Teach Your Kids to  
Code is a parent's and

teacher's guide to teaching kids basic programming and problem solving using Python, the powerful language used in college courses and by tech companies like Google and IBM. Step-by-step explanations will have kids learning computational thinking right away, while visual and game-oriented examples hold their attention. Friendly introductions to fundamental programming concepts such as variables, loops, and functions will help even the youngest programmers build the skills they need to make their own cool games and applications. Whether you've been coding for years or have never programmed anything at all, Teach Your Kids to Code will help you

show your young programmer how to:

- Explore geometry by drawing colorful shapes with Turtle graphics
- Write programs to encode and decode messages, play Rock-Paper-Scissors, and calculate how tall someone is in Ping-Pong balls
- Create fun, playable games like War, Yahtzee, and Pong
- Add interactivity, animation, and sound to their apps

Teach Your Kids to Code is the perfect companion to any introductory programming class or after-school meet-up, or simply your educational efforts at home. Spend some fun, productive afternoons at the computer with your kids—you can all learn something!

Celebrate real-life  
heroes in the US  
Marine Corps with this  
early introduction  
board book series to  
the US military  
branches. The Mini  
Military series focuses

on introducing young readers to the various branches of the US military. Lil' Marine highlights what it's like to be in the US Marine Corps, focusing on uniforms, bases, and parachutes, and introducing toddlers to military vehicles, such as the amphibious assault vehicles and aircraft. Perfect for military families, those with veterans in their family, or for anyone looking to expose their youngest readers to parts of American society, this book and the series is sure to inspire and celebrate our brave service men and women.

**Civil Rights Reader : Documents, Speeches, and Firsthand Accounts from the Black Freedom Struggle, 1954-1990** Springer

The 7th Edition of Global Marketing Management prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more "multilateral." Suitable for all business majors, the text encourages students to learn how marketing managers work across business functions for effective corporate performance on a global basis and achievement of overall corporate goals. Global Marketing Management brings timely coverage in

various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

Global Education

From the award-winning master of new wave horror films comes a mesmerizing new story of the strange and the unexpected. Based on David Cronenberg's screenplay, starring Jennifer Jason Leigh and Willem Dafoe, this is the graphic novel of the movie eXistenZ, drawn by talented graphic artist Sean Scoffield. The story revolves around eXistenZ, a virtual reality game of wild and unpredictable fantasy invented by the gaming goddess,

Allegra Geller. Using biotechnic adaptations, her new game is plugged directly into each player's spinal cord. Because the gaming pod has access to the memories, anxieties and preoccupations of its players, the direction each game takes depends entirely on who's playing. The game is so realistic that players often cannot tell which dimension they are inhabiting. While gaming devices plug in at the unveiling of eXistenZ, an assassin tries to kill Allegra Geller with a strange but deadly gristle gun made of human flesh that fires human teeth. In the confusion, Allegra is rescued by bodyguard Ted Pikul, and so begins an adventure in which

nothing is what it seems and rival guerrilla factions fight and kill for who will control the dangerously intriguing game of eXistenZ. At stake is the very notion of what we know as the real world. In this disturbingly labyrinthine world of morphing realities, master fantasist David Cronenberg holds us spellbound as we weave toward the unexpected climactic ending to this tale about the fragility of reality.

This liturgical resource will help guide pastors and other church workers as they help church members through the bereavement process. The Presbyterian Supplemental Liturgical Resource (SLT) series includes liturgies that were used on a trial basis in preparation for the development of the Book of Common Worship. Though superseded by the Book of Common Worship, SLR resources remain valuable, both for the variety of liturgical texts they contain and for the commentary on the text, which contains rich historical, theological, and practical background.

This monograph provides an international perspective on pit

lakes in post-mining landscapes, including the problem of geogenic acidification. Much has been learned during the last decade through research and practical experience on how to mitigate or remediate the environmental problems of acidic pit lakes. In the first part of the book, general scientific issues are presented in 21 contributions from the fields of geo-environmental science, water chemistry, lake physics, lake modeling, and on the peculiar biological features that occur in the extreme habitats of acidic pit lakes. Another chapter provides an overview of methods currently used to remediate acidic pit lakes and treat outflowing acidic water. The second part

of the book is a collection of regional surveys of pit lake problems from three European countries and Australia, and case studies of various individual representative lakes. A final case study provides an innovative approach to assessing the economic value of new pit lakes and balancing the costs and benefits, a valuable tool for decision makers.

Theoretical and Practical No Starch Press

Examines the background of the Civil Rights movement

Female Football Players and Fans Running Press Kids

World events in recent years have led observers, particularly since late 2013, to conclude that the

international security environment in recent years has undergone a shift from the post-Cold War era that began in the late 1980s and early 1990s, also sometimes known as the unipolar moment (with the United States as the unipolar power), to a new and different situation that features, among other things, renewed great power competition with China and Russia and challenges by these two countries and others to elements of the U.S.-led international order that has operated since World War II. The shift in the international security environment has become a major factor in the debate over future U.S. defense spending levels, and has led to new or renewed

emphasis on the following in discussions of U.S. defense strategy, plans, and programs: grand strategy and geopolitics as part of the context for discussing U.S. defense budgets, plans, and programs; U.S. and NATO military capabilities in Europe; capabilities for countering so-called hybrid warfare and gray-zone tactics employed by countries such as Russia and China; capabilities for conducting so-called high-end warfare (i.e., large-scale, high-intensity, technologically sophisticated warfare) against countries such as China and Russia; maintaining U.S. technological superiority in conventional weapons;

nuclear weapons and nuclear deterrence; speed of weapon system development and deployment as a measure of merit in defense acquisition policy; and minimizing reliance in U.S. military systems on components and materials from Russia and China.

*A Figure in Hiding*  
Routledge

This volume draws upon social science and historical approaches to provide insights into the world of women's football and female fans. It gives an in-depth analysis of the development of the women's game in different European countries and examines the experiences of female fans. An overview about women's football

in Europe shows the rise and development of the game and the increasing inclusion of girls and women in football and fan communities. To date, there has been a lack of research on female participation in football, but drawing on research studies from various European countries, the volume explores a range of issues, including how girls and women become football fans and players, how women combine football with their everyday lives, and how they may encounter stereotypes and barriers when they challenge male dominance by entering this traditionally male sport. This collection will be of interest to students and scholars in a range of fields,

including sports sociology, sport sciences, gender studies, leisure studies, women's studies as well as fandom and cultural studies.

*The Virgin Asanas*

Taylor & Francis

They say monotony is the enemy of monogamy. Mike

Rivers was a self-confessed geek and there was nothing monotonous about his life after he met her. He was a computer nerd who knew nothing about women or much about life away from his keyboard. Then he met Bunny and thus began his lessons about women and about sex and about love. Three things of which he had zero knowledge. Mike innocently entered into a world he had only read and dreamed

about. A world of sex, sex and more sex. Bunny told him there was a vast difference between love and fucking and that he shouldn't confuse the two. Luckily he was a quick study and Bunny was a patient teacher. Mike tell the story of how he entered into a family of hedonists and came to love it and Bunny's odd family. Mike listened intently as Bunny tells him about her life before they met. This is a shooter's yarn so of course there is interracial sex. There is plenty of one on one, two on one and more on one. There is also some girl on girl sex.

A Prize Poem  
Westminster John Knox Press  
The term ecovention (ecology+invention) describes artist-

initiated projects that physically transform an ecology. Featured in this dense book is a 50-year survey of this influential movement. From Joseph Beuys to Buster Simpson and from the U.S. to Kenya, projects are clearly discussed and illustrated. A refreshing look into how art and science can join forces to create a healthier and more meaningful world.

The New Century Italian Renaissance Encyclopedia  
Contemporary Arts Center

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by

hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing

specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any

size • Split, merge, watermark, and encrypt PDFs • Send email responses and text notifications • Fill out online forms Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python*, 2nd Edition.

#### Acidic Pit Lakes

Springer Science & Business Media  
In 2014, the author took an extended leave

of absence from her place of employment to walk both the Camino de Santiago and the Camino Finisterre with her husband, Bruce. In this memoir, she courageously, honestly and with humor tells of the pain, fears, anxieties, challenges, fun, and friendships she encountered along the way. She comes to a place of life transformation, where she is no longer prepared to live a highly stressed life. Her journey speaks to the many people struggling to juggle the complex demands that a contemporary life requires.

Ecovention FreeFall Press

Affective Health and Masculinities in South Africa explores how different masculinities

modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after

colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and

masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

This book is great for electric bassists who have learned the basics and are ready to take the next step.

Beginning with a brief review of reading

standard music notation and TAB, this book takes you further into using scales to build bass lines, techniques such as slap & pop, string muting, and walking bass lines. You'll be introduced to ideas such as modes, tetrachords, passing tones and varying rhythmic activity.

Author David

Overthrow keeps

things fun and interesting without

sacrificing any important details. A

must for any serious bass players.
