The Andromeda Strain Lulu.com

U.S. Air Force Major George Filer belongs to the generation of pilots and airmen who first became aware of the strange aircraft showing up in the Earth's atmosphere after World War II. These men - military professionals who flew planes, commanded ships, served as radar operators and air traffic controllers at air fields around the world - began to whisper amongst themselves about encounters with suspected extraterrestrial aircraft. During secret debriefings at U.S. bases, pilots and air crew told their commanders of seeing strange lights at night and in the daylight, groups of saucer- or cigar-shaped craft that easily paced them just a few yards off their plane's wingtip. Award-winning investigative reporter John Guerra spent four years interviewing Filer, a decorated intelligence officer. From objects in the skies over Cold War Europe to a UFO overflight during the Cuban Missile Crisis to strange lights over the DMZ during the Tet Offensive, Filer leaves nothing out about his Air Force UFO encounters, providing Guerra all the amazing details of his six decades investigating extraterrestrials and their craft. Filer's most memorable case - the shooting of an alien at Fort Dix Army Base in 1978 - is fully recounted for the first time in this book. Filer - who readers have seen on countless UFO documentaries - is also a member of the Disclosure Project, the famous panel of military experts, astronauts, and scientists that urges the U.S. government to release all it knows about UFOs to the public. Then, in the fall of 2017, the Pentagon released the F-18 gun camera footage of what can only be described as an extraterrestrial vehicle outperforming U.S. Navy fighters off San Diego. For the first time, after decades of denying what its intelligence officers, pilots, base commanders and air traffic control personnel know to be true, the military finally admitted to what Filer describes in this incredible book.

The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry

had prepared him for the otherworldly accounts of a cross-section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and interviews with his family and closest associates, The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.
