A wise and entertaining guide to writing English the proper way by one of the greatest newspaper editors of our time. Harry Evans has edited everything from the urgent files of battlefield reporters to the complex thought processes of Henry Kissinger. He's even been knighted for his services to journalism. In *Do I Make Myself Clear?*, he brings his indispensable insight to us all in his definite guide to writing well. The right words are oxygen to our ideas, but the digital era, with all of its TTYL, LMK, and WTF, has been cutting off that oxygen flow. The compulsion to be precise has vanished from our culture, and in writing of every kind we see a trend towards more -- more speed and more information but far less clarity. Evans provides practical examples of how editing and rewriting can make for better communication, even in the digital age. *Do I Make Myself Clear?* is an essential text, and one that will provide every writer an editor at his shoulder.

This authoritative reference book assembles the experience of an international faculty of authors, each of whom has performed several thousand facelifts, i.e. procedures to rejuvenate and harmonize the human face. The authors share their experience, including tips and tricks, as well as ways to avoid complications and pitfalls. All procedures in this regard are covered and the text is accompanied by extensive artwork and photographs. A kaleidoscope of 363 important aspects, tips and tricks in facial

plastic surgery rounds up the presentation.

This second edition offers a fully revised and updated work on a rapidly growing field of knowledge, and was prepared by two experts whose goal was to explain the molecular basis of mosaic skin disorders in a language that is accessible for practicing physicians and medical students alike. It presents a timely and comprehensive overview of the strikingly manifold patterns and peculiarities of mosaic skin disorders in a straightforward, reader-friendly way that will help physicians to further improve genetic counseling and treatment outcomes. The first two parts of the book are devoted to the mechanisms and patterns of cutaneous mosaicism, and include an explanation of genomic and epigenetic mosaicism and a description of the archetypical segmental patterns including the lines of Blaschko and the flag-like, phylloid and lateralization pattern, the non-segmental pattern of large congenital melanocytic nevi, and the sash-like arrangement as noted in a particular type of cutis tricolor. The concept of lethal mutations surviving as mosaics has now been confirmed by molecular analysis in many sporadically occurring phenotypes. The difference between monoallelic and biallelic traits has deepened our understanding of hereditary mosaics, especially of multiple benign skin tumors. Moreover, recognition of the fundamental difference between the simple segmental and the superimposed types of mosaicism is important for the purpose of genetic counseling. In the third part, the various mosaic skin disorders are examined in depth, including nevi, didymotic disorders, other binary genodermatoses, mosaic manifestations of autosomal skin disorders, and nevoid skin disorders such as phenotypes reflecting functional X-chromosome mosaicism or a superimposed mosaic manifestation of common skin diseases with a polygenic background. Reader-friendly and clearly structured, *Mosaicism in Human Skin* will appeal to both experienced dermatologists and residents in training, as well as to medical geneticists and pediatricians.

Mein Kampf BRILL

With profound implications for our most foundational assumptions about gender, *Gender Mosaic* explains why there is no such thing

as a male or female brain. For generations, we've been taught that women and men differ in profound and important ways.

Women are more sensitive and emotional, whereas men are more aggressive and sexual, because this or that region in the brains of women is smaller or larger than in men, or because they have more or less of this or that hormone. This story seems to provide us with a neat biological explanation for much of what we encounter in day-to-day life. But is it true? According to neuroscientist Daphna Joel, it's not. And in *Gender Mosaic*, she sets forth a bold and compelling argument that debunks the notion of female and male brains. Drawing on the latest scientific evidence, including the groundbreaking results of her own studies, Dr. Joel explains that every human brain is a unique mixture -- or mosaic -- of "male" and "female" features, and that these mosaics don't map neatly into two categories. With urgent practical implications for the way we understand ourselves and the world around us, *Gender Mosaic* is a fascinating look at the science of gender, sex and the brain, and at how freeing ourselves from the gender binary can help us all reach our full human potential.

This book explores urban dynamics in Europe fifteen years after the fall of communism. The 'urban mosaic' of the title expresses the complexity and diversity of the processes and spatial outcomes in post-socialist cities. Emerging urban phenomena are

illustrated with case studies, focusing on historical themes, cultural issues and the socialist legacy. Among the cities analyzed are Kazan, St. Petersburg, Moscow, Warsaw, Prague, Komarno, Budapest, Belgrade, Bucharest, Sofia and Tirana.

This series presents studies that have used the paradigm of landscape ecology. Other approaches, both to landscape and landscape ecology are common, but in the last decade landscape ecology has become distinct from its predecessors and its contemporaries. Landscape ecology addresses the relationships among spatial patterns, temporal patterns and ecological processes. The effect of spatial configurations on ecological processes is fundamental. When human activity is an important variable affecting those relationships, landscape ecology includes it. Spatial and temporal scales are as large as needed for comprehension of system processes and the mosaic included may be very heterogeneous. Intellectual utility and applicability of results are valued equally. The International Association for Landscape Ecology sponsors this series of studies in order to introduce and disseminate some of the new knowledge that is being produced by this exciting new environmental science. Gray Merriam Ottawa, Canada Foreword This is a book about real nature, or as close to real as we know - a nature of heterogeneous landscapes, wild and humanized, fine-grained and coarse-grained, wet and dry, hilly and flat, temperate and not so temperate. Real nature is never uniform. At whatever spatial scale we examine nature, we encounter patchiness. If we were to look down from high above at a landscape of millions of hectares, using a zoom lens to move in and out from broad overview to detailed inspection of a square meter we would see that patterns visible at different scales overlay one another.

A Mathematical Mosaic BRILL

This publication is engaged in issues, trends, and themes depicted on mosaic pavements discovered in Israel, the Gaza Strip and Petra (the provinces of ancient Palaestina Prima, Secunda and Tertia) with comparable floors in Jordan (Arabia). The majority of the mosaic pavements discussed in this study are dated to the 4th-8th centuries CE. Mosaic pavements were the normal medium for decorating the floors of synagogues, churches, monasteries, and chapels, as well as public and private buildings. Inscriptions found on many of the pavements

commemorate the donors, refer to the artists, and sometimes date the mosaics. The ornamentation of the mosaics in this region is remarkable, rich, and varied in its themes and provides many insights into the contemporary artistic and social cultures.

Poverty Mosaics: Realities and Prospects in Small-Scale Fisheries Independently Published

The famous Nile Mosaic of Palestrina, ancient Praeneste in central Italy, dating to c. 100 B.C., is one of the earliest large mosaics which have been preserved from the classical world. It presents a unique, comprehensive picture of Egypt and Nubia. The interpretation of the mosaic is disputed, suggestions ranging from an exotic decoration to a topographical picture or a religious allegory. The present study demonstrates that the mosaic depicts rituals connected with Isis and Osiris and the yearly Nile flood. The presence of these Egyptian religious scenes at Praeneste can be explained by the assimilation of Isis and Fortuna, the tutelary goddess of Praeneste, and by the interpretation of the mosaic as a symbol of divine providence.

In this book, Liz James offers a comprehensive history of wall mosaics produced in the European and Islamic middle ages. Taking into account a wide range of issues, including style and iconography, technique and material, and function and patronage, she examines mosaics within their historical context.

She asks why the mosaic was such a popular medium and considers how mosaics work as historical 'documents' that tell us about attitudes and beliefs in the medieval world. The book is divided into two parts. Part I explores the technical aspects of mosaics, including glass production, labour and materials, and costs. In Part II, James provides a chronological history of mosaics, charting the low and high points of mosaic art up until its abrupt end in the late middle ages. Written in a clear and engaging style, her book will serve as an essential resource for scholars and students of medieval mosaics.
