*An Analysis of Samuel P. Huntington's The Clash of Civilizations and the Remaking of World Order* Modern Library  
 Hailed in The New York Times Book Review as "the doyen of Middle Eastern studies," Bernard Lewis has been for half a century one of the West's foremost scholars of Islamic history and culture, the author of over two dozen books, most notably *The Arabs in History*, *The Emergence of Modern Turkey*, *The Political Language of Islam*, and *The Muslim Discovery of Europe*. Eminent French historian Robert Mantran has written of Lewis's work: "How could one resist being attracted to the books of an author who opens for you the doors of an unknown or misunderstood

universe, who leads you within to its innermost domains: religion, ways of thinking, conceptions of power, culture--an author who upsets notions too often fixed, fallacious, or partisan." In *Islam and the West*, Bernard Lewis brings together in one volume eleven essays that indeed open doors to the innermost domains of Islam. Lewis ranges far and wide in these essays. He includes long pieces, such as his capsule history of the interaction--in war and peace, in commerce and culture--between Europe and its Islamic neighbors, and shorter ones, such as his deft study of the Arabic word *watan* and what its linguistic history reveals about the introduction of the idea of patriotism from the West. Lewis offers a revealing look at Edward Gibbon's portrait of Muhammad in *Decline and Fall of the Roman Empire* (unlike previous writers, Gibbon saw the

rise of Islam not as something separate and isolated, nor as a regrettable aberration from the onward march of the church, but simply as a part of human history); he offers a devastating critique of Edward Said's controversial book, *Orientalism*; and he gives an account of the impediments to translating from classic Arabic to other languages (the old dictionaries, for one, are packed with scribal errors, misreadings, false analogies, and etymological deductions that pay little attention to the evolution of the language). And he concludes with an astute commentary on the Islamic world today, examining revivalism, fundamentalism, the role of the Shi'a, and the larger question of religious co-existence between Muslims, Christians, and Jews. A matchless guide to the background of Middle East conflicts today,

Islam and the West presents the seasoned reflections of an eminent authority on one of the most intriguing and little understood regions in the world.

*The Return of Marco Polo's World* Rainlight  
The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.

*The Clash of Civilizations? The Debate:*

*20th Anniversary Edition* Harvard University Press

This book gives voice to outstanding scholars from three major Eastern civilizations—Chinese, Arabic, and Indian—who have entered into dialogue with equally distinguished scholars from the West. The themes of the book include challenges to knowledge in the late modern era; Eastern contributions to scientific knowledge; knowledge transfer across regions and civilizations; indigenous knowledge and modern education; and past and present influences from China.

**Political Order in Changing Societies**

University of Oklahoma Press

"Drawing on decades of first-hand experience as a foreign correspondent and military embed for *The Atlantic*, Robert D. Kaplan makes a powerful, clear-eyed case for what timeless principles should shape America's role in the world: a respect for the limits of Western-style democracy; a delineation between American interests versus American values; an awareness of the psychological toll of warfare; a projection of military power via a strong navy; and more"--

**From Huntington to Trump** Faber & Faber

In 1993, Samuel P. Huntington boldly asserted in the pages of *Foreign Affairs* that world politics was entering a new phase, one in which cultural differences in religion, history, language, and tradition were replacing Cold War tensions and would soon become the world's fundamental points of conflict. Huntington's striking thesis elicited both criticism and praise from the media and political experts around the world. More than a decade later, "The Clash of Civilizations?" continues to be a touchstone in global politics as writers passionately debate its merits and propose counter theories of their own. This collection presents Samuel Huntington's original, seminal essay followed by critical responses published in *Foreign Affairs*, including the author's reply to his critics and contemporary additions to the enduring question of how to understand world conflict. In this second edition, fresh contributions make *The Clash of Civilizations?: The Debate* newly relevant to students of International Relations and Political Science.

**Who are We?** Springer

This is the story of the world's biggest drug deal. In the nineteenth century, the British East India Company operated a triangle of trade that straddled the globe, running from India to China to Britain. From India to China, they took opium.

From China to Britain, they took tea. From Britain to India, they brought empire. It was a machine that consumed cheap Indian land and labour and spat out money. The British had two problems, though. They were importing enormous amounts of tea from China, but the Celestial Empire looked down on British goods and only wanted silver in return. Simultaneously, the expanding colony in India was proving far too expensive to maintain. The British solved both problems with opium, which became the source of income on which they built their empire. For more than a century, the British knew that the drug was dangerous and continued to trade in it anyway. Its legacy in India, whether the poverty of Bihar or the wealth of Bombay, is still not acknowledged. Like many colonial institutions in India, the story of opium is one of immense pain for many and huge privileges for a few.

**Opium Inc.** Routledge

Revolution within a state almost invariably leads to intense security competition between states, and often to war. In *Revolution and War*, Stephen M. Walt explains why this is so, and suggests how the risk of conflicts brought on by domestic upheaval might be reduced in the future. In doing so, he explores one of the basic questions of international relations: What are the connections between domestic politics and foreign policy? Walt begins by exposing the flaws in existing theories about the relationship between revolution and war. Drawing on the theoretical literature about revolution and the realist perspective on international politics, he argues that revolutions cause wars by altering the balance of threats between a revolutionary state and its rivals. Each state sees the other as both a looming danger and a vulnerable adversary, making war seem both necessary and attractive. Walt traces the dynamics of this argument through detailed studies of the French, Russian, and Iranian revolutions, and through briefer treatment of the American, Mexican, Turkish, and Chinese cases. He also considers the experience of the Soviet Union, whose revolutionary transformation led to conflict within the former Soviet empire but not with the outside world. An important refinement of realist approaches to international politics, this book unites the study of revolution with scholarship on the causes of war.

**Identity and Violence** Oxford University Press

Huntington examines the persistent gap between the promise of American ideals and the performance of American politics.

He shows how Americans have always been united by the democratic creed of liberty, equality, and hostility to authority, but how these ideals have been frustrated through institutions and hierarchies needed to govern a democracy.

*Inside a U.S. Embassy* Potomac Books, Inc. The impact of globalization on the world's developing economies is not conclusive: studies show conflicting conclusions to the same problems in the context of globalization in developing countries. It is this analytical inconclusiveness that is at the heart of this collection, which makes a fresh attempt to study the real impact of globalization.

*Obama and the Middle East* Foreign Affairs A hard-hitting assessment of Obama's current foreign policy and a sweeping look at the future of the Middle East The 2011 Arab Spring upended the status quo in the Middle East and poses new challenges for the United States. Here, Fawaz Gerges, one of the world's top Middle East scholars, delivers a full picture of US relations with the region. He reaches back to the post-World War II era to explain the issues that have challenged the Obama administration and examines the president's responses, from his negotiations with Israel and Palestine to his drawdown from Afghanistan and withdrawal from Iraq. Evaluating the president's engagement with the Arab Spring, his decision to order the death of Osama bin Laden, his intervention in Libya, his relations with Iran, and other key policy matters, Gerges highlights what must change in order to improve US outcomes in the region. Gerges' conclusion is sobering: the United States is near the end of its moment in the Middle East. The cynically realist policy it has employed since World War II--continued by the Obama administration--is at the root of current bitterness and mistrust, and it is time to remake American foreign policy.

**The Rise of the West** Macmillan + ORM He knew nothing of celestial navigation or of the existence of the Pacific Ocean. He was a self-promoting and ambitious entrepreneur. His maps were a hybrid of fantasy and delusion. When he did make land, he enslaved the populace he found, encouraged genocide, and polluted relations between peoples. He ended his career in near lunacy. But Columbus had one asset that made all the difference, an inborn sense of the sea, of wind and weather, and of selecting the optimal course to get from A to B. Laurence Bergreen's energetic and bracing book gives the whole Columbus and most importantly, the whole of his career, not just the highlight of 1492. Columbus

undertook three more voyages between 1494 and 1504, each designed to demonstrate that he could sail to China within a matter of weeks and convert those he found there to Christianity. By their conclusion, Columbus was broken in body and spirit, a hero undone by the tragic flaw of pride. If the first voyage illustrates the rewards of exploration, this book shows how the subsequent voyages illustrate the costs - political, moral, and economic.

*The Clash of Civilizations?* New Haven : Yale University Press

When President Clinton sent Richard Holbrooke to Bosnia as America's chief negotiator in late 1995, he took a gamble that would eventually redefine his presidency. But there was no saying then, at the height of the war, that Holbrooke's mission would succeed. The odds were strongly against it. As passionate as he was controversial, Holbrooke believed that the only way to bring peace to the Balkans was through a complex blend of American leadership, aggressive and creative diplomacy, and a willingness to use force, if necessary, in the cause for peace. This was not a universally popular view. Resistance was fierce within the United Nations and the chronically divided Contact Group, and in Washington, where many argued that the United States should not get more deeply involved. This book is Holbrooke's gripping inside account of his mission, of the decisive months when, belatedly and reluctantly but ultimately decisively, the United States reasserted its moral authority and leadership and ended Europe's worst war in over half a century. *To End a War* reveals many important new details of how America made this historic decision. What George F. Kennan has called Holbrooke's "heroic efforts" were shaped by the enormous tragedy with which the mission began, when three of his four team members were killed during their first attempt to reach Sarajevo. In Belgrade, Sarajevo, Zagreb, Paris, Athens, and Ankara, and throughout the dramatic roller-coaster ride at Dayton, he tirelessly imposed, cajoled, and threatened in the quest to stop the killing and forge a peace agreement. Holbrooke's portraits of the key actors, from officials in the White House and the Élysée Palace to the leaders in the Balkans, are sharp and unforgiving. His explanation of how the United States was finally forced to intervene breaks important new ground, as does his discussion of the near disaster in the early period of the implementation of the Dayton agreement. *To End a War* is a brilliant portrayal of high-wire, high-

stakes diplomacy in one of the toughest negotiations of modern times. A classic account of the uses and misuses of American power, its lessons go far beyond the boundaries of the Balkans and provide a powerful argument for continued American leadership in the modern world. *The Clash of Civilizations and the Remaking of World Order* Profile Books 'A rollicking good tale.' INDEPENDENT 'A first-rate mystery.' WASHINGTON POST AN AURELIO ZEN MYSTERY Aurelio Zen returns to his native Venice in an unofficial capacity, to investigate the disappearance of an American millionaire. But he is quickly reminded that, amid the hazy light and shifting waters of the lagoon, nothing is what it seems. As he is drawn deeper into the ambiguous mysteries surrounding the discovery of a skeletal corpse, he is also forced to confront a series of disturbing revelations about his own life. 'Absolutely brilliant . . . made me want to go back to travel in Italy again.' 5\* reader review 'I loved this book . . . a good storyline, and enough twists to keep me guessing.' 5\* reader review 'Perfect entertainment.' 5\* reader review 'My personal favourite in a great series.' 5\* reader review PRAISE FOR MICHAEL DIBDIN AND THE INSPECTOR ZEN SERIES: 'He wrote with real fire.' IAN RANKIN 'A maestro of crime writing.' SUNDAY TIMES 'One of the genre's finest stylists . . . And Zen himself is a masterly creation: he is anti-heroic and pragmatic but obstinate, cunning and positively burdened with integrity.' GUARDIAN 'Dibdin tells a rollicking good tale that you want both to read fast, because of its gripping storyline, and to linger over, to savour the evocative descriptions of place and mood.' INDEPENDENT 'One of British crime fiction's most distinguished and distinctive voices.' ANDREW TAYLOR 'Dibdin has a gift for shocking the unshockable reader.' Ruth Rendell 'Zen is one of the greatest creations of contemporary crime fiction.' OBSERVER 'I love the way these books capture the atmosphere and contradictions of Italy.' 5\* reader review 'Aurelio Zen novels are a great treat.' 5\* reader review 'There is no better writer than Dibdin. His books are a joy to read.' 5\* reader review 'Love these books . . . I am sure you will get hooked too!' 5\* reader review

*Rebels Against the Raj* Praeger

This now-classic examination of the development of viable political institutions in emerging nations is a major and enduring contribution to modern political analysis. In a new Foreword, Francis Fukuyama assesses Huntington's achievement, examining the context of

the book's original publication as well as its lasting importance. "This pioneering volume, examining as it does the relation between development and stability, is an interesting and exciting addition to the literature." -American Political Science Review "Must' reading for all those interested in comparative politics or in the study of development." -Dankwart A. Rustow, Journal of International Affairs *The Third Wave* Columbia University Press From Huntington to Trump argues that the "clash of civilizations," an idea first raised three decades ago by Bernard Lewis and endorsed by Samuel Huntington, has created a template for understanding the world which has been adopted by both the United Nations and right-wing populist politicians in Europe and the United States of America. Haynes traces the development of the "clash of civilizations" from the colonial period through the end of the Cold War and 9/11 and analyzes its effects on society.

Islam and the West Rowman & Littlefield A stunningly insightful account of the global political and economic system, sustained first by Britain and now by America, that has created the modern world. The key to the two countries' predominance, Mead argues, lies in the individualistic ideology inherent in the Anglo-American religion. Over the years Britain and America's liberal democratic system has been repeatedly challenged—by Catholic Spain and Louis XIV, the Nazis, communists, and Al Qaeda—and for the most part, it has prevailed. But the current conflicts in the Middle East threaten to change that record unless we foster a deeper understanding of the conflicts between the liberal world system and its foes.

*Many Globalizations* Indiana University Press

Amartya Sen argues that most of the conflicts in the contemporary world arise from individuals' notions of who they are, and which groups they belong to - local, national, religious - which define themselves in opposition to others.

The New Clash of Civilizations Cornell University Press

The second volume of the bestselling landmark work on the history of the modern state *Writing in The Wall Street Journal*, David Gress called Francis Fukuyama's *Origins of Political Order* "magisterial in its learning and admirably immodest in its ambition." In *The New York Times Book Review*, Michael Lind described the book as "a major achievement by one of the leading public intellectuals of our time." And in *The Washington Post*, Gerard DeGroot exclaimed "this is a book that will be remembered. Bring on volume two." Volume two is finally here, completing the most important work of political thought in at least a generation. Taking up the essential question of how societies develop strong, impersonal, and accountable political institutions, Fukuyama follows the story from the French Revolution to the so-called Arab Spring and the deep dysfunctions of contemporary American politics. He examines the effects of corruption on governance, and why some societies have been successful at rooting it out. He explores the different legacies of colonialism in Latin America, Africa, and Asia, and offers a clear-eyed account of why some regions have thrived and developed more quickly than others. And he boldly reckons with the future of democracy in the face of a rising global middle class and entrenched political paralysis in the West. A sweeping, masterful account of the struggle to create a well-functioning modern state, *Political Order and Political Decay* is destined to be a classic.

**The Clash of Civilizations?** Penguin Books India

An extraordinary history of resistance and the fight for Indian independence—the little-known story of seven foreigners to India who joined the movement fighting for freedom from British colonial rule. *Rebels Against the Raj* tells the story of seven people who chose to struggle for a country other than their own: foreigners to India who across the late 19th to late 20th century arrived to join the freedom movement fighting for independence from British colonial rule. Of the seven, four

were British, two American, and one Irish. Four men, three women. Before and after being jailed or deported they did remarkable and pioneering work in a variety of fields: journalism, social reform, education, the emancipation of women, environmentalism. This book tells their stories, each renegade motivated by idealism and genuine sacrifice; each connected to Gandhi, though some as acolytes where others found endless infuriation in his views; each understanding they would likely face prison sentences for their resistance, and likely live and die in India; each one leaving a profound impact on the region in which they worked, their legacies continuing through the institutions they founded and the generations and individuals they inspired. Through these entwined lives, wonderfully told by one of the world's finest historians, we reach deep insights into relations between India and the West, and India's story as a country searching for its identity and liberty beyond British colonial rule.

Knowledge Across Cultures Harper Collins A compelling amalgam of new writing and published essays by Minhaz Merchant, *The New Clash of Civilizations* offers deep and stimulating insights into how the contest between four major civilizational forces—the United States, China, India and Islam—will shape our century. The historic shift in the economic and geopolitical balance of power from the West to the East, Merchant writes, will determine the ideas and principles that govern this unfolding century. Divided into six distinct sections—History, Nation, World, Leaders, Science & Society, and Vintage—the book provides an original perspective on a dynamic nation coming to terms with itself and the world. In politics and science, history and economics, India's place in an increasingly competitive global order—and its interaction with the other three major civilizational strands—forms a cornerstone of the book's narrative. Broad in sweep and range, *The New Clash of Civilizations* is a lucid and brilliant account of the ebb and flow of power in the twenty-first century.
