Do you have what it takes to succeed in any situation? According to a retired commander who ran training for Navy SEALs, true optimal performance goes beyond just skill. It's all about THE ATTRIBUTES. "Diviney's incredible book explains why some people thrive—even when things get hard."—Charles Duhigg, New York Times bestselling author of *The Power of Habit* During his twenty years as a Navy officer and SEAL, Rich Diviney was intimately involved in a specialized SEAL selection process, which whittled a group of hundreds of extraordinary candidates down to a handful of the most elite performers. Diviney was often surprised by which candidates washed out and which succeeded. Some could have all the right skills and still fail, while others he

might have initially dismissed would prove to be top performers. The seemingly objective criteria weren't telling him what he most needed to know: Who would succeed in one of the world's toughest military assignments? It is similarly hard to predict success in the real world. It happens often enough that underdog students accomplish exceptional achievements while highly skilled, motivated employees fail to meet expectations. Dark-horse companies pull away from the pack while dream teams flush with talent and capital go under. In working with and selecting top special operators for decades, Diviney saw that beneath obvious skills are hidden drivers of performance, surprising core attributes—including cunning, adaptability, courage, even narcissism—that determine how resilient or perseverant we are, how situationally aware and how conscientious. These attributes explain how we perform as individuals and as part of a team. The same methodology that Diviney used in the military can be applied by anyone in their personal and professional lives, and understanding these attributes can allow readers and their teams to perform optimally, at any time, in any situation. Diviney defines the core attributes in fresh and practical ways and shares stories from the military, business, sports, relationships, and even parenting to show how understanding your own attributes and those of the people around you can create optimal performance in all areas of your life.

Paleo Fitness Rodale

Created by the expert hosts of the popular Well-Fed Women Podcast, a step-by-step food and fitness plan for women, that teaches them how to improve their health by changing the quality—not the quantity—of the food they eat. To eat your way to better health, you don't need to limit your calorie intake, or cut out carbs or fat. You don't need to count "points." Better health doesn't come from limits. It comes from focusing on the quality of food that you eat—not the quantity. Instead of limiting your food intake you should be enriching it, argue Noelle Tarr and Stefani Ruper. The popular hosts of the Well-Fed Women Podcast want you to focus on the good things you eat. They want to make sure you get enough food so that your body has the fuel and nourishment it needs to support a healthy, long, and energetic life. Noelle and Stefani know about eating for health firsthand. They, too, struggled with confusing and frustrating medical conditions, including infertility, digestive issues, acne, polycystic ovarian syndrome, hypothyroidism, and anemia. They discovered that the secret to improving wellness was actually more food: they ditched the diet books, calorie counters, and scales, and started eating their way to health. In *Coconuts and Kettlebells*, you'll eat at least 2,000 calories a day thanks to a delicious selection of dishes that are all gluten-free, grain-free, and paleo. Within those 2,000 calories, setting a minimum intakes of protein, fat, and carbohydrates instead of the usual maximums will ensure that your diet is full of nutrients, while also providing flexibility to enjoy what you're eating. Noelle and Stefani identify the Big Four foods—grains, dairy, vegetable oils, and refined sugar—that cause the most health problems among women. While many diets require you to eliminate these foods entirely, *Coconuts and Kettlebells* provides an easy-to-follow step-by-step program to test these foods and determine which you need to cut back on—and which you don't—to feel better. To help you discover how your body responds to the Big Four, you'll choose from two simple 4-week meal plans: one for the Butter Lover (people who tend to feel more satisfied eating higher ratios of fats) and one for the Bread Lover (people who tend to feel more satisfied eating higher ratios of carbs). Each meal plan comes with a weekly shopping list, a guide to kitchen tools and equipment, and instructions on how to batch cook, meal prep, and stock the pantry. In addition, you'll have access to over 75 gluten-free and paleo-friendly flavor-packed recipes (free of the Big Four foods) for every meal of the day, including: Coconut Chai Latte Kale and Bacon Breakfast Skillet Apple Pie Smoothie Thai Coconut Curry Shrimp Moroccan Lamb Meatballs Shrimp and Cabbage Stir Fry Parsnip and Carrot Fries Mango Jalapeno Salsa Chocolate Cherry Energy Bites Lemon Raspberry Mini Cheesecakes To go along with the meal plans, Noelle and Stefani also provide three 4-week fitness plans tailored to three experience levels: beginner, intermediate, and advanced. All of the workouts can be done anywhere—at your home or on the road—and take no more than thirty minutes. A comprehensive whole body program to get and keep you healthy inside and out, *Coconuts and Kettlebells* provides the knowledge and tools you need to heal in a way that is effortless, rewarding, confidence-boosting, and everlasting. *Coconuts and Kettlebells* is illustrated

with color photos throughout.

When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day

one. This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging - Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day. Lights Out is one wake-up call none of us can afford to miss.

While conventional medicine is limited to medication or even surgical fixes, Trescott and Alt introduce a complementary solution that focuses on seven key steps to recovery: inform, collaborate, nourish, rest, breathe, move, and connect. Each step demystifies the process to reclaim total mind and body health. With five autoimmune conditions between them, Trescott and Alt have achieved astounding results using the premises laid out in the book. *The Autoimmune Wellness Handbook* goes well beyond nutrition and provides the missing link so that you can get back to living a vibrant, healthy life.
