Magic, danger, and adventure abound for messenger Karigan G'ladheon in author Kristen Britain's New York Times-bestselling Green Rider fantasy series •

"First-rate fantasy."

—Library Journal On her long journey home from school after a fight that will surely lead to her expulsion, Karigan G'ladheon ponders her uncertain future. As she trudges through the immense Green Cloak forest, her thoughts are interrupted by the clattering of hooves, as a galloping horse bursts from the woods. The rider is slumped over his mount's neck, impaled by two black-shafted arrows. As the young man lies dying on the road, he tells Karigan he is a Green Rider, one of the legendary messengers of the king of Sacordia. Before he dies, he begs Karigan to deliver the "life and death" message he bears to King Zachary. When she reluctantly he agrees, he makes her swear on his sword to

complete his mission, whispering with his dying breath, "Beware the shadow man...". Taking on the golden-winged horse brooch that is the symbol of the Green Riders, Karigan is swept into a world of deadly danger and complex magic, her life forever changed. Compelled by forces she cannot understand, Karigan is accompanied by the silent specter of the fallen messenger and hounded by dark beings bent on seeing that the message, and its reluctant carrier, never reach their destination.

The purpose of this unique book is to outline the core of game science by presenting principles underlying the design and use of games and simulations. Game science covers three levels of discourse: the philosophy of science level, the science level, and the application or practical level. The framework presented will help to grasp the interplay between forms of knowledge and knowledge content, interplay that evolves through the action of the players.

Last Days (winner of the British Fantasy Award for Best Horror Novel of the Year) by Adam Nevill is a Blair Witch style novel in which a documentary film-maker undertakes the investigation of a dangerous cult—with creepy consequences

When guerrilla documentary maker, Kyle Freeman, is asked to shoot a film on the notorious cult known as the Temple of the Last Days, it appears his prayers have been answered. The cult became a worldwide phenomenon in 1975 when there was a massacre including the death of its infamous leader, Sister Katherine. Kyle's brief is to explore the paranormal myths surrounding an organization that became a testament to paranoia, murderous rage, and occult rituals. The shoot's locations take him to the cult's first temple in London, an abandoned farm in France, and a

derelict copper mine in the Arizonan desert where The Temple of the Last Days met its bloody end. But when he interviews those involved in the case, those who haven't broken silence in decades, a series of uncanny events plague the shoots. Troubling out-of-body experiences, nocturnal visitations, the sudden demise of their interviewees and the discovery of ghastly artifacts in their room make Kyle question what exactly it is the cult managed to awaken – and what is its interest in him?

“Vita Nostra” — a cross between Lev Grossman’s “The Magicians” and Elizabeth Kostova’s “The Historian” [...] is the anti-Harry Potter you didn’t know you wanted.” -- The Washington Post “Vita Nostra has become a powerful influence on my own writing. It’s a book that has the potential to become a modern classic of its genre, and I couldn’t be more excited to see it get the global audience in English it so richly deserves.” -- Lev Grossman Best Books of November 2018 -- Paste Magazine The definitive English language translation of the

internationally acclaimed Russian novel—a brilliant dark fantasy combining psychological suspense, enchantment, and terror that makes us consider human existence in a fresh and provocative way. Our life is brief . . . Sasha Samokhina has been accepted to the Institute of Special Technologies. Or, more precisely, she's been chosen. Situated in a tiny village, she finds the students are bizarre, and the curriculum even more so. The books are impossible to read, the lessons obscure to the point of maddening, and the work refuses memorization. Using terror and coercion to keep the students in line, the school does not punish them for their transgressions and failures; instead, it is their families that pay a terrible price. Yet despite her fear, Sasha undergoes changes that defy the dictates of matter and time; experiences which are nothing she has ever dreamed of . . . and suddenly all she could ever want. A complex blend of adventure, magic, science, and philosophy that probes the mysteries of existence, filtered through a distinct Russian

sensibility, this astonishing work of speculative fiction—brilliantly translated by Julia Meitov Hersey—is reminiscent of modern classics such as Lev Grossman's *The Magicians*, Max Barry's *Lexicon*, and Katherine Arden's *The Bear and the Nightingale*, but will transport them to a place far beyond those fantastical worlds. *Green Rider* Simon and Schuster Before the Brothers' War. Before the five colors of magic. Before history itself, the plane of Dominaria was ruled by the Thran. They built machines and artifacts, the likes of which have never since been seen. But amid this civilization, a shadow took root, one that would stretch its arms across space and time. The hideous evil of Phyrexia was born. *Last Days* Tor Books Unravel the eldritch mysteries of the galaxy! A New York Times Best Seller Merging real stories with theory, research, and practice, a prominent scholar offers a new approach to teaching and learning for every stakeholder in urban education. Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color and merging his experiences with more than a decade of teaching and researching in urban

America, award-winning educator Christopher Emdin offers a new lens on an approach to teaching and learning in urban schools. For *White Folks Who Teach in the Hood...and the Rest of Y'all Too* is the much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better. He begins by taking to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant

strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the "Seven C's" of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education. analysis, design, optimization, verification, and validation. Next, he shows how to use all nine types of SysML diagrams, even if you have no previous experience with modeling languages. A case study running through the text demonstrates the use of SysML in modeling a complex, real-world sociotechnical system. Modeled after Martin Fowler's classic UML Distilled, Delligatti's indispensable guide quickly teaches you what you need to know to get started and helps you deepen your knowledge incrementally as the need arises. Vita Nostra Henry Holt Books For Young Readers

In this witty and perceptive debut, a former editor at Psychology Today shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases- misperceptions of the world-and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time-and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With

wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.
