**What's Wrong with Banking and What to Do about It** Prentice Hall  
 For courses in Introduction to Management Accounting. Get refreshed with Horngren/Sundem/Stratton's Introduction to Management Accounting, Twelfth Edition. This best-selling text offers a relevant, real-world decision-making approach to management accounting. Students develop a solid understanding of costs and cost behavior and the use of cost information for planning and control decisions, not just inventory valuation. An exceptionally strong pedagogy and supplements package and flexible structure provide instructors with great latitude in choosing various combinations of breadth and depth, theory and procedures, simplicity and complexity. The Twelfth Edition now includes student-oriented real-world company examples such as Nantucket Nectars and McDonalds; new "Cognitive Exercises" and "Business First" boxes, new on-line courses and tutorial software package resources, and a new CD-ROM series, "Mastering Accounting." *Horngren's Accounting, Volume 1, Eleventh Canadian Edition* McGraw-Hill Education  
 Financial Accounting Prentice Hall

**Accounting and Finance** Prentice Hall  
 Management and cost accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for cost accounting and management accounting. Management Accounting is becoming increasingly international. "Management and Cost Accounting" is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level (Bachelor, but also suited for MBA courses due to strong focus on practical applications and cases). This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting. After an introduction to the topic, including major differences between the German approach and the purely Anglo-Saxon approach of management accounting, the book describes different cost terms and concepts applied in German

cost accounting, The book is much more specific here compared to US-American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard: It starts with cost type accounting, moves on to cost center accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost-volume-profit analysis (break-even-analysis) is covered. The book closes with a comprehensive treatment of cost planning and variance analysis.

**Financial Accounting** McGraw-Hill Education  
 Success in Accounting begins here! The technical details you need to know and decision-making processes you need to understand, with plain-language explanations and unlimited practice. Financial Accounting is an engaging resource that focuses on current accounting theory and practice in Australia, within a business context. It emphasises how financial decision-making is based on accurate and complete accounting information and uses case studies to illustrate this in a practical way. The new 7th edition is accurate and up to date, guided by extensive technical review feedback and incorporating the latest Australian Accounting Standards. It also provides updated coverage of some of the most significant current issues in accounting such as ethics, information systems and sustainability.

**1961-1971** Routledge  
 Extraordinary and up-to-date problems have been added to this edition with other new features including text learning aids to help students understand accounting and streamlined text discussions for more effective understanding of core topics.

*Financial Accounting for Decision Makers* FT Press  
 Horngren's Accounting presents the core content of the accounting course in a fresh format designed to help today's learner succeed. The often difficult and intimidating topics in introductory accounting courses are reinforced with a wide variety of exercises and problems allowing students to practice similar questions many times until the concepts are clear. KEY TOPICS: Accounting and the Business Environment; Recording Business Transactions; Measuring Business Income: The Adjusting Process; Completing the Accounting Cycle; Merchandising Operations; Accounting for Merchandise Inventory; Accounting Information Systems; Internal Control and Cash; Receivables; Property, Plant, and Equipment; and Goodwill and Intangible Assets; Current Liabilities and Payroll MARKET: Appropriate for Principles of Accounting courses.

**Accounting, Chapters 1-15 (Financial Chapters) + New Mylab With Pearson Etext** Prentice Hall  
 Financial and Managerial Accounting: The Basis for Business Decisions continues to offer a solid foundation for students who are learning basic accounting concepts. Known for giving equal weight to financial and managerial topics, the authors emphasize the need for a strong foundation in both aspects of accounting. Hallmarks of the text - including the solid Accounting Cycle Presentation, managerial decision making, relevant pedagogy, and high quality, end-of-chapter material—have been updated throughout the book.

**Financial Accounting, with Annual Report** Elsevier  
 For undergraduate and graduate Accounting courses, as part of non-Accounting programmes. Simplified learning of real-world accounting problems Accounting for Non-Accounting Students, 10th Edition, by Dyson & Franklin provides real-life understanding of accounting by introducing you to the purpose and key ideas of financial and management accounting whether you have had little or no previous knowledge of the subject. This textbook is renowned for its clear and non-technical explanations of essential accounting techniques, in a language accessible to all. It engages with you

to help you cross the bridge between classroom learning and real life, in order to improve your employment prospects when applying for jobs. The new inclusion of critical thinking questions related to most recent news stories, along with contemporary examples and business articles, allows you to explore, in classroom discussions, themes that go beyond accounting techniques, and which require you to think and develop a personal opinion. "Everything a non-specialist accounting student needs. This latest edition is comprehensive, well-structured, easy to follow and contains plenty of all-important practice questions plus additional online resources." David Gilding, Programme Director, Business Management, Lifelong Learning Centre, University of Leeds Pearson, the world's learning company.

#### Includes Pearson EText Wiley

This is an introductory level text for students undertaking accounting or business studies that offers a foundation to financial accounting. An interactive approach has been adopted to integrate the theory with practical situations.

#### **Contract Law in Singapore** Prentice Hall

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in Singapore covers every aspect of the subject - definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, power of attorney, and much more. Lawyers who handle transnational contracts will appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as the international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to categorize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Singapore will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

#### Emerald Group Publishing

Advances in Accounting Education: Teaching and Curriculum Innovations investigates how teaching methods or curricula/programs in accounting can be improved. Volume 15 includes papers examining communication apprehension, self-directed learning in managerial accounting courses, and a section on integrating accounting with other business disciplines.

#### Cost Accounting Prentice Hall

Financial Accounting, 9th Edition continues the strong reputation established by this leading Australian text as the most comprehensive book for students studying introductory accounting in undergraduate or postgraduate programs. The full-colour design and improved pedagogy provides students with a reader-friendly text to enhance their understanding of concepts and make their study more enjoyable. The text builds on the thorough and reliable explanation of the accounting process through the Business Knowledge chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition

builds on this superior teaching feature. The end-of-chapter activities are designed to encourage student confidence through the development of skills in decision making, critical thinking, ethical thinking, analysis and communication.
