Wiley CPA Examination Review 2002, Auditing John Wiley & Sons

This book is not about selling products -- it is about selling yourself, your ideas, and your services. This book explains an innovative dialogue sales process, and the relationship sales principles that underpin it. In every sales situation, there is both a seller and a buyer and, at different times, either the buyer or the seller may take the lead. The dance they perform may or may not lead to a deal, but it will leave them knowing a little more about each other's strengths and weaknesses. These two dancers are "connected" and follow the same steps -- The five steps they follow are to plan, connect, dialogue, record, and follow up. The five steps are the basis of the dialogue process. In addition, this book provides easy-to-follow guidance for three groups of people: 1. Professionals wanting to sell their services and improve their business development; 2. Thought leaders, change agents, innovators, entrepreneurs, senior public servants, and advocates wanting to sell their ideas to others; 3. Mid-career job seekers and recent graduates aiming to sell themselves into a

dream job role either full or part-time.

"The purpose of this chapter is to provide an overview of assurance, attestation, and audit services. While the focus of this text is the audit of financial statements, in this chapter we define assurance and attest engagements, and differentiate among the types of assurance engagements. We also discuss why there is a demand for audit and assurance services, and then identify the separate roles of the financial statement preparer and the auditors. In addition, we introduce regulatory bodies and other organizations that impact the audit profession. We also explain what is communicated in the auditor's report as well as discuss the audit expectation gap"--
