Readiness (Gr. 4)

Russian Federation has

been recognized with

the strategy called as

“Putin Doctrine” at the beginning of the 21st century. Accordingly, the West is no longer a reliable partner of Russia. The sovereignty of the post-Soviet countries is under the protection of Russia. Russian World and Russian Orthodoxy have become strong. Today, the term “Russia’s Way” has become almost acceptable throughout the world. Therefore, Russia began to be recognized as a society and state that has not accepted or want to accept the philosophy of “the way of common reason”. In both domestic and foreign policy, there is no effective force that can oppose this ‘special’ situation to Russia. Russian poet and diplomat Fyodor Ivanovich Tyutchev

says in his famous quatrain: Russia can’t be understood with the mind alone, No ordinary yardstick can span her greatness: She stands alone, unique – In Russia, one can only believe. This aphorism is the most common phrase that describes Russia. According to Tyutchev, if we want to understand Russia, it is necessary to “believe it”. To understand the role of the “savior” that the Russians have assigned to them since history, it is necessary to know their history, foreign policy and security doctrines. When you read this book I’m sure you can find answers to some of these questions. In this book, the change and transformation of Russia in Putin Period and the general

reasons of these policies are explained. In addition to this book, I would also recommend you to read our book "Is Russia & Turkey Eurasian Pact Possible?" In addition to the general reader, this book has been prepared to provide guidance to experts, diplomats and students working in the field of "Security Studies", "Political Science and International Relations" and "History". I wish you a good reading.

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-

assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to

quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.
