Stratigraphic reservoir characterization for petroleum geologists, geophysicists, and engineers. Responsibility. Roger M. Slatt. Edition. 1st ed. Imprint. Amsterdam ; Boston : Elsevier, 2006. Physical description. Stratigraphic reservoir characterization for petroleum geologists, geophysicists, and engineers. It deals with construction of realistic image of petrophysical properties to be used to predict reservoir performance [1]. The present study aims to testify the reservoir potential of one of the Early Jurassic stratigraphic units, which is Butmah Formation.

Reservoir Characterization of the Early Jurassic Butmah ...Reservoir Characterization In reservoir characterization, wireline (e.g., gamma-ray) log motifs are the basic subsurface data that are routinely used by the petroleum industry. Interpreting a process-specific depositional facies (e.g., slide vs. debrite) from a log motif, without corresponding sediment core, is

impossible.

Stratigraphic Reservoir

Characterization for Petroleum ...

Characterize marine stratigraphy and build relationships with depositional environments using outcrop, core, and other oil and gas industry data; Use lithofacies and stratigraphic architecture to understand variations in deep-water reservoir properties pertaining to petroleum reservoir presence, quality, and seal presence

Reservoir characterization is an important aspect in petroleum geology and engineering. It deals with construction of realistic image of petrophysical properties to be used to predict reservoir performance [1]. The present study aims to testify the reservoir potential of one of the Early Jurassic stratigraphic units, which is Butmah Formation.
