Famous inventors and the inventions they develop is a fascinating area of historical study that is usually far too advanced for young children. However, a Famous Inventors & Inventions Picture Book breaks that information down in a way that is interesting and engaging to young boys and girls. Instead of pages and pages of text that makes no sense to them, children can see a picture of the inventor alongside the invention they created. This helps to begin laying the foundation for this knowledge in children at a young age and may even spark their interest and imagination in this area.

The Impact of Digital and Paper-based Graphic Organizers on the Persuasive Writing Process of Fourth and Fifth Grade Students Shell Education

Graphic organizers have proven to be successful tools for helping students develop their critical and creative thinking skills. This research-based resource shows how graphic organizers can improve teaching practices, help differentiate instruction in the classroom, and raise learning outcomes for all students, including English language learners and students with learning disabilities. The author presents graphic organizers for nine types of thinking processes based on Bloom's taxonomy and offers examples of how to apply the graphic organizers in different subject areas and grade levels. This hands-on guide demonstrates how teachers can: Promote the critical thinking processes of assuming, inferring, analyzing, prioritizing, and judging Encourage the creative thinking processes of brainstorming, connecting, creating, and elaborating Modify graphic organizers or create their own to meet individual learning needs With assessment

rubrics for providing quality feedback included, Differentiating With Graphic Organizers addresses ways to promote and build students' creative reasoning, communication, and problem-solving skills and make the learning process a success.

Graphic Organizers for Reading Comprehension Shell Education

At present, graphic organizers have become recognized instructional tools to help support students as they write. The purpose of this study is to examine the impact of paper-based

and digital graphic organizers to improve persuasive writing of fourth and fifth grade students. A quasi-experimental study with a comparison design with pre-test and post-tests was used with the switching replication method. The population consists of sixty-seven public and private school students in fourth and fifth grade. The most prominent results indicate that the use of a digital graphic organizer first, leads to significant improvements in the following five writing outcome areas: goal statements, reasoning statements, supporting arguments, conclusion statements, and overall scores. Likewise, female students also showed significant improvements in all five writing outcomes. Comparable to digital, the use of paper-based graphic organizers first, resulted in significant improvements in three areas: supporting arguments, conclusion statements, and overall scores. For older students (aged 10-11), the use of both paper-based and digital graphic organizers first, leads to significant improvements in the following five writing outcome areas: goal statements, reasoning statements, supporting arguments, conclusion statements, and overall scores. The overall results indicate that graphic organizers yield significant improvements in the persuasive writing of fourth and fifth grade students. Furthermore, a consistent finding throughout this study is that the use of paper-based and digital graphic organizers results in significant improvements in these three areas: supporting arguments, conclusion statements, and overall scores.
