All zombies are created equal. All zombie stories are not. From its humble beginnings as an indie comic book, *The Walking Dead* has become a pop culture juggernaut boasting New York Times--bestselling trade paperbacks, a hit television series, and enough fans to successfully take on any zombie uprising. *Triumph of The Walking Dead* explores the intriguing characters, stunning plot twists, and spectacular violence that make Robert Kirkman's epic the most famous work of the Zombie Renaissance. *The Walking Dead* novels' co-author Jay Bonansinga provides the inside story on translating the comics into prose; New York Times bestseller Jonathan Maberry takes on the notion of leadership (especially Rick Grimes') during the zombie apocalypse; Harvard professor Steven Schlozman dissects the disturbing role of

science in the television series; and more. *Triumph of The Walking Dead* features a foreword by horror legend Joe R. Lansdale.

Rural Literacies identifies the problems inherent in trying to understand rural literacy, addresses the lack of substantive research on literacy in rural areas, and reviews traditional misrepresentations of rural literacy. This innovative volume frames debates over literacy in relation to larger social, political, and economic forces, such as the impact of the No Child Left Behind Act on rural schools and the effects of out-migration, globalization, and the loss of small family farms on rural communities. Drawing upon traditional literacy and composition research and employing theory from education and sociology, the text engages compositionists in broader conversations regarding rural literacies. The authors share strategies that will help compositionists participate in pedagogies that are rooted in a richer understanding of rural literacies and work toward sustainability for all communities in a globalized age.

#### Essential Advice for Any Emergency Life Throws Your Way Del Rey

Outbreak narratives have proliferated for the past quarter century, and now they have reached epidemic proportions. From *28 Days Later* to *24* to *The Walking Dead*, movies, TV shows, and books are filled with zombie viruses, bioengineered plagues, and disease-ravaged bands of survivors. Even news reports indulge in

thrilling scenarios about potential global pandemics like SARS and Ebola. Why have outbreak narratives infected our public discourse, and how have they affected the way Americans view the world? In *Going Viral*, Dahlia Schweitzer probes outbreak narratives in film, television, and a variety of other media, putting them in conversation with rhetoric from government authorities and news organizations that have capitalized on public fears about our changing world. She identifies three distinct types of outbreak narrative, each corresponding to a specific contemporary anxiety: globalization, terrorism, and the end of civilization. Schweitzer considers how these fears, stoked by both fictional outbreak narratives and official sources, have influenced the ways Americans relate to their neighbors, perceive foreigners, and regard social institutions. Looking at everything from *I Am Legend* to *The X Files* to *World War Z*, this book examines how outbreak narratives both excite and horrify us, conjuring our nightmares while letting us indulge in fantasies about fighting infected Others. *Going Viral* thus raises provocative questions about the cost of public paranoia and the power brokers who profit from it. *Monsters in Performance* boasts an impressive range of contemporary essays that delve into topical themes such as race, gender, and disability, to explore what constitutes monstrosity within the performing arts. These fascinating essays from leading and emerging scholars explore representation in performance, specifically concerning themselves with attempts at social

disqualification of "undesirables." Throughout, the writers employ the concept of "monstrosity" to describe the cultural processes by which certain identities or bodies are configured to be threateningly deviant. The editors take a range of previously isolated critical inquiries - including bioethics, critical race studies, queer studies, and televisual studies - and merge them to create an accessible and dynamic platform which unifies these ranges of representations. The global scope and interdisciplinary nature of *Monsters in Performance* renders it an essential book for Theatre and Performance students of all levels as well as scholars; it will also be an enlightening text for those interested in monstrosity and Cultural Studies more broadly.

Research suggests that future influenza pandemics are inevitable as strains of the virus mutate in new ways. With this uncomfortable reality in mind, this book examines how the general public experienced the 2009 H1N1 influenza virus outbreak by bringing together stories about individuals' perception of their illness, as well as reflections on news, vaccination, social isolation, and other infection control measures. The book also charts the story-telling of public life, including the 'be alert, not alarmed' messages from the beginning of the outbreak through to the narratives that emerged later when the virus turned out to be less serious than initially thought. Providing unprecedented insight into the lives of ordinary people faced with the specter of a potentially lethal virus and drawing on currents in sociocultural scholarship of narrative, illness narrative, and narrative medicine, *Pandemics, Publics, and Narrative* develops a novel 'public health narrative' approach of interest to health communicators and researchers across the social and health sciences.

**Essays on Teaching What Scares Us** Cengage Learning

Why has the zombie become such a pervasive figure in twenty-first-century popular culture? John Vervaeke, Christopher Mastropietro and Filip Miscevic seek to answer this question by arguing that particular aspects of the zombie, common to a variety of media forms, reflect a crisis in modern Western culture. The authors examine the essential features of the zombie, including mindlessness, ugliness and homelessness, and argue that these reflect the outlook of the contemporary West and its attendant zeitgeists of anxiety, alienation, disconnection and disenfranchisement. They trace the relationship between zombies

and the theme of secular apocalypse, demonstrating that the zombie draws its power from being a perversion of the Christian mythos of death and resurrection. Symbolic of a lost Christian worldview, the zombie represents a world that can no longer explain itself, nor provide us with instructions for how to live within it. The concept of 'domicide' or the destruction of home is developed to describe the modern crisis of meaning that the zombie both represents and reflects. This is illustrated using case studies including the relocation of the Anishinaabe of the Grassy Narrows First Nation, and the upheaval of population displacement in the Hellenistic period. Finally, the authors invoke and reformulate symbols of the four horseman of the apocalypse as rhetorical analogues to frame those aspects of contemporary collapse that elucidate the horror of the zombie. *Zombies in Western Culture: A Twenty-First Century Crisis* is required reading for anyone interested in the phenomenon of zombies in contemporary culture. It will also be of interest to an interdisciplinary audience including students and scholars of culture studies, semiotics, philosophy, religious studies, eschatology, anthropology, Jungian studies, and sociology.

Zombies first shuffled across movie screens in 1932 in the low-budget Hollywood film *White Zombie* and were reimagined as undead flesh-eaters in George A. Romero's *The Night of the Living Dead* almost four decades later. Today, zombies are omnipresent in global popular culture, from video games and top-rated cable shows in the United States to comic books and other visual art forms to low-budget films from Cuba and the Philippines. The zombie's ability to embody a variety of cultural anxieties—ecological disaster, social and economic collapse, political extremism—has ensured its continued relevance and legibility, and has precipitated an unprecedented deluge of international scholarship. *Zombie Theory* manifested across academic disciplines in the humanities but also beyond, spreading into sociology, economics, computer science, mathematics, and even epidemiology. *Zombie Theory* collects the best interdisciplinary zombie scholarship from around the world. Essays portray the zombie not as a singular cultural figure or myth but show how the undead represent larger issues: the belief in an afterlife, fears of contagion and technology, the effect of capitalism and commodification, racial exclusion and oppression, dehumanization. As presented here, zombies are not simple metaphors; rather, they emerge as a critical mode for theoretical work. With its diverse disciplinary and methodological approaches, *Zombie Theory* thinks through what the walking undead reveal about our relationships to the world and to each other. *Things the CDC Didn't Know* James Schanep

The second entry in this "inventive and exciting" zombie series that began with *Monster Island* (Publishers Weekly). This is where it begins. This is where the end of the world begins? She wakes up alone and feeling like she's half-dead. She can't remember her

name. She staggers outside, looking for help—and that's when she sees that the dead have returned to life, that zombies are running in the streets and devouring the living. And she's one of them. She isn't breathing. The zombies leave her alone. Because they know she's one of their kind. And yet she differs from the brainless ghouls around her in some crucial ways. Somehow she's kept her intelligence intact, if not her memory. And being dead has certain compensations. She has developed strange powers. She calls herself Nilla, and all she knows is that staying alive only gets harder after you die? Meanwhile the National Guard has its hands full with the worst epidemic ever to strike the American west. From California to Colorado every town, every city is being overrun. Captain Bannerman Clark isn't prepared for this. He's semi-retired and he hasn't fired a gun in years, not since the Vietnam war. Yet it seems there's no one else around to take charge. As the world we know collapses he must find in himself the brains, the guts, and the moral courage to lead the survivors to safety, if there's any to be had. Meanwhile, behind the scenes, shadowy players are just beginning to show their hands. There's more going on here than meets the eye, and Clark and Nilla both have parts to play in a game they can't comprehend?
