The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

Human-Machine Reconfigurations New Age International

In this witty, often terrifying work of cultural criticism, the author of *Amusing Ourselves to Death* chronicles our transformation into a Technopoly: a society that no longer merely uses technology as a support system but instead is shaped by it—with radical consequences for the meanings of politics, art, education, intelligence, and truth.

Decolonizing Methodologies Crowood
Whether playing at defending their own

castle or simply chucking pumpkins over a fence, wannabe marauders and tinkerers will become fast acquainted with Ludgar, the War Wolf, Ill Neighbor, Cabulus, and the Wild Donkey—ancient artillery devices known commonly as catapults. Building these simple yet sophisticated machines introduces fundamentals of math and physics using levers, force, torsion, tension, and traction. Instructions and diagrams illustrate how to build seven authentic working model catapults, including an early Greek ballista, a Roman onager, and the apex of catapult technology, the English trebuchet. Additional projects include learning how to lash and make rope and how to construct and use a hand sling and a staff sling. The colorful history of siege warfare is explored

through the stories of Alexander the Great and his battle of Tyre; Saladin, Richard the Lionheart, and the Third Crusade; pirate-turned-soldier John Crabbe and his ship-mounted catapults; and Edward I of England and his battle against the Scots at Stirling Castle. Art of the Catapult Harper Collins

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life -

emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

Ellen DeGeneres's winning, upbeat candor has made her show one of the most popular, resilient, and honored daytime shows on the air, and her life makes for great (and very funny) reading. Relatable, her first stand-up special in 15 years, airs on Netflix

beginning December 18, 2018. "I've experienced a whole lot the last few years and I have a lot to share. So I hope that you'll take a moment to sit back, relax and enjoy the words I've put together for you in this book. I think you'll find I've left no stone unturned, no door unopened, no window unbroken, no rug unvacuumed, no ivories untickled. What I'm saying is, let us begin, shall we?" Seriously... I'm Kidding is a lively, hilarious, and often sweetly poignant look at the life of the much-loved entertainer as she opens up about her personal life, her talk show, and more.

Essays and reflections from one of the twentieth century's most original cultural critics, with an introduction by Hannah Arendt. Walter Benjamin was an icon of criticism, renowned for his insight on art, literature, and philosophy. This volume includes his views on Kafka, with whom he felt a close personal affinity; his studies on Baudelaire and Proust; and his essays on Leskov and Brecht's epic theater. Illuminations also includes his penetrating study "The Work of Art in the Age of Mechanical Reproduction," an

enlightening discussion of translation as a literary mode; and his theses on the philosophy of history. Hannah Arendt selected the essays for this volume and introduces them with a classic essay about Benjamin's life in a dark historical era. Leon Wieseltier's preface explores Benjamin's continued relevance for our times. Walter Benjamin (1892-1940) was a German-Jewish Marxist literary critic, essayist, translator, and philosopher. He was at times associated with the Frankfurt School of critical theory and was also greatly inspired by the Marxism of Bertolt Brecht and Jewish mysticism as presented by Gershom Scholem.

Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's *The Fault in Our Stars*, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a

fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

A classic he-said-she-said romantic comedy! This updated anniversary edition offers story-behind-the-story

revelations from author Wendelin Van Draanen. The first time she saw him, she flipped. The first time he saw her, he ran. That was the second grade, but not much has changed by the seventh. Juli says: "My Bryce. Still walking around with my first kiss." He says: "It's been six years of strategic avoidance and social discomfort." But in the eighth grade everything gets turned upside down: just as Bryce is thinking that there's maybe more to Juli than meets the eye, she's thinking that he's not quite all he seemed. This is a classic romantic comedy of errors told in alternating chapters by two fresh, funny voices. The updated anniversary edition contains 32 pages of extra backmatter: essays from Wendelin Van Draanen on her sources of inspiration, on the making

of the movie of Flipped, on why she'll never write a sequel, and a selection of the amazing fan mail she's received. Awards and accolades for Flipped: SLJ Top 100 Children's Novels of all time IRA-CBC Children's Choice IRA Teacher's Choice Honor winner, Judy Lopez Memorial Award/WNBA Winner of the California Young Reader Medal "We flipped over this fantastic book, its gutsy girl Juli and its wise, wonderful ending." — The Chicago Tribune "Van Draanen has another winner in this eighth-grade 'he-said, she-said' romance. A fast, funny, egg-cellent winner." — SLJ, Starred review "With a charismatic leading lady kids will flip over, a compelling dynamic between the two narrators and a resonant ending, this novel is a great deal larger than the sum

of its parts." —Publishers Weekly, Starred review

Rock Slope Engineering covers the investigation, design, excavation and remediation of man-made rock cuts and natural slopes, primarily for civil engineering applications. It presents design information on structural geology,

shear strength of rock and ground water, including weathered rock. Slope design methods are discussed for planar, wedge, circular and toppling failures, including seismic design and numerical analysis. Information is also provided on blasting, slope stabilization, movement monitoring and civil engineering applications. This fifth edition has been extensively up-dated, with new chapters on weathered rock, including shear strength in relation to weathering grades, and seismic design of rock slopes for pseudo-static stability and Newmark displacement. It now includes the use of remote sensing techniques such as LiDAR to monitor slope movement and collect structural geology data. The chapter on numerical analysis has been revised with emphasis on civil

applications. The book is written for practitioners working in the fields of transportation, energy and industrial development, and undergraduate and graduate level courses in geological engineering.

'A landmark in the process of

decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this

bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.
