*From the Stars in the Sky to the Fish in the Sea* Macmillan

In the magical time between night and day, when both the sun and the moon are in the sky, a child is born in a little blue house on a hill. And Miu Lan is not just any child, but one who can change into any shape they can imagine. The only problem is they can't decide what to be: A boy or a girl? A bird or a fish? A flower or a shooting star? At school, though, they must endure inquisitive looks and difficult questions from the other children, and they have trouble finding friends who will accept them for who they are. But they find comfort in the loving arms of their mother, who always offers them the same loving refrain: "whatever you dream of / i believe you can be / from the stars in the sky to the fish in the sea." In this captivating, beautifully imagined picture book about gender, identity, and the acceptance of the differences between us, Miu Lan faces many questions about who they are and who they may be. But one thing's for sure: no matter what this child becomes, their mother will love them just the same. Kai Cheng Thom is a writer, performance artist, and psychotherapist in Toronto. Her first poetry book, *A Place Called No Homeland*, was published in 2017. Kai Yun Ching is a community-based organizer, educator, and illustrator in

Montreal. Wai-Yant Li is a ceramics artist and illustrator in Montreal.

*The New Photo-miniature* Morgan & Claypool Publishers  
 Discover the astonishing truth about our aquatic cousins: how they think and what they know, their experiences and unique behaviours, and the many things we have in common. There are 33,000 species of fish on our planet, and that number is constantly increasing. In context, that is more than all the species of mammals, birds, amphibians and reptiles added together, making fish the most numerous vertebrates on our planet. Waters worldwide are teeming with these elusive creatures, but how much do we really know about them? Grouped into thematic chapters - including the Dangerous and Deadly, Unusual Giants and Mini Marvels - in this comprehensive book biologist Doug Mackay-Hope profiles the secret lives of 50 of our most interesting underwater cousins in an insightful and myth-busting study, complete with charming watercolour diagrams and expert insights. Learn about the White-Spotted Pufferfish, whose spines hide a deadly toxin, or the Ocellate River Stingray, who lurks in the rivers of South America and who can kill with just one touch of its barbed stinger. Meet Bargibant's Pygmy Seahorse, who measures just 2cm in length, as well as the enormous Whale Shark, which grows to around 13m in length. Be fascinated by the wierd creatures of the deep ocean, such as the Peter's Elephantnosed Fish or the kaleidoscopic Picasso's Triggerfish. With a foreword by Jeremy Wade, presenter of River Monsters and Mighty Rivers, and official fish aficionado, this book is a complete

compendium of fascinating fish facts, with maps showing where in the globe they can be found, plus facts on how they live, hunt and escape predators. Beautiful illustrations and photographs accompany each entry, as well as interesting facts on how they evolved to adapt to changing environments, making this book the perfect guide to all things aquatic.

Version 3 (2016) The only ebook you need for snorkelling and diving in the Maldives. Over 300 pages of stunning fish photography, concise expert information, diagrams and easy to reference icons. Written by a Marine Biologist Tim Godfrey and Marine Expert, Rudi Kuitert. This new edition now features Sharks and Rays. A REFERENCE FOR RESEARCHERS, DIVERS AND SNORKELLERS With almost every fish, shark and ray likely to be seen by divers and snorkellers in the Maldives and

Central/Western Indian Ocean, this reference book is the perfect guide to check on those mystery fishes seen during dives. Illustrated with superb underwater photographs, with most photographs taken in the Maldives, the pages are packed with information relevant to the Maldives marine environment. The species that vary in colour, or between sexes, are all illustrated with additional photographs. The introduction explains the basics of fish science, behaviour and evolution and brief text for each species describes points of interest and differences between similar species. There are detailed drawings on fish-features, shapes and colour patterns. To assist in identifying the family, small, diagnostic silhouettes from the contents page are distributed as thumbprints throughout the book. Fishes of the Maldives Indian Ocean is easy to use, and will hopefully encourage researchers, divers and snorkellers to take greater interest in the smaller species, as well as the large.
