### Pediatric Robotic Surgery Penguin

Laparoscopic and robotic approaches to colon, rectum and the small intestine have undergone radical change since the introduction of minimally invasive surgical techniques. At the beginning of this revolution, the most common anastomotic techniques have been extracorporeal. As a few surgeons became more familiar with minimally invasive suturing techniques, intracorporeal anastomosis became possible. However, the change from an extracorporeal approach has been slow to realization for the vast majority of surgeons. While there are multiple reasons for this slow adoption, the most common are perceived difficulty with suturing in a closed space, the feeling of lack of control, and the worry of increased infection in the abdomen. This book details the latest information in addressing and dispelling these fears. It provides a useful guide to techniques required to perform intracorporeal anastomoses both in laparoscopic and robotic surgery, and it shows the huge advantages to the patient, surgeon and to our health care system. Written by experts in the field, chapters serve as a definitive guide to the performance of intracorporeal techniques to all general and colon and rectal surgeons performing bowel resection both for benign and malignant disease. The chapters contain ample color photographs and videos describing each technique. Intracorporeal Anastomosis primarily focuses on laparoscopic and robotic techniques and contains the latest published data describing the advantages of using these minimally invasive surgical techniques.

The series Advances in Biomaterials provides a vehicle for the publication of proceedings of meetings on biomaterials which will grow into a valuable reference library. Biomaterials is that branch of biomedical engineering concerned with the materials aspects of medical devices. Any material, metal, ceramic, plastic or organic, brought into contact with the fluids, cells and tissues of the living body comes within the domain of biomaterials science. Included are surgical implant and dental materials, dressings, orthotics, prosthetics materials, and those used in extracorporeal circulation devices. Biomaterials scientists are concerned with the physical and chemical properties of materials and their suitability for a particular device. They are concerned with how these properties are altered by the biological environment and how the materials may affect the body. The subject spans the physical and life sciences.

Osteoporosis can be intimidating and inhibiting. The prospect that a simple fall could break your hip or wrist can make you watch every step you take. Fear can replace the freedom to do all the things you love. The two major risk factors for osteoporosis are being a woman and having passed through menopause. In the years after menopause, women can lose up to one-fifth of their bone mass. But men aren't immune to the disease. Two million American men have osteoporosis and one in four over age 50 will suffer an osteoporosis-related fracture. In *Osteoporosis: A guide to prevention and treatment*, Harvard Medical School doctors will show you the positive, proactive, and practical steps you can take to protect your bones now and in the years ahead. You will be alerted to red flags that signal you're at greater risk for a broken bone. You'll be warned about medications that hasten bone loss. And you'll find out if you should have your bone density checked — and which tests are the best. The report will show you the importance of getting calcium from food and vitamin D from sunlight. You'll learn about other bone-protective strategies, too, including specific exercise routines, and discover some surprising foods that help weaken bones. Osteoporosis is not inevitable. The good news is there's a lot you can do to shield your bones from this disease. And the sooner you act, the better off you — and your bones — will be.

In *THE SEAT OF THE SOUL*, Gary Zukav brilliantly set forth his concepts, explaining how the expansion of human perception beyond the five senses leads to a new understanding of

'authentic power'. Then, in SOUL STORIES, he revealed how such concepts as intuition, harmony, sharing and forgiveness actually express themselves in other people's lives. And now, in THE HEART OF THE SOUL, Zukav, together with his coauthor and spiritual partner, Linda Francis, takes the next important step in showing us how to actually apply these crucial concepts in our daily lives. Zukav reveals how true emotional awareness can transform the human experience. Although it is challenging and difficult, because it means becoming aware of suppressed pain, it is also enormously rewarding. But first the determination to explore every aspect of consciousness, and to cultivate those that contribute the most to life, must replace the desire to bury painful emotions. Ultimately emotional awareness can free us from the compulsions, fixations, obsessions and addictions that block our spiritual development - among them anger, workaholicism, perfectionism, obsessive eating, alcohol, drugs, sex - and allow us to live a fulfilling and meaningful life. THE HEART OF THE SOUL will be a revelation for readers - a soul tool with which we can forge a greater emotional awareness to enable us to use our emotions in the creation of authentic power. It is a book to read not once, but several times, for it is a life-changing work that can transform our lives for the better.

"After five years of groundbreaking research, Ori Brafman and Rod A. Beckstrom share some gripping stories. The Starfish and the Spider argues that organizations fall into two categories: traditional "spiders," which have a rigid hierarchy and top-down leadership, and revolutionary "starfish," which rely on the power of peer relationships. This book explores what happens when starfish take on spiders (such as the music industry vs. Napster, Kazaa, and the P2P services that followed). It reveals how established companies and institutions, from IBM to Intuit to the U.S. government, are also learning how to incorporate starfish principles to achieve success."--BOOK JACKET.

The era of left brain' dominance, with its emphasis on logical, linear, analytical and computer-like thinking, is on the way out. We're entering a new world in which right brain' qualities - inventiveness, empathy, meaning - will dominate. A stimulating wake-up call for the brain, *A Whole New Mind* urges us to re-examine our lives: how we think, how we feel and why we do what we do. And p

*Jihad vs. McWorld* is a groundbreaking work, an elegant and illuminating analysis of the central conflict of our times: consumerist capitalism versus religious and tribal fundamentalism. These diametrically opposed but strangely intertwined forces are tearing apart--and bringing together--the world as we know it, undermining democracy and the nation-state on which it depends. On the one hand, consumer capitalism on the global level is rapidly dissolving the social and economic barriers between nations, transforming the world's diverse populations into a blandly uniform market. On the other hand, ethnic, religious, and racial hatreds are fragmenting the political landscape into smaller and smaller tribal units. *Jihad vs. McWorld* is the term that distinguished writer and political scientist Benjamin R. Barber has coined to describe the powerful and paradoxical interdependence of these forces. In this important new book, he explores the alarming repercussions of this potent dialectic for democracy. A work of persuasive originality and penetrating insight, *Jihad vs. McWorld* holds up a sharp, clear lens to the dangerous chaos of the post-Cold War world. Critics and political leaders have already heralded Benjamin R. Barber's work for its bold vision and moral courage. *Jihad vs. McWorld* is an essential text for anyone who wants to understand our troubled present and the crisis threatening our future.

*The Age of Paradox*

With his characteristically very personal anecdotal style, Charles Handy analyses how materialistic capitalism is self-limiting, how efficiency may be the enemy of a cohesive society, and examines the false certainties of science and religion. Offering a carefully

considered and compelling alternative vision, the book challenges the status quo on everything from capitalism and organization to goal-setting and morality. With nods to Kant, Keynes, Sartre and Drucker, *The Hungry Spirit* is not your usual business tome, but that, of course, is part of Handy's plan.

"Ideas move mountains, especially in turbulent times. *Lovemarks* is the product of the fertile-iconoclast mind of Kevin Roberts, CEO Worldwide of Saatchi & Saatchi. Roberts argues vociferously, and with a ton of data to support him, that traditional branding practices have become stultified. What's needed are customer Love affairs. Roberts lays out his grand scheme for mystery, magic, sensuality, and the like in his gloriously designed book *Lovemarks*." —Tom Peters Tom Peters, one of the most influential business thinkers of all time, described the first edition of *Lovemarks: the future beyond brands* as "brilliant." He also announced it as the "Best Business Book" published in the first five years of this century. Now translated into fourteen

languages, with more than 150,000 copies in print, *Lovemarks* is back in a revised edition featuring a new chapter on the peculiarly human experience of shopping. The new chapter, "Diamonds in the Mine," is an insightful collection of ideas for producers and consumers, for owners of small stores and operators of superstores. So forget making lists! Shopping, says Kevin Roberts, is an emotional event. With this as a starting point, he looks at the history of shopping and how it has changed so dramatically over the last ten years. Using the Lovemark elements of Mystery, Sensuality, and Intimacy, Roberts delves into the secrets of success that can be used to create the ultimate shopping experience.
