Instantly and accurately diagnose and treat the full range of pediatric skin problems "The focus on quick recognition of pediatric dermatologic conditions and pediatric illnesses makes this atlas an asset in the office. The ease of reference is fantastic. This will replace the dermatology reference I currently use. 3 Stars."--Doody's Review Service Modeled after Fitzpatrick's Color Atlas and Synopsis of Clinical Dermatology, the world's most widely-used dermatologic reference, this point-of-care atlas provides large, detailed, full-color photographs of skin diseases in children along with the latest management and treatment recommendations. You'll find everything you need to confidently assess, diagnose, and manage diseases of the skin, hair, and nails of pediatric patients in a busy clinical environment. Each illness or disorder features a logical easy-to-read presentation that includes: Epidemiology Pathophysiology History Physical Examination Differential Diagnosis Laboratory Evaluation Course and Prognosis Treatment and Prevention/Management (with approved pediatric dosages) One or two full-color photographs Featuring more than 350 clear, crisp full-color photographs and coverage that spans everything from disorders of blood and lymph vessels to cutaneous bacterial, viral, and fungal infections, Color Atlas & Synopsis of Pediatric Dermatology is the fastest and most reliable way to confirm your next pediatric diagnosis.

Fitzpatrick's Color Atlas and Synopsis of Clinical Dermatology, Eighth Edition McGraw-hill

This book identifies the most common presentations and essential features of top dermatological conditions in patients with skin of color. It presents practical information in a case-based organization to assist dermatologists in clinical decision making, and discusses important cultural beliefs that must be considered in order to provide optimal care to patients with skin of color. There is an increasing demand for dermatologic treatments in patients with skin of color, as well as an accompanying need for education and training in this quickly expanding market. Skin of color is a key topic within dermatology as specific conditions can be harder to diagnose effectively in darker skin, and patients' treatment can be compromised by this. Clinical Cases in Skin of Color: Medical, Oncological and Hair Disorders, and Cosmetic Dermatology is a concise resource with practical guidance for board certified dermatologists and dermatologists in training.

Color Atlas and Synopsis of Pediatric Dermatology: Second Edition McGraw Hill Professional

This best selling text has been completely revised and refreshed in the fourth edition. The authors aim to enthuse family doctors (for whom they are primarily writing) to enjoy the challenge of diagnosing and treating skin conditions. Clinical Dermatology contains over 500 high quality pictures and diagrams matched with many colourful phrases to illustrate and entertain as it teaches. It has established a reputation as a 'way of learning' and as a cogent overview of the subject for the aspiring specialist. Readers are guided through the maze that too often lies between the presenting skin complaint and its final diagnosis and treatment. The authors have created an easily read text with enough detail to clarify the subject but not enough to obscure it. This fourth edition contains new chapters on racially pigmented skin, dermatology of different age groups and cosmetic dermatology. Relevant internet sites are now clearly highlighted at the end of each chapter and the comprehensive formulary has been updated.
