accessible, up-to-date introduction to the current state of the aviation industry which provides readers with the tools necessary to understand the volatile and often complicated nature of airline finance. Understanding finance is critical in any industry; however, the financial track record of the airline industry places even more importance on effective financial management. *Foundations of Airline Finance* provides an introduction to the basics of finance – including time value of money, the valuation of assets, and revenue management – and the particular intricacies of airline finance where there can be wild fluctuations in both revenues and costs. The third edition of this

text has been extensively updated to reflect the many changes in the air transport industry that have taken place since the publication of the second edition, and features an expanded chapter on aircraft leasing and many new international case examples. This thorough introduction to aviation finance is valuable reading as a general, introductory financial text, or as reading in specialized airline finance classes. *Horngren's Financial & Managerial Accounting, the Managerial Chapters and the Financial Chapters, Global Edition* BoD – Books on Demand Governmental and Nonprofit Accounting, Revised Sixth Edition provides a better balance between

Includes coverage of the new reporting model standard: GASB Statement 34. Includes illustrations of government-wide financial statements and fund-based financial statements presented using the major fund approach.

Points out the major changes required from the current guidance and explains and illustrates the requirements of the new model. Explains and illustrates the GASB Statement 31.
