**Merriam-Webster's Dictionary of English Usage** Bloomsbury Publishing

Based on an in-depth study of children's language development theory, this book puts forward the original proposition that semantic perception is the human sixth sense. Presenting a detailed, complete, and scientific argumentation, it asserts that the innateness of semantic perception has a physiological basis and that language acquisition is based on semantic perception, and proposes the idea of a critical period of nurture and language growth. To this end, the book not only contrasts children's language acquisition processes and the process of adult speech generation and comprehension, but also discusses the ability to read and write, describing this important stage of children's language development and analyzing semantic perception. Focusing on education and psychology, it also discusses the use of semantic perception theory to instruct teaching and learning. This book is a valuable resource for teachers, researchers, practitioners and graduate students in the fields of educational technology, child development and language learning, as well as anyone interested in children's language development.

The Indigenous languages of Australia have been undergoing a renaissance over recent decades.

Many languages that had long ceased to be heard in public and consequently deemed 'dead' or 'extinct', have begun to emerge. Geographically and linguistically isolated, revitalisers of Indigenous Australian languages have often struggled to find guidance for their circumstances, unaware of the others walking a similar path. In this context Re-awakening languages seeks to provide the first comprehensive snapshot of the actions and aspirations of Indigenous people and their supporters for the revitalisation of Australian languages in the twenty-first century. The contributions to this

volume describe the satisfactions and tensions of this ongoing struggle. They also draw attention to the need for effective planning and strong advocacy at the highest political and administrative levels, if language revitalisation in Australia is to be successful and people's efforts are to have longevity.

Inside this eBook you'll find: - 12 easy-to-read books, 12 pages each - All two and three letter words (C-V-C words) - Can be "sounded out" (phonics based) - A few new letters introduced in each book - Limited sight words - 7 to 20 words per book
