In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to "rekindle the belief in the vast capacity of underachieving urban students," and offers strategies to help educators inspire intellectual performance. Jackson proposes that a

paradigm shift towards a focus on strengths will reinvigorate educators' passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, The influence of new technologies, and language preferences of students.

For Kylene Beers, the question of what to do when kids can't read surfaced in 1979 when she met and began teaching a boy named George. When George's parents asked her to explain why he couldn't read and how she could help, Beers, a secondary certified English teacher with no background in reading, realized she had little to offer. That moment sent her on a twenty-three-year search for answers to the

question: How do we help middle and high schoolers who can't read? Now, she shares what she has learned and shows teachers how to help struggling readers with comprehension, vocabulary, fluency, word recognition, and motivation. Filled with student transcripts, detailed strategies, reproducible material, and extensive booklists, Beers' guide to teaching reading both instructs and inspires.
