Corydon was founded at the population center of the Indiana Territory. William Smith chose a ridge with a commanding view at the confluence of Big and Little Indian Creeks for his home and was comfortably settled around 1800. Territorial governor William Henry Harrison was a frequent guest, giving his name to the county that was later established. Corydon eclipsed Clarksville to become the territorial capital when the Illinois Territory was cut away in 1813, leaving the previous capital at Vincennes on the extreme western boundary of the Indiana Territory. Indiana became the 19th state on December 11, 1816. In 1827, William Holmes McGuffey (of McGuffey's Readers fame) recommended William Porter for headmaster of the Corydon Seminary. Porter went on to become a judge and bought the Gov. William Hendricks residence. Porter's daughter Helen married Patrick Griffin and raised her family in the house where she had been born. Maurice Griffin raised his

family on the square, where his son Frederick Porter Griffin resided until arranging for the Hendricks house to become part of the Corydon Capitol State Historic Site. The Porter-Griffin family photographs, now housed in the Frederick Porter Griffin Center, made this book possible.

She was born of a White Witch and a Dragonslayer who was also part Demon. As a child, she practiced witchcraft with her mother and was taught how to be a Dragonslayer with her father's continued patience. Raised in a country that allowed all to practice witchcraft, she found herself as an adult living in a country that threatened death to all who practiced magic. There were still Dragons to be slain, and she was the only Dragonslayer that plied her skills. She was Corydon the Last Dragonslayer!

This program has been made possible through a Historic Preservation Education Grant from Indiana Landmarks, Indiana Humanities, and the National Endowment for the Humanities. 6 x 916 pages Many of the early houses in Corydon were built of hewn logs, although brick appeared during "boom times" during the Capital Period (1816-1825.) Amazingly, there are nine buildings still standing in Corydon today that were built during the Capital Period (1816-1825). Numerous other buildings built during the period have, of course, fallen by the wayside. Details of the location and significance of each will be detailed in this booklet to provide an ambiance of time period with an emphasis on the interconnectedness of the occupants and owners of these nine buildings.

The Wonder of Snow Knopf Books for Young Readers

After the destruction of the city of Atlantis, Corydon is in a self-imposed exile. Clearly his presence only puts his friends in danger. And so he hides out in the desert, tending to goats and camels, keeping his friends safe by staying away. But, as ever, the gods of Olympus have other plans. Now the city of Troy is under siege, and Corydon's friends are trapped inside. And so Corydon reluctantly joins them, hoping to help, and fearing that it is he that will tip the scales against them. In this thrilling conclusion to the trilogy about the gods and monsters of ancient Greece, Corydon knows that it will be up to him to thwart the mighty Zeus if the others are to live. At what cost will he buy their freedom?

First published nearly one hundred years ago, André Gide's masterpiece, translated from the original French by Pulitzer Prize winner Richard Howard, draws from the disciplines of biology, philosophy, and history to support the author's assertion that homosexuality is a natural human trait. At the time of his death in 1951, having won the Nobel Prize in Literature only four years prior, André Gide was considered one of the most important literary minds of the twentieth century. In Corydon, initially released anonymously in installments between 1911 and 1920, Gide speaks his most subversive and provocative truth. Citing myriad examples that span thousands of years, Gide's Socratic dialogues argue that homosexuality is natural—in fact, far more so than the social construct of exclusive heterosexuality, the act of systematically banning or ostracizing same-sex relationships. Corydon, named for the pederast character in Virgil's Eclogues, caused its author "all kinds of trouble," according to his friends, but he regarded it as his most important work. The courage, intelligence, and prescience of Gide's argument make it all the more impressive today.

Excerpt from *The Pageant of Corydon: The Pioneer Capital of Indiana, 1816-1916*; The Drama of the Preeminence of the Town at the Time When for Twelve Years It Was the Territorial and the State Capital of Indiana The Pageant of Corydon is to commemorate the time of the pre-eminence of the town, when it was for twelve years, from 1813 to 1825, first the Territorial and then the State Capital of Indiana. Here in 1816 met the Constitutional Convention which formulated and voted the first Constitution of the State of Indiana. The historical interest of the village of Corydon centers naturally in the Old Capitol, erected in 1812 as a Court House and appropriated to the use of the Governor and Legislature when Corydon became the capital in 1813, and in the Constitution Elm, beneath whose shading branches the Convention met in 1816. The Pageant will be performed on the Public Square in front of the Old Capitol. The music, played by the Indiana University Orchestra, is most of it from the music of the Pageant of Bloomington and Indiana University, composed by Charles Diven Campbell. The Hymn to America was composed by Brookes C. Peters. Corydon is taken from the old Missouri Harmony and orchestrated by Dr. Campbell. In presenting the historical material a certain freedom has necessarily been exercised for the sake of dramatic clarity and effectiveness. In many instances the language of the dialogue is in the actual words of the characters represented. It has, however, seemed inadvisable to indicate these passages by quotation marks, on account of the frequent necessity for making slight changes, omissions, or

additions in the wording to suit the situation as represented. So also in producing the pageant certain omissions have been deemed advisable which it did not seem necessary to eliminate in the printed form of the pageant. Excerpt: The Battle of Corydon was a minor engagement that took place July 9, 1863, just south of Corydon, which had been the original capital of Indiana until 1825, and was the county seat of Harrison County. The attack occurred during Morgan's Raid in the American Civil War as a force of 2,500 cavalry invaded the North in support of the Tullahoma Campaign. It was the only pitched battle of the Civil War that occurred in Indiana, and no battle has occurred within Indiana since. As news of an impending raid spread across the state, Governor Oliver P. Morton called out the state's militia force, the Indiana Legion, to defend against the threat. Unaware of the size of the invading army, four companies of the 6th and 8th Regiments of the Legion, totaling about one hundred men, attempted to prevent the Confederates from crossing the Ohio River into Indiana, but were overcome by superior artillery fire, killing two of the defenders. The units retreated northward where they met with the main body of the 6th Regiment under the command of Col. Lewis Jordan. Along with the townspeople, they constructed breastworks that formed a defensive line south of Corydon. Despite promises of reinforcements from regional Legion commanders in New Albany, only about 450 men (consisting almost entirely of locals) were defending the town. As the raiders...

In this second book in the Corydon trilogy, trouble has invaded the Island of Monsters once again. The peace-loving Minotaur has been kidnapped! Signs suggest he's been taken to the city of Atlantis, and so Corydon and his fellow monsters set sail to rescue their friend. Their travels across Poseidon's treacherous waters involve one narrow escape after another—from the volcanic forge of Hephaistos, and the seductive song of the Sirens, from the licentious lair of Dionysos, and the grasping tentacles of the Kraken—until at last they reach Atlantis. And Atlantis turns out to be more seductive, monstrous, and volatile than anything they've encountered yet.

Excerpt from *The Ancient Capital of the State of Indiana: Corydon, Harrison County* In conformity with a joint resolution of both Houses of the General Assembly of the Territory, Acting Governor Gibson prorogued them to meet at Corydon on the first day of December, 1813. Corydon remained the Territorial and State Capital of Indiana, from that date until the tenth day of January, 1825, when it was removed to Indianapolis. The population of this ancient town is near one thousand, which is not much greater than it was while it was the Capital of the State. A young shepherd, Corydon, is driven out of his village because of his unusual appearance and then captured and put on display as a monster. Alongside him in the traveling freak show are Medusa, the Minotaur, the Sphinx, and other classical beasts. When Corydon helps these monsters to escape their cages, they scatter to seek peace and solitude away from prying eyes. But then an army of "heroes" arrives hoping to win glory by killing the monsters, and Corydon must unite these unloved and unlikely allies to fight for their survival and for their island home.

The Pageant of Corydon

Excerpt from *Corydon: An Elegy in Memory of Matthew Arnold* and Oxford The general form and subject of this poem are defined succinctly on the title page as an Elegy in memory of Matthew Arnold and Oxford. The title itself, *Corydon*, was naturally suggested 'by Arnold's own *Thyrsis*, an Elegy peculiarly dear to those that love both Oxford and poetry. To all such I would fain hope Corydon may make some appeal, for its subject's sake, if not for any merit of its own. The fuller meaning of the poem I have sought to indicate by the prosaic device of a detailed table of contents, so that I may dispense with a longer preface and all notes of explanation.
