to be a one-night stand... Twenty-one-year-old Sydney doesn't believe in relationships. Her parents' toxic divorce has taught her love is nothing but a sinister fairytale. So every summer she parties, hooks up, abandons her lover before dawn, and repeats. That is until she meets gorgeous local surfer Jason

King at the beach... When Jason fails to flirt-or even give her a second glance-she decides something must be wrong with him, and it's safer to stay away. But when Sydney and Jason's best friends hook up and become Malibu's hottest couple, they are forced to spend more time together than either of them cares for. Armed with a sharp tongue, Sydney works to keep Jason

at bay... In a moment of weakness, Sydney lets her guard down and confides in Jason, realizing he's more than just a hot guy-he's also a friend. And when Sydney's need for a summer boy results in her falling into bed with Jason, despite her better judgment, she runs away from him by morning. The problem is, he won't accept being another one-night stand, and will do anything to prove... Love really does

exist.

 Almost all the books on the planet on the subject of ascension are written about planetary ascension. However, because of the extraordinary times in which we now live, in terms of Earth's history, there is a new opening and potentiality to also begin one's cosmic ascension process. This has never before been available. It must be understood,

as Vywamus has said, that in completing our planetary ascension, we are no more than one-tenth of the way up a ten-inch ruler in terms of our cosmic ascension process. This includes most of the ascended masters. We on Earth who are working to complete our seven levels of initiation must remember that there are 352 levels of initiation to return to the godhead, or Father-Mother God, at the

top of creation. Most of the Ascended Masters of the entire Spiritual Hierarchy are not beyond the 12th initiation. This is not a criticism, just a statement of fact. The question is, "What lies beyond the next nine-tenths of the ruler, and how do we achieve our cosmic ascension as well as our planetary ascension (which is no small feature in and of itself)?" Is it for the purpose that

the author was guided to write his book. *The Little Man in the Map* Penguin On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle

taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to

challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? Owners of the Map provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio

Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a

<p>strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, Owners of the Map advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.</p>	<p><i>The Journey of Oliver K. Map My Home UNC Press Books Nidali, the rebellious daughter of an Egyptian-Greek mother and a Palestinian father, narrates the story of her childhood in Kuwait, her teenage years in Egypt (to where she and her family fled

the 1990 Iraqi invasion), and her family's last flight to Texas. Nidali mixes humor with a sharp, loving portrait of an eccentric middle-class family, and this perspective keeps her buoyant through the hardships she encounters: the humiliation of going through a checkpoint on a visit to her father's home in the West Bank; the fights with her father, who wants her to become a famous professor and

stay away from boys; the end of her childhood as Iraq invades Kuwait on her thirteenth birthday; and the scare she gives her family when she runs away from home. Funny, charming, and heartbreaking, *A Map of Home* is the kind of book *Tristram Shandy* or *Huck Finn* would have narrated had they been born Egyptian-Palestinian and female in the 1970s.

Twenty Writers on Immigration, Family, and the Meaning of Home Univ of California Press

From rediscovering an ancestral village in China to experiencing the realities of American life as a Nigerian, the search for belonging crosses borders and

generations. Selected from the archives of *Catapult* magazine, the essays in *A Map Is Only One Story* highlight the human side of immigration policies and polarized rhetoric, as twenty writers share provocative personal stories of existing between languages and cultures. Victoria Blanco relates how those with family in both El Paso and Ciudad Juárez experience life on the border.

Nina Li Coomes recalls the heroines of Japanese animator Hayao Miyazaki and what they taught her about her bicultural identity. Nur Nasreen Ibrahim details her grandfather's crossing of the India-Pakistan border sixty years after Partition. Krystal A. Sital writes of how undocumented status in the United States can impact love and relationships. Poro-chista Khakpour

describes the challenges in writing (and rewriting) Iranian America. Through the power of personal narratives, as told by both emerging and established writers, *A Map Is Only One Story* offers a new definition of home in the twenty-first century.

documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic

odds with the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallows describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams,

and the determination of many who are in the midst of making things better. Our Towns is the story of their journey—and an account of a country busy remaking itself.

 Matt is six years old when he discovers that he is different from other children and other people. To most, Matt isn't considered a boy at all, but a beast, dirty and disgusting.

But to El Patron, lord of a country called Opium, Matt is the guarantee of eternal life. El Patron loves Matt as he loves himself - for Matt is himself. They share the exact same DNA. As Matt struggles to understand his existence and what that existence truly means, he is threatened by a host of sinister and manipulating characters, from El Patron's power-hungry family to the brain-deadened

eejits and mindless slaves that toil Opium's poppy fields. Surrounded by a dangerous army of bodyguards, escape is the only chance Matt has to survive. But even escape is no guarantee of freedom... because Matt is marked by his difference in ways that he doesn't even suspect. [Creating True Love at Home and Peace on the Planet](#)

 When war devastates their country,

a boy and his parents are forced to flee to another country far east, where they must live in a small room shared with another couple. Food is scarce. But one day, when father goes to the bazaar to buy bread, he comes home with a map instead. The boy and his mother are furious, they are so hungry! But the map floods their cheerless room with colour. The boy becomes fascinated by it and is transported

far away without ever leaving the room. Father was right to buy it, after all.

How You Can Sustain Wildlife with Native Plants, Updated and Expanded

ESRI Press
 “A fascinating study of the trees, shrubs, and vines that feed the insects, birds, and other animals in the suburban garden.”
 —The New York Times As development and habitat destruction accelerate, there are

increasing pressures on wildlife populations. In *Bringing Nature Home*, Douglas W. Tallamy reveals the unbreakable link between native plant species and native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals. But there is an important and simple step we can all

take to help reverse this alarming trend: everyone with access to a patch of earth can make a significant contribution toward sustaining biodiversity by simply choosing native plants. By acting on Douglas Tallamy's practical and achievable recommendations, we can all make a difference. *A Map of Days* Other Press, LLC

In 1996, the Institute of Medicine (IOM) released its report *Telemedicine: A Guide to Assessing Telecommunications for Health Care*. In that report, the IOM Committee on Evaluating Clinical Applications of Telemedicine found telemedicine is similar in most respects to other technologies for which better evidence of effectiveness is also being

demanded. Telemedicine, however, has some special characteristics -shared with information technologies generally-that warrant particular notice from evaluators and decision makers. Since that time, attention to telehealth has continued to grow in both the public and private sectors. Peer-reviewed journals and professional societies are devoted to telehealth, the federal government provides grant

funding to promote the use of telehealth, and the private technology industry continues to develop new applications for telehealth. However, barriers remain to the use of telehealth modalities, including issues related to reimbursement, licensure, workforce, and costs. Also, some areas of telehealth have developed a stronger evidence base

than others. The Health Resources and Service Administration (HRSA) sponsored the IOM in holding a workshop in Washington, DC, on August 8-9 2012, to examine how the use of telehealth technology can fit into the U.S. health care system. HRSA asked the IOM to focus on the potential for telehealth to serve geographically isolated individuals and extend the reach of scarce resources

while also emphasizing the quality and value in the delivery of health care services. This workshop summary discusses the evolution of telehealth since 1996, including the increasing role of the private sector, policies that have promoted or delayed the use of telehealth, and consumer acceptance of telehealth. The Role of Telehealth in an Evolving Health Care Environment: Workshop

Summary discusses the current evidence base for telehealth, including available data and gaps in data; discuss how technological developments, including mobile telehealth, electronic intensive care units, remote monitoring, social networking, and wearable devices, in conjunction with the push for electronic health records, is changing the delivery of health care in rural and

urban environments. This report also summarizes actions that the U.S. Department of Health and Human Services (HHS) can undertake to further the use of telehealth to improve health care outcomes while controlling costs in the current health care environment.

Once a thriving metropolis on

the banks of the Mississippi, St. Louis, Missouri, is now a ghostly landscape of vacant houses, boarded-up storefronts, and abandoned factories. The Gateway City is, by any measure, one of the most depopulated, deindustrialized, and deeply segregated examples of American urban decay. "Not a typical city," as one observer noted in the late 1970s, "but, like a Eugene O'Neill

play, it shows a general condition in a stark and dramatic form."

Mapping Decline examines the causes and consequences of St. Louis's urban crisis. It traces the complicity of private real estate restrictions, local planning and zoning, and federal housing policies in the "white flight" of people and wealth from the central city. And it traces the inadequacy—and often sheer folly—of a

generation of urban renewal, in which even programs and resources aimed at eradicating blight in the city ended up encouraging flight to the suburbs. The urban crisis, as this study of St. Louis makes clear, is not just a consequence of economic and demographic change; it is also the most profound political failure of our recent history.

Mapping Decline is the first history of a modern

American city to combine extensive local archival research with the latest geographic information system (GIS) digital mapping techniques. More than 75 full-color maps—rendered from census data, archival sources, case law, and local planning and property records—illustrate, in often stark and dramatic ways, the still-unfolding political history of our neglected cities.
