race, class and gender. The text provides

a balanced approach to U.S. history,

considering the people, events and ideas

that have shaped the United States from

both the top down (politics, economics,

diplomacy) and bottom up (eyewitness

accounts, lived experience).

In this important book, Nicholas Hartlep

and Daniel Scott's detailed analyses on

both visual and historical representations

of Asian Americans in textbooks and

teacher manuals used in our elementary

and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. As Hartlep and Scott write. Asian Americans have once again been constructed as the “good minority” that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling “a single story” about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it “discourages others—even Asian-Americans themselves—from believing in the validity of their struggles” (Linshi, 2014, p. 1). *American Nation* Prentice Hall Never HIGHLIGHT a Book Again! This book demonstrates how colleges and universities have played a vital role during times of great crisis in American history, responding actively and helpfully to all the major challenges confronting their country. The colleges of the land became politicized repeatedly by such momentous developments as the American Revolution, the Civil War between the North and the South, the two vast global conflicts of the twentieth century, and America's controversial involvement in Southeast Asia. Campus life became intensely fractious during these difficult and turbulent periods. Violence sometimes accompanied the campus activism. While there were significant differences in the response of groups on the campuses - students and professors reacted differently, for example - to the crises of earlier times as compared to those in more recent years, there is an element of continuity. That thread of continuity from the Revolutionary era to Vietnam was the fact that time after time, the members of the academic communities sought to resolve the nation's crises constructively.

They rallied to the cause of colonial rights and, ultimately, political independence. They supported the aims of their embattled sections, North and South. They sought to influence their nation's responses to the global crises of the twentieth century. And they campaigned to extricate the nation from an increasingly costly military entanglement in Southeast Asia. In all five of these tests of national purpose, the colleges and universities, while not the ultimate decision makers, helped shape the eventual patterns of America's response in an important way.
