Resource-based Social Studies Curriculum for 5th Grade

Teacher Created Materials

The current research for methods of teaching social studies and the resulting attitudes in students and teachers would indicate that there is a need for better methods of teaching social studies that will better motivate and stimulate students.

Summer Bridge Activities® Teacher Created Materials

The "one size fits all" approach to education does not serve students well. Each student comes to our classroom with

an individual approach to learning. As educators, we must utilize our students' differences and help them through the learning process by differentiating our instruction. Because of these differences, and my desire to provide choices to my students, I was able to develop a fifth grade social studies curriculum that offers student choice in learning. This curriculum is based on Jay McTighe's Understanding by Design, and incorporates Gardner's multiple intelligences, Bloom's taxonomy, differentiation, motivation, and academic choice. The broad look at literature on effective teaching and providing students

with choice led to the design of a fifth grade social studies curriculum that is both educationally sound and appropriate for student choice.

The Framework for Teaching Evaluation Instrument, 2013 Edition

Carson-Dellosa Publishing

The questions outlined in Dr. James Banks' Checklist for Evaluating Instructional Materials provided the constructs identified in the district curricula and student textbooks. Results from this study suggest that the category most represented in district curricula and student textbooks would fall under the category, acknowledging the range of diversity. The construct that was most emphasized was includes a range of racial, ethnic, and cultural groups that reflects the diversity within U.S. life and society. The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have

remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

What will your fifth grader take away from learning ancient history? Lots! Learning about ancient history will help your child realize how the world has changed. It will also help your learner understand how the events of the past can be used to predict the future. Learn from the great achievements of previous history makers to avoid committing the same horrific mistakes. Grab a copy today!

The purpose of the study was to develop a resource-based social studies history and culture curriculum for a 5th grade class at a Native American charter school. The resource-based curriculum will incorporate native American history and culture, Arizona's State Essential Skills, and library skills.

A Fifth Grade Social Studies Curriculum that Offers Student Choice in Learning Knopf Books for Young Readers

The Olmecs lived thousands of years ago but you can still meet them, albeit imaginatively, through books. There are a lot to learn from history, and among which are lessons that need to be understood. Be amazed with how advanced the Olmecs were in building their society, in creating religion and even in their beliefs or mythologies. Enjoy this good read today!
