A World Bank Strategy Society of Amer Archivists
Advances in Stochastic Modelling and Data Analysis presents the most recent developments in the field, together with their applications, mainly in the areas of insurance, finance, forecasting and marketing. In addition, the possible interactions between data analysis, artificial intelligence, decision support systems and multicriteria analysis are examined by top researchers. Audience: A wide readership drawn from theoretical and applied mathematicians, such as operations researchers, management scientists, statisticians, computer scientists, bankers, marketing managers, forecasters, and scientific societies such as EURO and TIMS.
Handbook of Research on Digital Violence and Discrimination Studies Springer Science & Business Media
 Intended to provide the basic foundation for modern archival practice and theory.

Development In Modern Africa "O'Reilly Media, Inc."

Here's what you should know to manage data records efficiently
 With proper electronic data management, your business can lower costs, improve efficiency, eliminate duplication, and be protected in the event of a lawsuit. This book provides an overview of records management solutions and implementation strategies in plain, non-technical English. Step-by-step instructions show you how to begin managing records and information and how to maintain the program once you have it established. Sample forms for inventory, scheduling, and necessary documentation are also available on the companion website. Electronic records management offers cost savings, greater efficiency, and protection in case of legal action; this book gets you started on an effective data management system
 This plain-English guide helps you determine what constitutes a record, shows you how to inventory records and create an efficient way to file both electronic and paper copies, and explains how to create a retention schedule
 Walks you through switching to electronic record-keeping, what to look for in a

records management system, implementing best practices, ensuring that your system will stay current, and using the system effectively. Helps you assure that the destruction of any sensitive information is conducted and documented correctly. *Records Management For Dummies* helps your business save money and improve efficiency with effective electronic records management. *Monte Carlo Transport of Electrons and Photons* IGI Global For undergraduate courses in investments. This comprehensive interface of traditional and modern approaches to securities analysis and portfolio management embraces a global approach and uses the unique feature of applying concepts to a continuous example, McDonald's Corporation.

Case Studies. Cases 25-34 Routledge

The volume "The UNESCO Memory of the World Programme: Key Aspects and Recent Developments" responds to the growing interest in the scientific study of the Memory of the World Programme (MoW) and its core concept of documentary heritage, which has received little attention from scholarship so far. This sixth publication in the Heritage Studies Series provides a first collection of differing approaches (including reflected reports, essays, research contributions, and theoretical reflections) for the study of the MoW Programme, offering a basis for follow-up activities. The volume, edited by Ray Edmondson, Lothar Jordan and Anca Claudia Prodan, brings together 21 scholars from around the globe to present aspects deemed crucial for understanding MoW, its development, relevance and potential. The aim is to encourage academic research on MoW and to enhance the understanding of its potential and place within Heritage Studies and beyond.

World Development Report 2011 IGI Global

Published in association with the Society of American Archivists. *Trusting Records in the Cloud* presents key findings of InterPARES Trust, an international research project that has investigated issues of trust in, and trustworthiness of records and data online, with respect to privacy, accessibility, portability, metadata and ownership. The project has produced theoretical and methodological frameworks for the development of local, national and international policies, procedures, regulations, standards and legislation, to ensure public trust grounded on evidence of good governance, strong digital economy and persistent digital memory. Topics include: - risks and remedies to the contracts the public must enter into with service providers - implementing retention and disposition schedules in the cloud - understanding the role of metadata in cloud services for chain of custody - rethinking issues of appraisal, arrangement and description - preservation as a series of services implementable by a variety of preservation actors - information governance, risk management, and authentication practices and technologies. This book is essential reading for records and archives managers, information professionals and organizations that are using or intend to use the cloud for the creation, management and preservation of their information; records and archives students and educators; individuals working in the academic, government and private sectors, and members of the public concerned about their personal information in the cloud.

Achieving Open Justice through Citizen Participation and Transparency World Bank Publications

In an age of scarcity and the challenge of electronic records, can archivists and records managers continue to rely upon traditional methodology essentially unchanged since the early 1950s? *Using Functional Analysis in Archival Appraisal: A Practical and Effective Alternative to Traditional Appraisal Methodologies* shows how archivists in other countries are already using functional analysis, which offers a better, more effective, and imminently more practical alternative to traditional appraisal methodologies that

rely upon an analysis of the records themselves.

Principles and Context W B Saunders Company

Continuous improvements in digitized practices have created opportunities for businesses to develop more streamlined processes. This not only leads to higher success in day-to-day production, but it also increases the overall success of businesses. *E-Manufacturing and E-Service Strategies in Contemporary Organizations* is a critical scholarly resource that explores the advances in cloud-based solutions in the service and manufacturing realms of corporations and promotes communication between customers and service providers and manufacturers. Featuring coverage on a wide range of topics including smart manufacturing, internet banking, database system adoption, this book is geared towards researchers, professionals, managers, and academicians seeking current and relevant research on the improvement of cloud-based systems for manufacturing and service.

Organising and Controlling Current Records Rowman & Littlefield

Open government initiatives have become a defining goal for public administrators around the world. However, progress is still necessary outside of the executive and legislative sectors. *Achieving Open Justice through Citizen Participation and Transparency* is a pivotal reference source for the latest scholarly research on the implementation of open government within the judiciary field, emphasizing the effectiveness and accountability achieved through these actions. Highlighting the application of open government concepts in a global context, this book is ideally designed for public officials, researchers, professionals, and practitioners interested in the improvement of governance and democracy.

Records Classification: Concepts, Principles and Methods Chandos Publishing

The 2011 WDR on Conflict, Security and Development underlines the devastating impact of persistent conflict on a country or region's development prospects - noting that the 1.5 billion people living in conflict-affected areas are twice as likely to be in poverty. Its goal is to contribute concrete, practical suggestions on conflict and fragility.

Information, Systems, Context National Archives Trust Fund Board

The critical importance of well-performing public institutions and good governance for development and poverty reduction has come to the forefront in the 1990s. Reforming public institutions is a complex and difficult task. This publication is primarily intended as a guide for World Bank staff but it is also intended to serve the broader development community. It outlines a strategy which envisions significant changes in the focus of the Bank's work in this area. Some of these changes such as an enhanced focus on governance, capacity building and anticorruption, are already underway. The agenda for the next three years is to continue to foster these changes through the advancement of analytical tools, new approaches to the design of lending operations, expanded emphasis on partnership with clients and other donors and progressive shifts in staffing, incentives and evaluation techniques. Included as an annex is an inventory of the Bank's governance and institutional reform programs which are in place.

Practical Advice from the Trenches AOSIS

Doing Business 2014: Understanding Regulations for Small and Medium-Size Enterprises assesses regulations affecting domestic firms in 189 economies and ranks the economies in 10 areas of business regulation, such as starting a business, resolving insolvency and trading across borders. This year's report data cover regulations measured from June 2012 through May 2013.

The report is the 11th edition of the Doing Business series. *Trusting Records in the Cloud* World Bank Publications

Records Classification: Concepts, Principles and Methods: Information, Systems, Context introduces classification, an early part of the research lifecycle. Classification ensures systematic organization of documents and facilitates information retrieval. However, classification systems are not prevalent in records management when compared to their use in other information fields. This book views classification from the records management (RM) perspective by adopting a qualitative approach, with case studies, to gather data by means of interview and document content analysis. Current development of information systems do not take into account the concept of classification from a RM perspective. Such a model is required because the incorporation of information and communication technology (ICT) in managing records is inevitable. The concept of classification from an RM perspective ought to be extended to the ICT team to enable the development of a RM system not limited to storage and retrieval functions, but also with relation to disposal and preservation processes. This proposed model introduces function-based classification to ensure records are classified in context. Gives a step-by-step functional model for constructing a classification system within an organization

Advocates for the importance of practicing classification for records, towards competent, transparent, and democratic organizations Helps organizations build their own classification system, thus safeguarding information in a secure and systematic fashion Provides local case studies from Malaysia and puts together a generic, globally applicable model

Reforming Public Institutions and Strengthening Governance IGI Global

With the rapid increase in the implementation of e-Government in Africa and across the world, the need to investigate the key bottlenecks (issues) caused by the failure of a large number of e-Government projects cannot be ignored. The main purpose of this book is to contribute to the current scholarly and intellectual discourse on different aspects of e-Government such as understanding the critical issues in design, implementation and monitoring. This book specifically intends to bring out contextual issues that hugely impact on the probability for e-Government failure or success. It also differentiates itself by carefully exploring the issue of context-awareness (informed by the local context) for e-Government design and implementation, which has not been pursued in any publication in e-Government before, although it has been used in other information computational contexts. Therefore, the many theses within this book are concerned with e-Government design approaches, implementation policies and requirements, and monitoring dimensions need to be informed by the contextual characteristics in which they are implemented. This book contributes to the body of knowledge by presenting an in-depth analysis of a case of e-Government implementation. Therefore, this book has its facts backed by intermittent reference to an empirical study done in Zambia to accentuate issues in design, adoption, usage and monitoring of e-Government projects. The case articulates the methodological issues in the design and measurement of e-Government. The use of a combination of structural equation modelling (SEM), exploratory factor analysis (EFA) and advanced techniques such as principal component analysis (PCA) in investigating different aspects of e-Government in a developing country context has not been done in any previous research. The novel methodological nuances articulated in this book can go a long way toward understanding the factors explaining successful implementation of e-Government. Previous publications have used basic statistical approaches devoid of adequate scientific or

statistical rigour such as descriptive statistics to arrive at factors influencing the success or failure of e-Government. Furthermore, this book contributes to the body of knowledge by emphasising the different dimensions and issues of the multidimensional perspectives of e-Government. The book explores tangible pointers for design and implementation of e-Government, giving it the thrust to potentially guide actual implementation of e-Government in African setups.

Diverse Applications and Transferability of Maturity Models The UNESCO Memory of the World Programme Key Aspects and Recent Developments

This book's authoritative blend of theory and practice makes it a matchless resource for everyone in the archives and records management field.

The Management of Public Sector Records World Bank Publications

Focuses on digital violence and discrimination, cybercrime, digital transformation, and practices and studies related to digital violence. The book introduces and guides users through current best practices, laboratory methods, policies, protocols, and more within international digital violence and discrimination.

Archives in South Africa Springer Science & Business Media

For ten days at the end of September, 1987, a group of about 75 scientists from 21 different countries gathered in a restored monastery on a 750 meter high piece of rock jutting out of the Mediterranean Sea to discuss the simulation of the transport of electrons and photons using Monte Carlo techniques. When we first had the idea for this meeting, Ralph Nelson, who had organized a previous course at the "Ettore Majorana" Centre for Scientific Culture, suggested that Erice would be the ideal place for such a meeting. Nahum, Nelson and Rogers became Co-Directors of the Course, with the help of Alessandro Rindi, the Director of the School of Radiation Damage and Protection, and Professor Antonino Zichichi, Director of the "Ettore Majorana" Centre. The course was an outstanding success, both scientifically and socially, and those at the meeting will carry the marks of having attended, both intellectually and on a personal level where many friendships were made. The scientific content of the course was at a very high caliber, both because of the hard work done by all the lecturers in preparing their lectures (e. g. , complete copies of each lecture were available at the beginning of the course) and because of the high quality of the "students", many of whom were accomplished experts in the field. The outstanding facilities of the Centre contributed greatly to the success. This volume contains the formal record of the course lectures.

Philippine Tilapia Economics Facet Publishing

Archives in Liquid Times aims to broaden and deepen the thinking about archives in today's digital environment. It is a book that tries to fuel the debate about archives in different fields of research. It shows that in these liquid times, archives need and deserve to be considered from different angles. *Archives in Liquid Times* is a publication in which archival science is linked to philosophy (of information) and data science. Not only do the contributors try to open windows to new concepts and perspectives, but also to new uses of existing concepts concerning archives. The articles in this book contain philosophical reflections, speculative essays and presentations of new models and concepts alongside well-known topics in archival theory. Among the contributors are scholars from different fields of research, like Anne Gilliland, Wolfgang Ernst, Geoffrey Yeo, Martijn van Otterlo, Charles Jeurgens and Geert-Jan van Bussel. This book includes interviews with Luciano Floridi and Eric Ketelaar, in which they reflect on key issues arising from the contributions. The editors are Frans Smit, Arnoud Glaudemans

and Rienk Jonker.

Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently attempting to

integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC's work and research in this area. "Connecting ICTs to Development" discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.
