More than four million Palestinian refugees live in protracted exile across the Middle East. Taking a regional approach to Palestinian refugee exile and alienation across the Levant, this book proposes a new understanding of the spatial and political dimensions of refugee camps across the Middle East. Combining critical scholarship with ethnographic insight, the essays uncover host states' marginalisation of stateless refugees and shed light on new terminology on refugees, migration and diaspora studies. The impact on the refugee community is detailed in novel studies of refugee identity, memory and practice and new legal approaches to compensation and "right of return". The book opens a critical debate on key concepts and proposes a new understanding of the spatial and political dimensions of refugee camps, better understood as laboratories of Palestinian society and "state-in-making". This strong collection of original essays is an essential resource for scholars and students in refugee studies, forced migration, disaster studies, legal anthropology, urban studies, international law and Middle East history.

Start with Why - A Complete Summary Start with Why is a book

written by Simon Sinek. Someone may ask, what is so special about this book? In this book, Sinek discusses success, but not in the usual, "follow these steps to achieve anything you want," way. Sinek uses a different approach than readers tend to find in other literature of the same type. The very first premise that the author uses to lead us into his book is a premise that contains one simple word: why. Why do some people reach success while others do not? Why do some groups manage to team-up and endure challenges, thus succeeding, while others fail to do so? What is it that makes some people different from others when it comes to achieving success? The entire book revolves around that question word. But the interesting thing about it, which eventually leads to even more interesting conclusion, is that there is an answer to this "why." Sinek uses many examples from real life and from people he knew or had researched, and shows how they managed to succeed. By using these examples, the author shows his readers that if others can succeed, so can we. When it comes to practical answers to "why," the author invests significant effort in finding all the answers. Start with Why is an intriguing and fascinating read, which will surely make readers
