World Dictionaries in Print Routledge

The field of deaf studies, language, and education has grown dramatically over the past forty years. From work on the linguistics of sign language and parent-child interactions to analyses of school placement and the mapping of brain function in deaf individuals, research across a range of disciplines has greatly expanded not just our knowledge of deafness and the deaf, but also the very origins of language, social interaction, and thinking. In this updated edition of the landmark original volume, a range of international experts present a comprehensive overview of the field of deaf studies, language, and education. Written for students, practitioners, and researchers, *The Oxford Handbook of Deaf Studies, Language, and Education, Volume 1*, is a uniquely ambitious work that has altered both the theoretical and applied landscapes. Pairing practical information with detailed analyses of what works, why, and for whom—all while banishing the paternalism that once dogged the field—this first of two volumes features specially-commissioned, updated essays on topics including: language and language development, hearing and speech perception, education, literacy, cognition, and the complex cultural, social, and psychological issues associated with deaf and hard-of-hearing individuals. The range of these topics shows the current state of research and identifies the opportunities and challenges that lie ahead. Combining historical background, research, and strategies for teaching and service provision, the two-volume *Oxford Handbook of Deaf Studies, Language, and Education* stands as the benchmark reference

work in the field of deaf studies.

[Children and Young People Looked After?](#) Oxford University Press, USA

The connection between childhood and poetry runs deep. And yet, poetry written for children has been neglected by criticism and resists prevailing theories of children's literature. Drawing on Walter Ong's theory of orality and on Iain McGillChrist's work on brain function, this book develops a new theoretical framework for the study of children's poetry. From Tongue to Text argues that the poem is a multimodal form that exists in the borderlands between the world of experience and the world of language and between orality and literacy – places that children themselves inhabit. Engaging with a wide range of poetry from nursery rhymes and Christina Rossetti to Michael Rosen and Carol Ann Duffy, Debbie Pullinger demonstrates how these 'tactful' works are shaped by the dynamics of orality and textuality.

Access to Education for Children and Young People Red Globe Press

Despite a proliferation of legislative action in response to differential outcomes, the relative educational, employment and lifecourse disadvantages of individuals who have experienced the care system remains a pressing issue of widespread international concern. In Wales, a significant body of work has been produced on and with care-experienced children and young people. This edited collection attempts to highlight these valuable insights in a single volume, with contributions from well-established and early career scholars working in different traditions – including education, psychology, policy studies, sociology and social work – to provide a unique opportunity for reflection across disciplinary boundaries and shed new light on common problems and opportunities stimulated by research in the field of social care. The volume introduces a range of contexts and sites – including the home, the school, alternative educational institutions, contact centres, and the natural environment – and reflexively explores changes and continuities within the political and geographical landscape that constitutes Wales. Each chapter introduces insights, reflections and recommendations about the care system and its impacts, which will be useful for readers across geographical contexts who are concerned with improving the lives of children, young people and wider family networks.

Introduces you to the promises and problems of Charles Taylor's thought in major contemporary debates

Medieval Literature for Children Routledge

This book examines how literary texts can be incorporated into teaching practices in an EFL classroom. It takes a multi-faceted approach to how English language teaching and learning can best be developed through presentation and exploration of literary texts.

Children's Literature as Communication Frontiers Media SA

A unique study of lectionaries and graphic design as a site of biblical reception How artists portrayed the Bible in large canvas paintings is frequently the subject of scholarly exploration, yet the presentation of biblical texts in contemporary graphic designs has been largely ignored. In this book Amanda Dillon engages multimodal analysis, a method of semiotic discourse, to explore how visual composition, texture, color, directionality, framing, angle, representations, and interactions produce potential meanings for biblical graphic designs. Dillon focuses on the artworks of two American graphic designers—the woodcuts designed by Meinrad Craighead for the Roman Catholic Sunday Missal and Nicholas Markell's illustrations for the worship books of the Evangelical Lutheran Church in America—to present the merits of multimodal analysis for biblical reception history.

Introduction to Bilingualism John Wiley & Sons

The Routledge Encyclopedia of Language Teaching and Learning is an authoritative reference dealing with all aspects of this increasingly important field of study. Offering a comprehensive range of articles on contemporary language teaching and its history, it has been produced specifically for language teaching professionals and as a reference work for academic studies at postgraduate level. In this new edition, every single entry has been reviewed and updated with reference to new developments and publications. Coverage has been expanded to reflect new technological, global and academic developments, with particular attention to areas such as online and distance learning, teacher and learner cognition, testing, assessment and evaluation, global English and teacher education. Themes and disciplines covered include: Methods and materials, including new technologies and materials development Contexts and concepts, such as mediation, risk-taking in language learning and intercomprehension Influential figures from the early days of language teaching to the contemporary Related disciplines, such as psychology, anthropology and corpus linguistics It covers the teaching of specific languages, including Japanese, Chinese, Arabic and African languages, as well as English, French, German and Spanish. There are thirty five overview articles dealing with issues such as communicative language teaching, early language learning, teacher education and syllabus and curriculum design. A further 160 entries focus on topics such as bilingualism, language laboratories and study abroad. Numerous shorter items examine language and cultural institutions, professional associations and acronyms. Multiple cross-references enable the user to browse

from one entry to another, and there are suggestions for further reading. Written by an international team of specialists, the Routledge Encyclopedia of Language Teaching and Learning is an invaluable resource and reference manual for anyone with a professional or academic interest in the subject.

Defining Construction: Insights into the Emergence and Generation of Linguistic Representations OUP Oxford

These practical ideas, suggestions and real-life experiences will help you to understand the differences and similarities of the literary experience for children through classic, modern and leading-edge narratives in both book and computer formats.

Literacy Teacher Educators: Preparing Teachers for a Changing World brings together the perspectives of 26 literacy/English teacher educators from four countries: Canada, U.S., UK, and Australia. In this unique text the contributors, of whom many are renowned experts in critical literacy and multiliteracies, provide readers with an overview of trends in literacy/English teacher education. The chapters begin with authors' personal stories and current research, giving readers insight into the personal and professional worlds of the contributors. Included in each chapter is a rich description of approaches to literacy instruction in teacher education. These exemplary teacher educators show in concrete detail how they are addressing our evolving understanding of literacy. This timely text, written in a highly engaging style, will be of value to teacher educators throughout the world. I have never read anything quite like this book. It contains explicit representations of the conceptual frames and work of distinguished literacy teacher educators at various stages in their careers, accounts that provide a strong counter-narrative to the mainstream discourse in policy and education, that fully embrace the uncertainties and complexities of practice." From the Forward by Susan L. Lytle, Professor Emerita of Education in the Graduate School of Education, University of Pennsylvania

Subject Catalog McGraw-Hill Education (UK)

'Developing Early Literacy presents an interesting range of literacy-related topics which address issues of current importance to early years practice and, in places, question current thinking.

There is an excellent balance of theoretical background and case study examples which would make this a relevant and practical text for both students and early years professionals.'- Mary-Louise Maynes, Lecturer in Early Childhood Studies, Bishop Grosseteste University Providing clear guidance on how to develop early literacy, this book offers support with the planning and teaching of this vital aspect of the curriculum using innovative and exciting methods. Linking theory with practice, topics covered include:

babies and very early communication the importance of role play corners outdoor learning and literacy how rhyme and repetition help to develop literacy teaching literacy to children who have English as an Additional Language (EAL) literacy and diversity using picture books to develop literacy supporting transitions different approaches to the teaching of phonics and early reading. Each chapter has learning objectives, case studies featuring younger and older children from the Birth to 8 age range, a summary and suggested Further Reading. This text is essential reading for those on Early Childhood Studies, Early Years, Primary PGCE and Early Years teacher education courses. Virginia Bower is Senior Lecturer at Canterbury Christ Church University.

The Oxford Handbook of Deaf Studies, Language, and Education Taylor & Francis

Explores the processes of monolingual language development in pre-school children. Following an overview of child bilingualism, this book looks at the influence of the child's family environment and the factors which predict the language use of the child.

Edinburgh Companion to Children's Literature Routledge
Language Learning provides an introduction to language development that differs from existing books in that it traces language and cognitive development (together with the associated debates) from babyhood, through the school years of middle childhood and adolescence, into adulthood and the world of work. Increasingly, the global trend is towards learning to speak, read and write more than one language. *Language Learning* is a comprehensive book that includes descriptions and

discussions of learning more than one language sequentially and simultaneously. The only book to look at language with a lifelong perspective, it is ideal as an introductory student text. Each chapter contains ideas and suggestions for students to follow-up and begin their own small scale investigations into language development.

Language Acquisition in a Bilingual Community Bloomsbury Publishing

This handbook provides a comprehensive survey of what is now known about psychological development, from birth to biological maturity, and it highlights how cultural, social, cognitive, neural, and molecular processes work together to yield human behavior and changes in human behavior.

Routledge Encyclopedia of Language Teaching and Learning SAGE

How did early modern English people write about themselves, and how do we listen to their voices four centuries later? The authors of *Early Modern English Lives: Autobiography and Self-Representation 1500-1660* argue that identity is depicted through complex, subtle, and often contradictory social interactions and literary forms. Diaries, letters, daily spiritual reckonings, household journals, travel journals, accounts of warfare, incidental meditations on the nature of time, death and self-reflection, as well as life stories themselves: these are just some of the texts that allow us to address the social and historical conditions that influenced early modern self-writing. The texts explored in *Early Modern English Lives* do not automatically speak to our familiar patterns of introspection and self-inquiry. Often formal, highly metaphorical and emotionally restrained, they are very different in both tone and purpose from the autobiographies that crowd bookshelves today. Does the lack of emotional description suggest that complex emotions themselves, in all the depth and variety that we now understand (and expect of) them, are a relatively modern phenomenon? This is one of the questions addressed by *Early Modern English Lives*. The authors bring to our attention the kinds of rhetorical and generic features of early modern self-representation that can help us to appreciate people living four hundred years ago as the complicated, composite figures they were: people whose expression of identity involved an elaborate interplay of roles and discourses, and for whom the notion of privacy itself was a wholly different phenomenon.
