Taxonomy and Biostratigraphic Significance John Wiley & Sons Globalization and the easy movement of people, weapons, and toxins across borders has transformed security into a transnational phenomenon. Preventing transnational security threats has proven to be a very difficult challenge for governments and institutions around the world. Transnational Security addresses these issues, which are at the forefront of every global security professional's agenda. This book analyzes the most pressing current transnational security threats, including

weapons of mass destruction, terrorism, organized crime, cybercrime, natural disasters, human-made disasters, infectious diseases, food insecurity, water insecurity, and energy insecurity. It considers the applicable international laws and examines how key international organizations are dealing with these issues. The author uses a combination of theory and real-world examples to illustrate the transnational nature of security risks. By providing a detailed account of the different threats, countermeasures, and their implications for a number of different fields—law, public policy and administration, security, and criminology—this book will be an extremely useful resource for academicians, practitioners, and graduate and upper-level undergraduate students in these areas.

Personality: Classic Theories And Modern Research, 3/E Springer Advocate and abolitionist Conchita Sarnoff risked her life to tell the truth about a Wall Street billionaire hedge fund manager who is now a level-3 registered sex offender. TrafficKing uncovers a child sex trafficking case of epic proportions and the longest-running human trafficking case in U.S. legal history—more poignant than the Lewinsky case, Watergate scandal, and Profumo affair combined. Eleven years after the registered level-3 sex offender was arrested, four cases associated with his 2005 criminal investigation remain open. The pedophile was not prosecuted under The Trafficking Victims Protection Act (TVPA), a law enacted in Florida in 2000. In this gripping exposé, Sarnoff finds out why. TrafficKing is a true story exposing the dark side of the human condition: avarice, lust, power, and influence peddling at the highest levels of government.
