 CliffsNotes TExES Math 4-8 (115) and Math 7-12 (235) is the perfect way to study for Texas' middle school and high school math teacher certification tests. Becoming a certified middle school math teacher and high school math teacher in Texas means first passing the TExES Math 4-8 (115) teacher certification test for middle school teachers or the TExES Math 7-12 (235) teacher certification test for high school teachers. This professional teacher certification test is required for all teachers who want to teach math in a Texas middle or high school. Covering each test's six domains and individual competencies with in-depth subject reviews, this test-prep book also includes two model practice tests with answers and explanations for the Math 4-8 and two model practice tests with answers and explanations for the Math 7-12. Answer explanations detail why correct answers are correct, as well as what makes incorrect answer choices incorrect.

"Twenty-twenty hindsight" means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. "I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words." - Louise Heystek-Emerton: CEO Wordwise/Khuluma Awethu

X-Kit Literature Series: FET Great Gatsby Leckie & Leckie

"Where are you from?" An easy question for most to answer, but a very tough one for Third Culture Kids (TCKs). These children grow

up outside their parents' home cultures, neither belonging entirely to their home culture nor to their host culture. They face unique challenges in establishing their identity and a sense of belonging, especially when returning to their home country. An increasing number of Singaporean families are living overseas for various reasons, and their children are growing up as TCKs. On returning to Singapore, these Singaporean TCKs will have to cope with a variety of re-entry stresses when adjusting to Singapore culture, making new friends, and continuing their education in the Singapore education system. Many existing books about the TCK experience are written from the perspective of other cultures, chiefly the US. This book addresses some factors unique to the Singapore environment and provides Singaporean parents with suggestions to smooth their children's re-entry to Singapore. With experience drawn from the real-life experiences of the authors' children and others they know personally, this book will be helpful to families of TCKs through the whole process: preparing to leave Singapore, while overseas, and, especially, when they return.

X-kit FET Grade 12 MATHEMATICAL LITERACY Pearson South Africa

Spectrum Math for grade 6 keeps kids at the top of their math game using progressive practice, math in everyday settings, and tests to monitor progress. The math workbook covers multiplying and dividing decimals and fractions, complex measurements, and beginning algebra. A best-selling series for well over 15 years, Spectrum still leads the way because it works. It works for parents who want to give their child a leg up in math. It works for teachers who want their students to meet—and surpass—learning goals. And it works to help children build confidence and advance their skills. No matter what subject or grade, Spectrum provides thorough practice and focused instruction to support student success.

TEeS (143) Physics and Mathematics Grade 8-12 Study Guide X-kit FET Grade 12 MATHEMATICS

Postcolonial Polysystems: The Production and Reception of Translated Children's Literature in South Africa is an original and provocative contribution to the field of children's literature research and translation studies. It draws on a variety of methodologies to provide a perspective, both product- and process-oriented, on the ways in which translation contributes to the production of children's literature in South Africa, with a special interest in language and power, as well as post- and neocolonial hybridity. The book explores the forces that affect the use of translation in producing children's literature in various languages in South Africa, and shows how some of these forces precipitate in the selection, production and reception of translated children's books in Afrikaans and English. It breaks new ground in its interrogation of aspects of translation theory within the multilingual and postcolonial context of South Africa, as well as in its innovative experimental investigation of the reception of domesticating and foreignising strategies in translated picture books.
