 t's the 1960s in Jacksonville, Florida (where the sixties are still the
 fifties). Some of America's last sweet moments of innocence are
 unfolding out on the coastal highway at the Flamingo, the largest
 drive-in movie theatre in the world. Its owner, Southern patriarch
 Hubert Lee, possesses a fervour matching the size of the Great
 White Wall of the Flamingo's gigantic screen tower, where John
 Wayne or Audrey Hepburn or invading body-snatchers flicker
 nightly. Hubert's unforgiving ego meets its match in Turner West,
 who owns the funeral home next door and wants to build a
 cemetery on land staked by his gleefully stubborn neighbour. So
 when Hubert's teenage son Abe develops his first adolescent
 crush, it makes devilish sense that the object of his affections
 should be Grace, Turner's only daughter and the apple of his eye.
 At once funny and heart-breaking, THE FLAMINGO RISING is a
 novel full of tenderness and insight about the power of love, the
 need for faith and the persistence of memory.

This is a completely new and revised edition of the General Aviation Handbook, long overdue since it has been over 10 years since the last edition was published. This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons.

Aircraft new to this edition include the so-called "heavy microlights", which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger page size provides greater space for large data tables and photos. Previous editions have been strong sellers; this is the main reference book on this important sector of the aviation world, and this new edition will be welcomed by both aviation enthusiasts and those involved in the aviation industry.

Fly an airplane at a set attitude, airspeed, and power setting, and it does precisely what it is supposed to—every time. This book tells why and how "flying by the numbers" works, and gives the flight-tested numbers for precision performance in 27 of America's favorite small aircraft. For aircraft not included in this list, the book provides exact cockpit procedures for nailing down the numbers for any other light airplane.

Fighter Pilot is the memoir of legendary ace American fighter pilot and general officer in the U.S. Air Force, Robin Olds. Robin Olds was a larger-than-life hero with a towering personality. A graduate of West Point and an inductee in the National College Football Hall of Fame for his All-American performance for Army, Olds was one of the toughest college football players at the time. In WWII, Olds quickly became a top fighter pilot and squadron commander by the age of 22—and an ace with 12 aerial victories. But it was in Vietnam where the man became a legend. He arrived in 1966 to find a dejected group of pilots and motivated them by placing himself on the flight schedule under officers junior to himself, then challenging them to train him properly because he would soon be leading them. Proving he wasn't a WWII retread, he led the wing with aggressiveness, scoring another four confirmed kills, becoming a rare triple ace. Olds, who retired a brigadier general and died in 2007, was a unique individual whose personal story presents one of the most eagerly anticipated military books in recent memory. Please note: This ebook edition does not include the photo insert from the print edition.

Modeling, simulation, and analysis (MS&A) is a crucial tool for military affairs. MS&A is one of the announced pillars of a strategy for transforming the U.S. military. Yet changes in the enterprise of MS&A have not kept pace with the new demands arising from rapid changes in DOD processes and missions or with the rapid changes in the technology available to meet those demands. To help address those concerns, DOD asked the NRC to identify shortcomings in current practice of MS&A and suggest where and how they should be resolved. This report provides an assessment of the changing mission of DOD and environment in which it must operate, an identification of high-level opportunities for MS&A research to address the expanded mission, approaches for improving the interface between MS&A practitioners and decision makers, a discussion of training and continuing education of MS&A practitioners, and an examination of the need for coordinated military science research to support MS&A.

Until recently, gender stereotypes have shaped the ways in which society views female offenders, often as individuals incapable of criminal activity or extreme violence. When Women Offend: Crime and the Female Perpetrator sheds light on the complex world of female offending, demonstrating women's capability to behave aggressively and violate gender expectations. Readers learn about the influence of gender stereotypes on perceptions of female offending, as well as about common myths associated with female deviance. They are introduced to criminological theory and explore psychological, developmental, sociological, and biological theories through a feminist lens. Dedicated chapters outline various types of female offending, from serial killing to Munchausen by proxy, filicide to sex offending, domestic homicide to terrorism, and more. Each of these chapters includes real-life cases and an exploration of motives and social factors. The book features excerpts from interviews with female offenders. When Women Offend is ideal for courses in criminology and criminological theory, especially those focused on the female offender. Stephanie Scott-Snyder is a forensic mental health clinician. She has provided court-mandated therapy to offenders,

conducted risk assessments, worked closely with law enforcement, and provided crisis intervention to victims of violent crime. She is an adjunct faculty member at two NYC metro area colleges, where she teaches courses in the psychology of law, forensic psychology, adolescent development, and social psychology. Prior to her work in the field of forensic mental health, Scott-Snyder was a writer/producer and creative director for network television, often focusing on police dramas and documentary-style crime shows.
