Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic

600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinis, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.

Year-by-year evolution of the BSA Bantam, a simple commuter bike that thousands learnt to ride on. It became the standard GPO 'telegram bike' in the 1950s and was a huge success, with 100,000 built in the first four years of production. It's a story with interesting asides, like the Hummer, Harley-Davidson's version of the DKW that inspired the Bantam, and survived into the 1960s. But it's a sad story too - BSA failed to follow up the Bantam's early success by developing it, and by the mid-1960s it was looking outdated, especially next to the new breed of four-stroke Hondas. That the Bantam was allowed to fizzle out in 1971 symbolised the state of the industry that produced it, but today there's a thriving community of Bantam owner/riders. The book ends with a guide to buying a secondhand Bantam, along with useful appendices on specifications,

engine/frame numbers, and contacts among the clubs and Bantam specialists. Every Bantam owner, or would be owner, needs this book - the Bantam Bible!
