[How To Drive A Stick Shift In Ten Easy Steps](#) Stick Shift Guide
 Driving a car with a manual transmission—also called a stick shift—requires more skill and understanding than operating a vehicle with an automatic transmission. In a stick shift vehicle, you will be manually shifting gears to adjust your speed, rather than letting the car do it for you.
[How to Drive a Stick Shift \(Manual Car\) | DMV.ORG](#)
 To start a stick shift, first press the clutch all the way to the floor board with your left foot. Ensure that the gear shifter is in the neutral position then turn the ignition with the key. If you are certain that the car is in neutral, you can remove your foot from the clutch. Ensure that the parking or emergency brake is not in use.
[How To Drive a Stick Shift \(Manual Car\) in 9 Easy Steps](#)
 Also known as a stick shift or a standard transmission, the manual requires the driver to literally change

the gears. The “stick” is usually mounted on the center console, and it is directly connected to the transmission. In order for the driver to be able to change the transmission gears, he or she must release the clutch pedal.
[How to Drive a Stick Shift Car \[Beginner's Guide\]](#)
 The stick shift is usually situated to the right of your seat (for trucks that have left side steering). Most stick shifts will have gear numbers that are printed on top, so you can locate them with ease.
