Unemployment Insurance Contributions Act, 4 of 2002 Springer Nature

Despite their importance in terms of employment and income generation, inshore fisheries have been a neglected area of study. The review of the common fisheries policy, especially in the light of the need to re-examine the derogation which reserves access to the inshore zone to coastal state vessels, provides an opportunity to redress the balance. With contributions from leading authorities on fisheries management, the book takes an in-depth look at seven European countries, examining the basis for the definition of inshore fisheries, evaluating their status, and describing the salient characteristics of their management. The national studies form the basis for cross-cultural analyses of the social organisation, cultural norms, economic objectives, and institutional structures of inshore fisheries in Europe. Finally, a number of key issues relating to the future of inshore fisheries management in a more integrated approach are examined. Overall the volume reaffirms the invaluable role played by inshore fisheries in the local and regional economies of Europe's complex coastline.

This contributed volume motivates and educates across fields about the major challenges in global health and the interdisciplinary strategies for solving them. Once the purview of public health, medicine, and nursing, global health is now an interdisciplinary endeavor that relies on expertise from anthropology to urban planning, economics to political science, geography to engineering. Scholars and practitioners in the health sciences are seeking knowledge from a wider array of fields while, simultaneously, students across majors have a growing interest in humanitarian issues and are pursuing knowledge and skills for impacting well-being across geographic and disciplinary borders. Using a highly practical approach and illustrative case studies, each chapter of this edited volume frames a particular problem and illustrates how interdisciplinary problem-solving can address the greatest challenges in global health today. In doing so, each chapter spurs critical and creative thinking about emergent and future problems. Topics explored among the chapters include: Transforming health and well-being for refugees and their communities Governing to deliver safe and affordable water The global crisis of antimicrobial resistance Low-tech, high-impact interventions to prevent neonatal mortality Communicating taboo health subjects Alternative housing delivery for slum upgrades Transforming Global Health: Interdisciplinary Challenges, Perspectives, and Strategies is a vital and timely compendium for any reader invested in improving global health equity. It will find an audience with researchers, practitioners, policymakers, and program implementers, as well as undergraduate and graduate students and faculty in the fields of global health, public health, and the health sciences.

WHO's Global Tuberculosis Report provides a comprehensive and up-to-date assessment of the TB epidemic and of progress in care and prevention at global, regional and country levels. This is done in the context of recommended global TB strategies and associated targets, and broader development goals. For the period 2016-2035, these are WHO's End TB Strategy and the United Nations' (UN) Sustainable Development Goals (SDGs), which share a common aim: to end the global TB epidemic. The main data sources for the report are annual rounds of global TB data collection implemented by WHO's Global TB Program since 1995 and databases maintained by other WHO departments, UNAIDS and the World Bank. In WHO's 2017 round of global TB data collection, 201 countries and territories that account for over 99% of the world's population and TB cases reported data.

Myocardial protection is regarded as one of the most important,

yet also most controversial aspects of cardiac surgery. There has been considerable improvement in myocardial protection strategies over recent years, utilising a variety of new approaches to treat cardiac diseases, and this text is intended to embrace the state of the art in this field. The book summarises the state of knowledge on all aspects of myocardial protection, including the latest in the treatment of cardiac diseases, robotics, pediatric surgery and the treatment of cardiac failure. Robotic surgery, valvular surgery, pediatric surgery and coronary surgery are all covered by renowned experts, producing a comprehensive, forward-looking view of the field of myocardial protection. This book should function to update physicians and surgeons interested in the field of cardiac surgery on the current state of knowledge on myocardial protection.

Nematology in South Africa: A View from the 21st Century Cambridge University Press

The embrace of socio-economic rights in South Africa has featured prominently in scholarship on constitution making, legal jurisprudence, and social mobilization. But the development has attracted critics who claim that this turn to rights has not generated social transformation in practice. This book sets out to assess one part of the puzzle and asks what has been the role and impact of socio-economic strategies used by civil society actors. Focusing on a range of socio-economic rights and national trends in law and political economy, the book's authors show how socio-economic rights have influenced the development of civil society discourse and action. The evidence suggests that some strategies have achieved material and political impact but this is conditional on the nature of the claim, degree of mobilization and alliance building, and underlying constraints.

 Contemporary Mexico faces a complex crisis of violence and insecurity with high levels of impunity and the lack of an effective

rule of law. These weaknesses in the rule of law are multidimensional and involve elements of institutional design, the specific content of the laws, particularities of political competition and a culture of legality in a country with severe social inequalities. This book discusses necessary institutional and legal reforms to develop the rule of law in a context of democratic, social and economic transformations. The chapters are organized to address: 1) The concept of the 'rule of law' and its measurement; 2) The fragility of the 'rule of law' in Mexico; 3) Structural reforms and implementation challenges; 4) Social exclusion and the culture of legality. The book addresses decision-makers, civil servants, consultants, scholars, lecturers, and students focusing on public policy, rule of law, sociology of law, legislative studies and practice, impunity, and areas of political philosophy. • The book presents an interdisciplinary and integrated approach for understanding the rule of law in Mexico, taking into account national particularities, the regional context and global comparisons. • Chapters discuss recent institutional reforms in Mexico from a critical point of view and explore possible next steps to achieve effective implementation. • This book addresses the links between a weak rule of law and social phenomena like insecurity, violence, corruption and democratic deficits.

This volume brings together papers presented at the 12th edition of Postgraduate Cypriot Archaeology (PoCA), an annual conference concerning the material culture of ancient, medieval and modern Cyprus, taking into account various aspects from different research projects conducted by researchers specialized in many fields of expertise. The contributions to this book cover multiple branches of study, including prehistory, archaeology, history, art history, religious history architecture and modern textiles studies, offering an interdisciplinary approach. Within this wide-ranging academic setting, a chronological span from the Early Cypriot period, that is to say from the 3rd millennium B.C. onwards, to modern times is covered. Contributions illuminate various aspects of Cypriot culture, such as funerary areas, settlement patterns, different types of artworks, and historical issues. Despite the great variety of archaeological and historical subjects, there is a special focus on Bronze Age Cypriot culture that helps to highlight a number of significant aspects of this important and formative period on the island of Aphrodite.

This unique book contains not only a comprehensive up-to-date summary of the achievements made in all areas of Nematology in South Africa over more than half a century, but it also combines this rather technical part with an insiders narrative of how Nematology started and developed. It also demonstrates how the South African community of nematologists gradually adapted to major changes in agriculture. These were due to a major political shift followed by socio-economic changes and this in an often challenging natural environment. At the same time this book is conceived as a useful source for young scientists to provide them with practical knowledge and critical insight in the field of

Nematology. The information given is based primarily on research conducted by nematologists in South Africa. Most of this research was aimed at finding workable solutions for nematological problems confronted by both large-scale commercial producers and smallholding farmers. During a period when funding for scientific research is becoming increasingly scarce, the future demand and quest for practical solutions by applied research will only increase.
