Two veterans of the America's Cup races offer advice on crew selection, sailing techniques, sail trim, and weather awareness

The Emancipation of Evan Walls William Morrow & Company

The first extensive study of the African American community under colonial Spanish rule, *Black Society in Spanish Florida* provides a vital counterweight to the better-known dynamics of the Anglo slave South. Jane Landers draws on a wealth of untapped primary sources, opening a new vista on the black experience in America and enriching our understanding of the powerful links between race relations and cultural custom. Blacks under Spanish rule in Florida lived not in cotton rows or tobacco patches but in a more complex and international world that linked the Caribbean, Africa, Europe, and a powerful and diverse Indian hinterland. Here the Spanish Crown afforded

sanctuary to runaway slaves, making the territory a prime destination for blacks fleeing Anglo plantations, while Castilian law (grounded in Roman law) provided many avenues out of slavery, which it deemed an unnatural condition. European-African unions were common and accepted in Florida, with families of African descent developing important community connections through marriage, concubinage, and godparent choices. Assisted by the corporate nature of Spanish society, Spain's medieval tradition of integration and assimilat

Flow cytometry continually amazes scientists with its ever-expanding utility. Advances in flow cytometry have opened new directions in theoretical science, clinical diagnosis, and medical practice. The new edition of *Flow Cytometry: First Principles* provides a thorough update of this now classic text, reflecting innovations in the field while outlining the fundamental elements of instrumentation, sample preparation, and data analysis. *Flow Cytometry: First Principles, Second Edition* explains the basic principles of flow cytometry, surveying its primary scientific and clinical applications and highlighting state-of-the-art techniques at the frontiers of research. This edition

contains extensive revisions of all chapters, including new discussions on fluorochrome and laser options for multicolor analysis, an additional section on apoptosis in the chapter on DNA, and new chapters on intracellular protein staining and cell sorting, including high-speed sorting and alternative sorting methods, as well as traditional technology. This essential resource: Assumes no prior knowledge of flow cytometry Progresses with an informal, engaging lecture style from simple to more complex concepts Offers a clear introduction to new vocabulary, principles of instrumentation, and strategies for data analysis Emphasizes the theory relevant to all flow cytometry, with examples from a variety of clinical and scientific fields *Flow Cytometry: First Principles, Second Edition* provides scientists, clinicians, technologists, and students with the knowledge necessary for beginning the practice of flow cytometry and for understanding related literature.

2020 Unmasked is a comprehensive visual story of the year that changed America. The images were captured by three photographers from three different cities: Susan Baggett in Boston, Robin

Fader in Washington, DC, Victor Mirontschuk in New York City, and edited by multi-award-winning photographer Ari Espay. We decided to create a book together when we realized we were each out in our own city's streets photographing and trying to make sense of this crazy new world. 2020 UNMASKED will also include personal narratives of people most seriously impacted by the events of the year. There are four sections: Election, Resistance, Covid, and Lockdown.

Women have a long history of keeping the lights burning, from tending ancient altar flames or bonfires to modern-day lighthouse keeping. Yet most of their stories are little-known. Guiding Lights includes true stories from around the world, chronicling the lives of the extraordinary women who mind the world's storm-battered towers. From Hannah Sutton and her partner Grant, the two caretakers living alone on Tasmania's wild Maatsuyker Island, to Karen Zacharuk, the keeper in charge of Cape Beale on Canada's Vancouver Island, where bears, cougars and wolves roam, the lives of lighthouse women are not for the faint of heart. Stunning photographs from throughout history accompany accounts of the dramatic torching of Puysegur Point, one of NZ's most inhospitable lighthouses; 'haunted' lighthouses in across the US and their tragic tales; lighthouse accidents and emergencies around the world; and two of the world's most legendary lighthouse women: Ida Lewis (US) and Grace Darling (UK), who risked their lives to save others. The book also explores our dual perception of lighthouses: are they comforting and romantic beacons symbolizing hope and trust, or storm-lashed and forbidding towers with echoes of lonely, mad keepers? Whatever our perception, stories of women's courage and dedication in minding the lights — then and now — continue to capture our imagination and inspire.

Revised and updated, this Second Edition of a classic text describes and evaluates—in greater detail—the most recent practical applications of flow cytometry technique to basic cellular biological investigations and clinical research on human neoplasms. Ideal for the experienced researcher as well as the novice, this informative book offers state-of-the-art reviews of all aspects of flow cytometry. New articles highlight investigations of higher plants, the flow cytometry of microorganisms, and measurements of intracellular ionized calcium and membrane potential—illustrating techniques of specimen preparation, measurement and analysis for each. New chapters examine applications of flow cytometry to medical genetics, genetic toxicology, and ultrasensitive analysis of molecules in solution. The Second Edition goes beyond the traditional analysis of DNA histograms with BrdU incorporation and DNA denaturability to identify and analyze the cell cycle more precisely. New or rewritten chapters discuss the importance of flow cytometry for measurements of nucleic acids, chromatin, and DNA and cover the cytometry of sperm and the cytopathic effects of viruses.

Patricia Stephens Due fought for justice during the height of the Civil Rights era. Her daughter, Tananarive, grew up deeply enmeshed in the values of a family committed to making right whatever they saw as wrong. Together, in alternating chapters, they have written a paean to the movement—its hardships, its nameless foot soldiers, and its achievements—and an incisive examination of the future of justice in this country. Their mother-daughter journey spanning two generations of struggles is an unforgettable story.

From the reviews of the 3rd Edition... "The standard reference for anyone interested in

understanding flow cytometry technology." American Journal of Clinical Oncology "...one of the most valuable of its genre and...addressed to a wide audience?written in such an attractive way, being both informative and stimulating." Trends in Cell Biology This reference explains the science and discusses the vast biomedical applications of quantitative analytical cytology using laser-activated detection and cell sorting. Now in its fourth edition, this text has been expanded to provide full coverage of the broad spectrum of applications in molecular biology and biotechnology today. New to this edition are chapters on automated analysis of array technologies, compensation, high-speed sorting, reporter molecules, and multiplex and apoptosis assays, along with fully updated and revised references and a list of suppliers.

Watching for Mermaids One World

As a young boy, rounding a bend in a remote Maine cove, Dave Roper stumbled upon two mermaids. No one believed him then. No one believes him now. But he kept watching and wondering: what is imagined and what is real? And while he watched and wondered during 50 years of waterborne life - as a boy, a teen, an adult, a father - what he pulled from the sea was not another mermaid, but the mystery, possibility, romance, joy, fear, and uncertainty that mermaids represent. Based on real experiences, these 30 stories take you on that journey. Once aboard you will: Share the fantasy world of a teenage solo cruising sailor as he meets his biggest challenge: a 22 year old woman. Enter the frenzied mind of a young man who falls overboard 300 miles from shore at night and looks death in the eye. Push down a few beers with Big Red, a legendary Mississippi River pilot, and experience the hard-scrabble world of river life. Climb aboard a 135 foot Mississippi River sternwheeler headed straight into a tornado, with 300 oblivious wedding guests on board. Join a young delivery skipper as he takes two very uncertain aspiring voyagers on world's shortest circumnavigation attempt... aboard a floating Winnebago. Probe deep up a saltwater creek to meet the reclusive King of Yurtdom and his technology-free world of Mongolian tribal huts. Experience a 50th wedding anniversary at sea and a coincidence right out of the Twilight Zone. Cheer for an octogenarian as his grandson kidnaps him from the clutches of a nursing home for one long last sail on his old wooden sloop. So fill your favorite mug, settle into that stuffed reading chair, poke the stove a few times, and dive into Dave Roper's new book, *Watching for Mermaids*.

100 Things to Do in Baltimore Before You Die explores the must-do and must-see parts of Charm City for visitors who have a few minutes or a few days and for those who are visiting for the first time and those who visit regularly. It digs a little deeper for residents who have been here for a decade or an entire lifetime, marking such unusual aspects of the usual as the revolutionary layout of the Contemporary Wing of the BMA that set as much a trend in design as Orioles Park at Camden Yards did for retro designs of baseball stadia. 100 Things to Do in Baltimore Before You Die explores the popularity of snoballs, Rheb's candies, and Natty Boh beer and fuels the continuing debate about where to find the best crab cake and pit beef. There's also a note about the best places to watch Inner Harbor July 4 and New Year's Eve fireworks.

This newly revised edition of the ground-breaking Artech House bestseller, SIP: Understanding the Session Initiation Protocol gives you a thorough and up-to-date understanding of this revolutionary protocol for call signaling and IP Telephony. The second edition includes brand new discussions on the use of SIP for wireless multimedia communications. It explains how SIP is powerful "rendezvous" protocol that leverages mobility and presence to allow users to communicate using different devices, modes, and services anywhere they are connected to the Internet. You learn why SIP has been chosen by the 3GPP (3rd Generation Partnership Program for wireless cell phones) as

the core signaling, presence, and instant messaging protocol.

"If you're thinking about buying your first sailboat and making it your own, you need to read this refreshingly honest tale." -- Ed Robinson, author of Poop, Booze & Bikinis Had I ever sailed? No. Did I think that mattered? No. I felt I had whatever grit and guile I needed to handle this silly sailing stuff. I parachuted with a sheet, drove a car that started with a screwdriver, swished with hydrogen peroxide. I rode horses, climbed rocks, leapt off cliffs. I spent summers in the sleeper of a big rig. I ate Malt-o-Meal. Surely these were excellent traits of a sailor. Surely I was salty enough. I fancied I was. Either way, we were going to find out. The time to go was now. All we needed was a boat. "Bilge? What bilge?" "Sink? It can't sink ... can it?" First he was in shock, then he was angry. Then he pretended like it never even happened, like he didn't just buy a magnificent chore-of-a-boat that needed to be stocked, cleaned, repaired and maintained. But we've all been there, and I knew one thing for sure. Helping our hapless buddy bring his new boat home across the Gulf of Mexico was going to make for one heck of a story and endless entertainment when the boat-as boats tend to do-started to give him plenty of grief.
