Major Systems Acquisition Reform St. John's, Nfld. : Institute of Social and Economic Research, Memorial University
Leading sociologist Irving Louis Horowitz examines the response social science has made to contemporary subjects and issues: the so-called "new class" of the intelligentsia, the ecology movement, social planning, alienation, privatization, anomie, the threat of nuclear war. Horowitz evaluates as a social scientist the question of values--those disclosed through analysis, and those

threatened by it--and discusses the overall political and moral impact of knowledge and methodology in social science.

How insurgencies—enabled by digital devices and a vast information sphere—have mobilized millions of ordinary people around the world. In the words of economist and scholar Arnold Kling, Martin Gurri saw it coming. Technology has categorically reversed the information balance of power between the public and the elites who manage the great hierarchical institutions of the industrial age: government, political parties, the media. The Revolt of the Public tells the story of how insurgencies, enabled

by digital devices and a vast information sphere, have mobilized millions of ordinary people around the world. Originally published in 2014, *The Revolt of the Public* is now available in an updated edition, which includes an extensive analysis of Donald Trump's improbable rise to the presidency and the electoral triumphs of Brexit. The book concludes with a speculative look forward, pondering whether the current elite class can bring about a reformation of the democratic process and whether new organizing principles, adapted to a digital world, can arise out of the present political turbulence.

Multinational Enterprise and Transnational Regions offers an innovative approach to the study of the history of transnational economic regions. The Rhine valley is such a region comprising the cities and areas along the Rhine river and its tributaries. The transition from coal to oil that unfolded between 1945 and 1973 rapidly transformed the region, shattering some of the old river-based connections and creating new ones with the introduction of large-scale cross-border oil pipelines. Multinational enterprises shaped these new regional connections but divergent national government responses gave rise to differentiated development in different parts of the Rhine valley. *Multinational Enterprise and Transnational Regions* argues that processes of regional change should be understood from transnational interconnections rather than from local or national perspectives. This book uses a transnational business history methodology to tease out the region's transformation and to circumvent the national bias in public sources. It will be of relevance to academics and researchers with an interest in regional and transnational

European history, international business, environmental history, and business history, as well as practitioners interested in the oil industry, energy and energy history, business history and international business, and associated disciplines.

National Petroleum News Duke University Press

Vols. include the proceedings (some summarized, some official stenographic reports) of the National Wholesale Druggists' Association (called 18 -1882, Western Wholesale Druggists' Association) and of other similar organizations.

The Economic Impact of the Oil Price Collapse

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*
