 Problems associated with work-family conflict do not belong to individual families alone, but have a major social and economic impact on the greater community. This scenario also holds true across sub-Saharan Africa, as nations enter the global economy and rising numbers of women enter the workforce. One of the first resources to focus on this region, *Work-Family Interface in Sub-Saharan Africa* probes rarely-studied dimensions of conflict between paid employment and family responsibilities. It balances theoretical background, empirical findings and current and emerging interventions for an insightful and practical review of ongoing issues affecting working women with

families. Coverage contrasts concepts of work and family between the developing world and the West and related social concerns such as gender expectations and sexual harassment are examined in the work context. The book describes a range of family strategies for resolving work-family friction and chapters end with policy recommendations as first steps toward remedying longstanding challenges. Among the thought-provoking dispatches: Ghana: Managing work and family demands Nigeria: Strain-based family interference with work Botswana: The social impact of job transfer policy on dual-career families Kenya: The role of household help in work-family balance South Africa: State measures toward work-care integration Zambia: The quest for a family policy As evinced by these chapters, progress is gradual and far from uniform. As a guide for future study and future policy, *Work-Family Interface in Sub-Saharan Africa* is a substantial reference for sociologists, public health professionals, public and social policymakers and administrators. *Decisions of the Federal Labor Relations Authority* DIANE Publishing

A practical guide to innovation strategies based on fact, not feeling The Innovation Formula delivers strategies for building a culture where innovation can thrive, based on actual scientific research. Author Amantha Imber holds a PhD in organisational psychology, and has been called upon by a multinational roster of forward-thinking companies—such as Google, Disney, LEGO and Virgin—to improve innovation at all levels. In this book, she shares her strategies and helps you tap into a substantial body of scientific research to help further innovative practice within your own company. For example, rewarding failed innovations can actually be a critical aspect of building an innovation culture. It's rarely done, but it fosters creative thought by signaling to people that failure is tolerated and is a necessary ingredient in the pursuit of innovation. This kind of practical, easily implemented strategy is the lynchpin of cultural change. This guide shares fourteen separate, yet interconnected strategies for improving your company's innovation culture, and provides illustrative examples of real-world companies who are putting these plans into action. Business innovation guides tend to focus on how one company does it. But it's not your company, and just because it worked for Google or Apple doesn't mean that it's right for you. This book is different; these techniques are based on science, not gut feeling, and can apply to any organisation, at any level. Delve into the science behind successful culture shift For best results, reward innovation, whether or not it succeeds Learn the critical elements that foster organisation-wide creativity Implement practical strategies based on evidence, not anecdotes Fostering a culture of innovation means making your company a safe space for new ideas. Over 95% of business leaders surveyed get it wrong, because intuition cannot compete with data. The Innovation Formula gives you a science-based framework for turning your organisation into one where innovation survives and thrives.

The State Department is responsible for conducting foreign relations, including formulating policy on diverse international issues and coordinating and supporting U.S. programs and activities overseas. State is expected to perform a wide variety of functions that are critical to U.S. interests: provide leadership to help bring peace and stability to areas such as Bosnia and the Middle East; report on overseas events; influence other countries to adopt policies and practices consistent with U.S. interests on security, economic, narcotics, crime, environment, democracy, and other issues; assist U.S. business abroad; provide services to U.S. citizens overseas; and issue passports and visas. To develop options to allow the State Department to accommodate potential budget reductions, GAO analyzed State's reform initiatives and examined the functions of State's headquarters organization, overseas posts in 6 countries, and selected activities of 14 other U.S. government agencies that share responsibility with State for certain international activities.
