*12 Steps To Building a Successful College Startup* AMACOM Div American Mgmt Assn Construction is desperate for good, experienced, skilled and dedicated supervisors and foremen. Construction needs you. Being a construction supervisor or foreman is challenging, it's hard work, but it's also rewarding watching projects take shape under your watch. A supervisor's job is never boring - every day is different, each project is different, different locations and different people, all presenting new challenges. A construction foreman, foreperson or supervisor, supervises a work crew, or manages a section of work. They're at the coalface of every construction project - the critical link in the construction process.

Good foremen and supervisors are essential to the success of every construction project and every construction company, indeed, they're invaluable. Yet, few managers and supervisors are prepared to mentor and train the next generation of supervisors and foremen. Most supervisors and foremen have years of experience on the tools, learning their trade, sometimes through apprenticeships, but mostly learning from others. These skills are focused on a particular trade or skill. But, being a supervisor is a different ballgame. Where before, as a trades-person they were doing the work themselves, now as supervisor they must organise and manage others doing the work. I'm a construction professional with 30 years of experience and the author of several acclaimed construction books, including: 'Successful Construction Project Management: The Practical Guide' and 'Construction Management: From Project Concept to Completion'. As a young engineer and later as project manager, I was fortunate to learn from many excellent

supervisors and foremen. I wouldn't have achieved what I did without the foremen on my projects. They were the powerhouse on my construction projects, and I only had to steer the project to a successful conclusion. Now it's my turn to share my 30 years of construction experience and knowledge with construction supervisors and foremen. To explain why things are done in a certain way, why good paperwork is essential, but more importantly, to help supervisors and foremen become the very best.

bootstrapping." - Simone Cicero, platform strategist and consultant, creator of Platform Design Toolkit "I bootstrapped my marketplace business from launch to profitability in 6 months. Reading this book will help you do the same." - Mike Williams, CEO and Founder, Studiotime *A Guide to Planning Successful Meetings* CreateSpace This is the first book on creating and running a social enterprise to combine theoretical discussions with current cases from around the world, filling a huge gap in the literature. It serves as an eminently practical blueprint for those who wish to build, sustain, and grow social ventures. Building a Successful Social Venture draws on Eric Carlson's and James Koch's pioneering work with the Global Social Benefit Institute, cofounded by Koch at Santa Clara University's Miller Center for Social Entrepreneurship. Since 2003, over 200 Silicon Valley executives have mentored more than 800 aspiring social entrepreneurs at the GSBI. It is this unparalleled real-world foundation that truly sets the book apart. Early

versions of the book were used in both undergraduate and MBA classes. Part 1 of the book describes the assumptions that the GSBI model is based on: a bottom-up approach to social change, a focus on base-of-the-pyramid markets, and a specific approach to business planning developed by the GSBI. Part 2 presents the seven elements of the GSBI business planning process, and Part 3 lays out the keys to executing it. The book includes "Social Venture Snapshots" illustrating how different organizations have realized elements of the plan, as well as a wealth of checklists and exercises. Social ventures hold enormous promise to solve some of the world's most intractable problems. This book offers a tested framework for students, social entrepreneurs, and field researchers who wish to learn more about the application of business principles and theories of change for advancing social progress and creating a more just world.
