TRISTIN ADKINS

Billboard Simon and Schuster

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United

States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American

regions are greater than between European nations.

The Fourth Industrial Revolution UNC Press Books

The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their

organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with *WHY*. They realized that people won't truly buy into a product, service, movement, or idea until they understand the *WHY* behind it. *START WITH WHY* shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinsek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with *WHY*.

Management Information Systems

Routledge

Freshwater Algae: Identification and Use as Bioindicators provides a comprehensive guide to temperate freshwater algae, with additional information on key species in relation to environmental characteristics and implications for aquatic management. The book uniquely combines practical material on techniques and water quality management with basic algal taxonomy and the role of algae as bioindicators. *Freshwater Algae: Identification and Use as Bioindicators* is divided into two parts. Part I describes techniques for the sampling, measuring and observation of algae and then looks at the role of algae as bioindicators and the implications for aquatic management. Part II provides the identification of major genera and 250 important species. Well illustrated with numerous original illustrations and photographs, this reference work is essential reading for all practitioners and researchers concerned with assessing and managing the aquatic environment.

The Political Economy of the Special Relationship Routledge

Includes the Aerial Warfare In Europe During World War II illustrations pack with

over 180 maps, plans, and photos. Gen Henry H. "Hap." Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold's travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold's final seven journeys and the diaries he kept therein. *Introduction to Permanent Plug and Abandonment of Wells* Simon and Schuster

Hybrid energy systems integrate multiple sources of power generation, storage, and transport mechanisms and can facilitate increased usage of cleaner, renewable, and more efficient energy sources. Hybrid

Power: Generation, Storage, and Grids discusses hybrid energy systems from fundamentals through applications and discusses generation, storage, and grids. Highlights fundamentals and applications of hybrid energy storage Discusses use in hybrid and electric vehicles and home energy needs Discusses issues related to hybrid renewable energy systems connected to the utility grid Describes the usefulness of hybrid microgrids and various forms of off-grid energy such as mini-grids, nanogrids, and stand-alone systems Covers the use of hybrid renewable energy systems for rural electrification around the world Discusses various forms and applications of hybrid energy systems, hybrid energy storage, hybrid microgrids, and hybrid off-grid energy systems Details simulation and optimization of hybrid renewable energy systems This book is aimed at advanced students and researchers in academia, government, and industry, seeking a comprehensive overview of the basics, technologies, and applications of hybrid energy systems.

MONEY Master the Game CRC Press
Based on a wealth of empirical studies and

case studies, this book explains the strategic choices companies have to make in order to remain consistent. In each chapter, real-life examples illuminate the key message managers should take away from the book. It offers a purely managerial viewpoint focused on what managers can do to manage the business environment in any situation.

Facts on File National Academies Press
World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing,

smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Albion's Seed John Wiley & Sons

Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years the uranium enrichment industry was dominated by a single method, gaseous diffusion, which was technically complex, extremely capital-intensive, and highly inefficient in its use of energy. As long as this remained true, only the richest and most technically advanced nations could afford to pursue the enrichment route to weapon acquisition. But during the 1970s this situation changed dramatically. Several new and far more accessible enrichment techniques were developed, stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world-wide nuclear power industry. This proliferation of new techniques, coupled with the

subsequent contraction of the commercial market for enriched uranium, has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation. Some of the issues addressed in this book are: A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks; A detailed projection of the world demand for uranium enrichment services; A summary and critique of present institutional non-proliferation arrangements in the world enrichment industry, and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons.

20th Century Day by Day John Wiley & Sons

This open access book offers a timely guide to challenges and current practices to permanently plug and abandon hydrocarbon wells. With a focus on

offshore North Sea, it analyzes the process of plug and abandonment of hydrocarbon wells through the establishment of permanent well barriers. It provides the reader with extensive knowledge on the type of barriers, their functioning and verification. It then discusses plug and abandonment methodologies, analyzing different types of permanent plugging materials. Last, it describes some tests for verifying the integrity and functionality of installed permanent barriers. The book offers a comprehensive reference guide to well plugging and abandonment (P&A) and well integrity testing. The book also presents new technologies that have been proposed to be used in plugging and abandoning of wells, which might be game-changing technologies, but they are still in laboratory or testing level. Given its scope, it addresses students and researchers in both academia and industry. It also provides information for engineers who work in petroleum industry and should be familiarized with P&A of hydrocarbon wells to reduce the time of P&A by considering it during well planning and construction.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

American Airpower Comes Of Age—General Henry H. “Hap” Arnold’s World War II Diaries Vol. II

[Illustrated Edition] Springer

Perfect for anyone who's curious about the people, places, and events of the last 100 years, this book is both the ultimate guide to humankind's most tragic and triumphant century and a perfect millennium gift and keepsake. Photos.

Mergers, Acquisitions, and Corporate Restructurings Springer

In this series of DIY maintenance and repair manuals for car or motorcycle owners, each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can manage the work.

Social Research Methods: Qualitative and Quantitative Approaches: Pearson New International Edition Springer Nature

The string of business scandals that recently engulfed America painted a picture of corporate chieftains lining their pockets by cutting corners, cooking the books, and duping gullible investors. In doing so, greedy CEOs have hijacked what could be one of the most important business innovations in decades: stock options for all employees. Joseph Blasi, Douglas Kruse, and Aaron Bernstein—all

leading experts on employee ownership—show how American companies would perform much better if they followed the lead of many high-tech firms and granted options to their entire workforce, rather than to just a tiny corporate elite. Using SEC data in a way never done before, they document the vast wealth executives have accumulated for themselves. It shows how the abuse of options has taken place not just at scandal-ridden companies such as Enron and WorldCom, but across the entire reach of corporate America. In the *Company of Owners* argues that there's a better way. Broad-employee ownership through stock options offers a new model for U.S. corporations and American capitalism. The authors explain how employees and shareholders alike would benefit if most large companies adopted what they call the partnership capitalism approach—using options to encourage employees to think and act like owners. A searing critique of business as usual in America's executive suites, this book offers a comprehensive vision for how stock options can enrich companies, employees, investors, and the U.S. economy as a whole. With its remarkable

new evidence and astute synthesis, In the Company of Owners will change the way America thinks about stock options. Joseph R. Blasi, a sociologist, and Douglas L. Kruse, an economist, are professors at Rutgers University's School of Management and Labor Relations. Aaron Bernstein is a senior writer at Business Week magazine.

Critical Code Oxford University Press

This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom.

Forum Memo to Members John Wiley & Sons

This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections. Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine by whom they were made and how. An international collaboration known

as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information available about these fascinating remnants of the ancient world. The free online edition of this open-access publication is available at www.getty.edu/publications/mummyportraits/ and includes zoomable illustrations and graphs. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book.

State Capital and Private Enterprise
Penguin

Born in Carthage, North Carolina, Lucean Arthur Headen (1879–1957) grew up amid former slave artisans. Inspired by his

grandfather, a wheelwright, and great-uncle, a toolmaker, he dreamed as a child of becoming an inventor. His ambitions suffered the menace of Jim Crow and the reality of a new inventive landscape in which investment was shifting from lone inventors to the new "industrial scientists." But determined and ambitious, Headen left the South, and after toiling for a decade as a Pullman porter, risked everything to pursue his dream. He eventually earned eleven patents, most for innovative engine designs and anti-icing methods for aircraft. An equally capable entrepreneur and sportsman, Headen learned to fly in 1911, manufactured his own "Pace Setter" and "Headen Special" cars in the early 1920s, and founded the first national black auto racing association in 1924, all establishing him as an important authority on transportation technologies among African Americans. Emigrating to England in 1931, Headen also proved a successful manufacturer, operating engineering firms in Surrey that distributed his motor and other products worldwide for twenty-five years. Though Headen left few personal records, Jill D. Snider recreates the life of

this extraordinary man through historical detective work in newspapers, business and trade publications, genealogical databases, and scholarly works. Mapping the social networks his family built within the Presbyterian church and other organizations (networks on which Headen often relied), she also reveals the legacy of Carthage's, and the South's, black artisans. Their story shows us that, despite our worship of personal triumph, success is often a communal as well as an individual achievement.

Autocar Inter-American Development Bank

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for

gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Uranium Enrichment and Nuclear Weapon Proliferation Princeton University Press

This manual has been designed and written with the purpose of introducing key concepts and areas of debate around the "creative economy", a valuable development opportunity that Latin America, the Caribbean and the world at large cannot afford to miss. The creative economy, which we call the "Orange Economy" in this book (you'll see why), encompasses the immense wealth of talent, intellectual property, interconnectedness, and, of course, cultural heritage of the Latin American and Caribbean region (and indeed, every region). At the end of this manual, you will have the knowledge base necessary to understand and explain what the Orange Economy is and why it is so important. You will also acquire the analytical tools needed to take better advantage of opportunities across the arts, heritage, media, and creative services.
