This insightful book
explores smaller towns
and cities, places in
which the majority of
people live,
highlighting that these

more ordinary places have extraordinary geographies. It focuses on the development of an alternative approach to urban studies and theory that foregrounds smaller cities and towns rather than much larger cities and conurbations.

Migration: Policies, Practices, Activism

Routledge

Despite labour shortages and rapidly shrinking working-age populations, Japan, South Korea, and Taiwan shared restrictive immigration policies and exclusionary practices toward immigrants until the early 2000s. While Taiwan maintained this trajectory, Japan took incremental steps to expand immigrant services at the grassroots level, and

South Korea enacted sweeping immigration reforms. How did convergent policies generate these divergent patterns of immigrant incorporation?

Departing from the dominant scholarship that focuses on culture, domestic political elites, and international norms, this book shows the important role of civil society actors - including immigrants themselves - in giving voice to immigrant interests, mobilizing immigrant actors, and shaping public debate and policy on immigration. Based on more than 150 in-depth interviews and focus groups with over twenty immigrant communities, Immigrant Incorporation in East

Asian Democracies examines how the civic legacies of past struggles for democracy shape current movements for immigrant rights and recognition.

The Palgrave Handbook of International Labour Migration Routledge

The Korean labour migration system has expanded since the mid-2000s, primarily in the admission of temporary foreign workers for less skilled jobs. Its temporary labour programme, addressed largely at SMEs in manufacturing and based on bilateral agreements with origin countries, has become the largest such programme in the OECD. Structural changes in the labour force, with a rapidly shrinking and highly

educated youth population, keep the underlying demand for this programme strong. Yet skills levels of workers are increasing, and there is interest in increasing Korea's share in global talent mobility, including international students and innovative entrepreneurs. This book addresses the question of how to ensure that international recruitment can help meet urgent needs in the labour market which cannot be met locally, and how the temporary labour migration programme - and other migration streams - can evolve to ensure that Korea meets its policy objectives. This review first examines the characteristics of the Korean labour market

and main challenges where labour migration can help address demand. Following a discussion of various programmes and procedures, the review assesses how labour migration is playing a role in different sectors and how programme governance could be improved. It then explores the channels for high-skilled migrants and how these could be improved in light of international experience.

Citizenship follows three groups of Filipina migrants' struggles to belong in South Korea: factory workers

claiming rights as workers, wives of South Korean men claiming rights as mothers, and hostesses at American military clubs who are excluded from claims—unless they claim to be victims of trafficking. Moving beyond laws and policies, Hae Yeon Choo examines how rights are enacted, translated, and challenged in daily life and ultimately interrogates the concept of citizenship. Choo reveals citizenship as a language of social and personal transformation within the pursuit of dignity, security, and mobility. Her vivid ethnography of both migrants and their South Korean advocates illuminates how social inequalities

of gender, race, class, and nation operate in defining citizenship.

Decentering

Citizenship argues that citizenship emerges from negotiations about rights and belonging between South Koreans and migrants. As the promise of equal rights and full membership in a polity erodes in the face of global inequalities, this decentering illuminates important contestation at the margins of citizenship.

Building Partnerships for Effectively Managing Labor Migration: Lessons from Asian countries

Recruiting Immigrant Workers: Korea 2019

Globalization has led to a surge in crossborder migration, and the population of

international migrants in East Asia has more than doubled over the past two decades.

Today, governments in the region are grappling with these expanding and increasingly complex flows of people as well as the human security challenges that they bring, but as a result, they too often overlook the potential opportunities that accompany skillfully managed migration. In this volume, experts from "sending" and "receiving" countries in Asia outline current trends in China, Japan, Korea, and Southeast Asia; analyze existing government efforts to manage migration; and explore the unique role that nongovernmental organizations can play in helping to protect migrants and to

harness migration to the benefit of the region.

International Migration Outlook 2012 Oxford University Press

This volume investigates how larger structural inequalities in sending and receiving nations, immigrant entry policies, group characteristics, and micro level processes, such as discrimination and access to ethnic networks, shapes labor market outcomes, workplace experiences, and patterns of integration among immigrants and their descendants.

Decentering Citizenship OECD Publishing

This report analyzes labor migration trends in Asia and emphasizes the importance of partnerships to

promote effective labor migration management. It addresses temporary migrant worker programs, focusing on the Republic of Korea's Employment Permit System and Malaysia's Electrical and Electronics industry.

Recruiters and International Labor Migration Edward Elgar Publishing

Economic activity has contracted less in Korea than in other OECD countries, thanks to the prompt and effective reaction of the authorities to contain the spread of the COVID-19 virus and to the wide-ranging government support to households and businesses.

Nevertheless, the pandemic generates strong headwinds. *The Development of Foreign Workers Policies and Socio-cultural Dynamics of Indonesian Migrant Workers in South Korea* Univ of California Press
A free open access ebook is available upon publication. Learn more at www.luminosoa.org.
Peruvian migrant workers began arriving in South Korea in large numbers in the mid 1990s, eventually becoming one of the largest groups of non-Asians in the country. *Migrant Conversions* shows how despite facing unstable income and legal exclusion, migrants come to see Korea as an ideal destination. Some even see it as part of their divine destiny. Faced

with looming departures, Peruvians develop cosmopolitan plans to transform themselves from economic migrants into pastors, lovers, and leaders. Set against the backdrop of 2008's global financial crisis, Vogel explores the intersections of three types of conversions—money, religious beliefs and cosmopolitan plans—to argue that conversions are how migrants negotiate the meaning of their lives in a constantly changing transnational context. At the convergence of cosmopolitan projects spearheaded by the state, churches, and other migrants, Peruvians change the value and meaning of their migrations. Yet, in attempting to make themselves at home in

the world and give their families more opportunities, they also create potential losses. As Peruvians help carve out social spaces, they create complex and uneven connections between Peru and Korea that challenge a global hierarchy of nations and migrants.

Exploring how migrants, churches and nations change through processes of conversion reveals how globalization continues to impact people's lives and ideas about their futures and pasts long after they have stopped moving, or that particular global moment has come to an end.

After-Development Dynamics Springer Science & Business Media

Although rights-based

claims are diversifying and opportunities and resources for claims-making have improved, obtaining rights protections and catalysing social change in South Korea remain challenging processes. This volume examines how different groups in South Korea have defined and articulated grievances and mobilized to remedy them. It explores developments in the institutional contexts within which rights claiming occurs and in the sources of support available for utilizing different claims-making channels. Drawing on scores of original interviews, readings of court rulings and statutes, primary archival and digital sources, and interpretive analysis of

news media coverage in Korean, this volume illuminates rights in action. The chapters uncover conflicts over contending rights claims, expose disparities between theory and practice in the law, trace interconnections among rights-based movements, and map emerging trends in the use of rights language. Case studies examine the rights of women, workers, people with disabilities, migrants, and sexual minorities.

OECD Economic Surveys: Korea 2007

OECD Publishing
This Handbook focuses on the complexity surrounding the interaction between trade, labour mobility and development, taking into consideration social, economic and human

rights implications, and identifies mechanisms for lawful movements across borders and their practical implementation.

International Migration Outlook 2008

Cambridge University Press

The Korean Peninsula lies at the strategic heart of East Asia, between China, Russia, and Japan, and has been influenced in different ways and at different times by all three of them. Across the Pacific lies the United State, which has also had a major influence on the peninsula since the first encounters in the mid-nineteenth century. Faced by such powerful neighbors, the Koreans have had to struggle hard to maintain their political and cultural identity.

The result has been to create a fiercely independent people. If they have from time to time been divided, the pressures towards unification have always proved strong. This third edition of Historical Dictionary of the Republic of Korea covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Republic of Korea.

Economic globalization, modern transportation, and advanced communication technologies have greatly enhanced the

mobility of people across national boundaries. The resulting demographic, social, and cultural changes create new opportunities for development as well as new challenges for lifelong learning. Transnational Migration and Lifelong Learning examines the changing nature of lifelong learning in the current age of transnational migration. The book brings together international scholars from a range of countries in a dialogue about the relationship between work, learning, mobility, knowledge, and citizenship in the context of globalization and migration. It covers a wide range of topics, including: global perspectives and analyses of migration;

the impact of migration on lifelong learning; processes of exclusion and inclusion in lifelong learning; the tension between mobility, knowledge, and recognition; and transnationalism, learning communities, and citizenship. This book was originally published as a special issue of the *International Journal of Lifelong Education*. *Newcomers and Global Migration in Contemporary South Korea* OECD Publishing

If well managed, migration generates benefits for migrants, their countries of origin and the countries they settle in. For migrants, it can help them expand their skill sets and improve their standard of living. For destination countries, it can alleviate

demographic pressures and foster cultural diversity. For origin countries, it can bring benefits associated with remittances and knowledge transfers. However, in reality, these benefits are rarely achieved, as migration policy failures frequently lead to suboptimal or even negative outcomes. Realizing the full potential of migration therefore demands we foster a paradigm shift toward the fair management of migration. Fair migration is driven by the desire to achieve a triple-win for migrants, destination countries and origin countries. In addition to outlining the key challenges and opportunities associated with fair migration, this volume examines the good

practices of a variety of countries and institutions which highlight aspects of fair migration. The volume concludes with policy recommendations for effective and fair migration policymaking at the national and international levels. As a conceptual and empirical contribution to both national and international debates on managing migration, this volume aims to enrich discussions among policymakers, business leaders, civil society actors and scholars alike.

Rights Claiming in South Korea OECD Publishing

In the global era, controversies abound over temporary labour migration; however, it has not previously been subjected to a

sustained socio-legal analysis on a comparative basis, critiquing the underpinning concepts conventionally accepted as fundamental in this area. This collection of essays aims to fill that void. Complex regulatory challenges arise from temporary labour migration. This collection examines these challenges and the extent to which temporary labour migration programmes can be ethical, equitable and efficacious and so deliver decent work for workers. Whilst the tendency for migration law to divide labour law's worker-protective mission has been observed before, the authors of the chapters comprising this collection seek not only

<p>to interrogate why and how this is so, but to go further in examining the implications and effects of a wide range of regulatory mechanisms on temporary labour</p>	<p>migration. <u>Constructing and Imagining Labour Migration</u> OECD Publishing Recruiting Immigrant Workers: Korea 2019 OECD Publishing</p>
