In other words, the end of support date for Db2 11 for z/OS is September 30, 2020. And that date appears to be a firm one... don't bet on IBM extending

it. What does that mean for you if you are still using Version 11? It should mean that you will be spending the first three quarters of 2020 planning for, and migrating to Db2 12 for z/OS. [TechTip: DB2 11 for z/OS Performance and Tuning Tips | DB2 ...](#) You never have to fret over outdated study preparation for the IBM DB2 11 DBA for z/OS. Traditional methods like printed word and DVD's

become outdated in mere months, while our digital solutions are timeless. And best of all we offer 50% or more of all exams for free! *IBM DB2 11 for z/OS Technical Overview* IBM intends to make DB2 11 for z/OS (DB2 11) available to a select group of clients in a closed Early Support Program (ESP) on March 8, 2013. The codename for DB2 11 is Sequoia, after the famous

large trees in California (if you can pay them a visit please do so, they are fantastic!).

DB2 11 for z/OS

Technical Overview

Randy Ebersole

IBM DB2 11 for z/OS (DB2 11) introduces innovation that matters to improve the business value of your information. Save money,

save time, reduce cost. Compared to the same workload running on DB2 10, you may achieve up to 10% out-of-the-box DB2 CPU savings for many complex online transaction processing (OLTP) workloads. So DB2 10.1 for z/OS was referred to "A10" in APAR text (and DSNA10 for

the standard library prefixes), and DB2 11.1 is therefore known as "B10". Here's the list of things to consider: Get to New Function Mode - this may sound like stating the obvious but we see many organisations staying on Conversion Mode for extended periods.
