BERG FELIPE

Schwartzs Current Practice of General Surgery (EBOOK) Routledge
 This volume offers a European overview of the management of religious diversity in prisons and provides readers with rich empirical material and a comparative perspective. The chapters combine both legal and sociological approaches. Coverage for each country includes historical background, current penitentiary organization, and recent changes or trends. In their exploration of legal aspects, the contributors look at such factors as the status of prison chaplains and regulations concerning religious practice and religious freedom. These include meals, prayers, and visits. The sociological analysis examines religious discrimination in prison, church-prison relations, conversion and proselytism, and more. The European coverage includes countries for which such information is seldom available. The book offers readers a better understanding of governance of religion in prisons. This text appeals to students, researchers and professionals in the field.
Management of Complications of Cosmetic Procedures Springer
 Covering a wide range of topics on safety, reliability and risk management, the present publication will be of interest to academics and professionals working in a wide range of scientific, industrial and governmental sectors, including: Aeronautics and Aerospace; Chemical and Process Industry; Civil Engineering; Critical Infrastructures; Energy; Information Technology and Telecommunications; Land Transportation; Manufacturing; Maritime Transportation; Mechanical Engineering; Natural Hazards; Nuclear Industry; Offshore Industry; Policy Making and Public Planning.
Night with a Perfect Stranger Springer Nature
 This book constitutes the refereed proceedings of the 28th International Conference on Computer Safety, Reliability, and Security, SAFECOMP 2008, held in Hamburg, Germany, in September 2009. The 25 full papers presented together with two invited talks were carefully reviewed and selected from 72 submissions. The papers are organized in topical sections on medical systems, industrial experience, security risk analysis, safety guidelines, automotive, aerospace, verification, validation, test, fault tolerance, dependability.
Southern European Welfare States Elsevier
 This book brings together internationally prominent scholars renowned for their work on post-Soviet republics, as well as outstanding emerging scholars native of Central Asia in order to discuss the state of education in the Central Asian Republics of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Drawing on their individual contexts and research,

the authors offer analyses and critiques of some of the social, political, and economic issues in education in their respective countries, and some insights about how local actions engage with the challenges and problems, as well as with the possibilities and opportunities they face. Since gaining their independence in 1991, the five republics of Central Asia have been undergoing some enormous political, social, linguistic, cultural, and economic changes, even as we write. This collection shows that researchers are increasingly interested in exploring the development of education in this part of the world. In these countries, education plays a significant role in transitioning from centrally planned to market economies and is seen as the key resource to facilitate entry into the global competitiveness sphere. This book will be of particular interest to educators, researchers, and policy makers engaged in research or with a particular interest in curricula, and education systems and reforms, and to undergraduate and graduate students studying and researching education in Central Asia or in other post-Soviet contexts.
CRC Standard Mathematical Tables and Formulae, 32nd Edition Createspace Independent Publishing Platform
 The standard-setting reference in medical toxicology—trusted as the leading evidencebased resource for poison emergencies A Doody's Core Title for 2017! For decades, one name has been synonymous with the most respected, rigorous perspectives on medical toxicology and the treatment of poisoned and overdosed patients: Goldfrank's Toxicologic Emergencies. Presented in full color, Goldfrank's delivers essential, patientcentered coverage of every aspect of poison management. The editors and authors are recognized as preeminent scholars in their specialties and provide unmatched coverage of all aspects of toxicologic emergencies, from pharmacology and clinical presentation to cutting-edge treatment strategies. Goldfrank's Toxicologic Emergencies, Tenth Edition begins with an examination of medical toxicology principles and techniques. It then reviews the biochemical, molecular, and pathophysiologic basis of toxicology, followed by an intense focus on toxicologic principles related to special patient populations. Features Case studies enhance your understanding of the clinical application of the text material Practical focus on the pathophysiologic basis of medical toxicology The Antidotes in Depth sections delivers the expertise of toxicologists across the world as they present treatments for critically ill poisoned and overdosed patients and allow you to easily identify key issues relating to the use of complex and often unfamiliar therapies The principles of risk management, medicolegal decision making, patient safety, post mortem toxicology and the assessment of ethanol induced impairment described in chapters and Special Considerations emphasize the interface between medical toxicology, the law, and quality care

Monster Anthropology in Australasia and Beyond Springer Science & Business Media

This edited volume presents basic principles as well as advanced concepts of the computational modeling of steering systems. Moreover, the book includes the components and functionalities of modern steering system, which are presented comprehensively and in a practical way. The book is written by more than 15 leading experts from the automotive industry and its components suppliers. The target audience primarily comprises practicing engineers, developers, researchers as well as graduate students who want to specialize in this field.

Critical Information Infrastructures Security Springer Nature
 The demand for cosmetic procedures is increasing worldwide. This book presents all the potential side-effects and complications of the most frequently used procedures in aesthetic dermatology and provides sound practical advice on their management. It will be helpful not only to beginners but also to experienced dermatologists who want to start performing new procedures. The text is fully illustrated and very simple to consult. For each procedure, the book discusses both common and uncommon side-effects and complications, provides tips on how to avoid them, and explains clearly how they are best treated.

Education in Central Asia Springer Nature
 Offering a dialogue between anthropology and literature, culture, and media, this book presents fine-grained ethnographic vignettes of monsters dwelling in the contemporary world. These monsters hail from Aboriginal Australia, the Pacific, Asia, and Europe, and their presence is inextricably intertwined with the lives of those they haunt.

Dependable Computing - EDCC 2020 Workshops CRC Press
 This paperback edition of the first of the twelve volumes of A Treatise of Legal Philosophy and General Jurisprudence, serves as an introduction to the first-ever multivolume treatment of all important issues in legal philosophy and general jurisprudence, consisting of a five-volume theoretical part and a six-volume historical part. The theoretical part covers the main topics of contemporary debate. The historical volumes trace the development of legal thought from ancient Greek times through the twentieth century. All volumes are edited by the renowned theorist Enrico Pattaro.

The Sweetest Oblivion Springer Nature
 Human errors, as well as deliberate sabotage, pose a considerable danger to passengers riding on the modern railways and have created disastrous consequences. To protect civilians against both intentional and unintentional threats, rail transportation has become increasingly automated. Railway Safety, Reliability, and Security: Technologies and Systems Engineering provides engineering students and professionals with

a collection of state-of-the-art methodological and technological notions to support the development and certification of "real-time safety-critical" railway control systems, as well as the protection of rail transportation infrastructures.

Safety Critical Systems Handbook Routledge

This proceedings volume explores the latest advances in transport and logistics, while also discussing the applications of modern information technologies, telecommunications, electronics, and prospective research methods and analyzing their impacts on society and the environment, which in turn determine the future development of these technologies. The book is intended for a broad readership, including transport and logistics business planners and technical experts, leveraging industry knowledge and facilitating technology adoption in promising business regions and transit corridors such as Ukraine, Kazakhstan, and others. The authors, who include policy planners and crafters as well as education and training professionals, address various types of intermodal transport such as rail, road, maritime, air, etc.

Railway Safety, Reliability, and Security: Technologies and Systems Engineering Springer Nature

The safety case (SC) is one of the railway industry's most important deliverables for creating confidence in their systems. This is the first book on how to write an SC, based on the standard EN 50129:2003. Experience has shown that preparing and understanding an SC is difficult and time consuming, and as such the book provides insights that enhance the training for writing an SC. The book discusses both "regular" safety cases and agile safety cases, which avoid too much documentation, improve communication between the stakeholders, allow quicker approval of the system, and which are important in the light of rapidly changing technology. In addition, it discusses the necessity of frequently updating software due to market requirements, changes in requirements and increased cyber-security threats. After a general introduction to SCs and agile thinking in chapter 1, chapter 2 describes the majority of the roles that are relevant when developing railway-signaling systems. Next, chapter 3 provides information related to the assessment of signaling systems, to certifications based on IEC 61508 and to the authorization of signaling systems. Chapter 4 then explains how an agile safety plan satisfying the requirements given in EN 50126-1:1999 can be developed, while chapter 5 provides a brief introduction to safety case patterns and notations. Lastly, chapter 6 combines all this and describes how an (agile) SC can be developed and what it should include. To ensure that infrastructure managers, suppliers, consultants and others can take full advantage of the agile mind-set, the book includes concrete examples and presents relevant agile practices. Although the scope of the book is limited to signaling systems, the basic foundations for (agile) SCs are clearly described so that they can also be applied in other cases.

Religion and Prison: An Overview of Contemporary Europe Springer

This book introduces the Zynq MPSoC (Multi-Processor System-on-Chip), an embedded device from Xilinx. The Zynq MPSoC combines a sophisticated processing system that includes ARM Cortex-A53 applications and ARM Cortex-R5 real-time processors,

with FPGA programmable logic. As well as guiding the reader through the architecture of the device, design tools and methods are also covered in detail: both the conventional hardware/software co-design approach, and the newer software-defined methodology using Xilinx's SDx development environment. Featured aspects of Zynq MPSoC design include hardware and software development, multiprocessing, safety, security and platform management, and system booting. There are also special features on PYNQ, the Python-based framework for Zynq devices, and machine learning applications. This book should serve as a useful guide for those working with Zynq MPSoC, and equally as a reference for technical managers wishing to gain familiarity with the device and its associated design methodologies.

Bayesian Networks for Reliability Engineering Springer

Boost students' language arts vocabulary with easy-to-implement effective strategies! Sample lessons using each strategy are included for grade spans 1-2, 3-5, and 6-8 using vocabulary words from standards-based, content-specific units of study. Each strategy also includes suggestions for differentiating instruction. Each notebook includes 25 research-based strategies, differentiation suggestions for each strategy, assessment strategies, sample word lists including both specialized content and general academic words, and parent letters in both English and Spanish. Also included is a Teacher Resource CD with PDFs of resource pages, word lists, assessment pages, and parent letters. 280pp.

Goldfrank's Toxicologic Emergencies, Tenth Edition (ebook) McGraw Hill Professional

This book examines the problem of interoperability related to operating rules and gives an overview of the formal method approaches related to this subject. The book examines the interoperability issues concerning implementation of European Rail Traffic Management System (ERTMS) while crossing a boarder. It also looks at the implementing of the ERTMS and provides solutions regarding operating rules for ERTMS lines, using formal methods and simulation tools. The contributors will also discuss operating rule validation and formal methods for safety assessment.

Research Methods and Solutions to Current Transport Problems CRC Press

Exploring the ambiguous relationship between fandom and consumer culture, this book provides a critical overview of fans, fan cultures and fan experiences in relation to the broader experience and transformation economy. Fans and Fan Cultures discusses key theoretical concepts concerning celebrity, fandoms, subculture, consumerism and marketing through a range of examples in film, travel and tourism, football and music. With an emphasis on social media, and how various online platforms are utilised by brands, artists and fans, the authors explore how this type of communication often contributes to trivialising authentic expressions of cultural and social values and identities.

Development of Transport by Telematics CRC Press

With over 6,000 entries, CRC Standard Mathematical Tables and Formulae, 32nd Edition continues to provide essential formulas, tables, figures, and descriptions, including many diagrams, group

tables, and integrals not available online. This new edition incorporates important topics that are unfamiliar to some readers, such as visual proofs and sequences, and illustrates how mathematical information is interpreted. Material is presented in a multisectional format, with each section containing a valuable collection of fundamental tabular and expository reference material. New to the 32nd Edition A new chapter on Mathematical Formulae from the Sciences that contains the most important formulae from a variety of fields, including acoustics, astrophysics, epidemiology, finance, statistical mechanics, and thermodynamics New material on contingency tables, estimators, process capability, runs test, and sample sizes New material on cellular automata, knot theory, music, quaternions, and rational trigonometry Updated and more streamlined tables Retaining the successful format of previous editions, this comprehensive handbook remains an invaluable reference for professionals and students in mathematical and scientific fields.

Computer Safety, Reliability, and Security McGraw Hill Professional

In this first analytical monograph on the subject, George Katrougalos and Gabriella Lazaridis examine the social welfare state of the main four Southern European countries, Spain, Italy, Portugal and Greece. They conduct an overall system analysis of the welfare state in Southern Europe which challenges the prevalent Ferrera model. Additionally, they present a detailed outlook of policies adopted in the fields of employment, migration, health, social security, pensions and gender-family issues.

Learning to Serve Springer

This book constitutes refereed proceedings of the Workshops of the 16th European Dependable Computing Conference, EDCC: 1st Workshop on Artificial Intelligence for Railways, AI4RAILS 2020, 1st Workshop on Dynamic Risk Management for Autonomous Systems, DREAMS 2020, 2nd Workshop on Dependable Solutions for Intelligent Electricity Distribution Grids, DSOGRI 2020, 12th Workshop on Software Engineering for Resilient Systems, SERENE 2020, held in September 2020. Due to the COVID-19 pandemic the workshops were held virtually. The 12 full papers and 4 short papers were thoroughly reviewed and selected from 35 submissions. The workshop papers complement the main conference topics by addressing dependability or security issues in specific application domains or by focussing in specialized topics, such as system resilience.

Empire of Capital Springer

Service learning, as defined by the editors, is the generation of knowledge that is of benefit to the community as a whole. This seventh volume in the Outreach Scholarship book series contributes a unique discussion of how service learning functions as a critical cornerstone of outreach scholarship. The sections and chapters of this book marshal evidence in support of the idea that undergraduate service learning, infused throughout the curriculum and coupled with outreach scholarship, is an integral means through which higher education can engage people and institutions of the communities of this nation in a manner that perpetuate civil society. The editors, through this series of models of service learning, make a powerful argument for the necessity of "engaged institutions".
