Storms of Silence Simon and Schuster

A wonderfully dark, pitch-perfect noir prequel to *The Maltese Falcon*, featuring Dashiell Hammett's beloved detective, Sam Spade. It's 1921—seven years before Sam Spade will solve the famous case of the Maltese Falcon. He's just set up his own agency in San Francisco and he gets off to a quick start, working cases (he doesn't do domestic) and hiring a bright young secretary named Effie Perrine. When he's hired by a prominent San Francisco banker to find his missing son, Spade gets the break he's been looking for. He spends the next few years dealing with booze runners, waterfront thugs, banking swindlers, gold smugglers, and bumbling cops. He brings in Miles Archer as a partner to help bolster the agency, though it was Archer who stole his girl while he was fighting in World War I. All along, Spade will tangle with an enigmatic villain who holds a long-standing grudge against Spade. And, of course, he'll fall in love—though it won't turn out for the best. It never does with dames.

A multi-user game, web site, cloud application, or networked database can have thousands of users all interacting at the same time. You need a powerful, industrial-strength tool to handle the really hard problems inherent in parallel, concurrent environments. You need Erlang. In this second edition of the bestselling *Programming Erlang*, you'll learn how to write parallel programs that scale effortlessly on multicore systems. Using Erlang, you'll be surprised at how easy it becomes to deal with parallel

problems, and how much faster and more efficiently your programs run. That's because Erlang uses sets of parallel processes—not a single sequential process, as found in most programming languages. Joe Armstrong, creator of Erlang, introduces this powerful language in small steps, giving you a complete overview of Erlang and how to use it in common scenarios. You'll start with sequential programming, move to parallel programming and handling errors in parallel programs, and learn to work confidently with distributed programming and the standard Erlang/Open Telecom Platform (OTP) frameworks. You need no previous knowledge of functional or parallel programming. The chapters are packed with hands-on, real-world tutorial examples and insider tips and advice, and finish with exercises for both beginning and advanced users. The second edition has been extensively rewritten. New to this edition are seven chapters covering the latest Erlang features: maps, the type system and the Dialyzer, WebSockets, programming idioms, and a new stand-alone execution environment. You'll write programs that dynamically detect and correct errors, and that can be upgraded without stopping the system. There's also coverage of rebar (the de facto Erlang build system), and information on how to share and use Erlang projects on github, illustrated with examples from cowboy and bitcask. Erlang will change your view of the world, and of how you program. What You Need The Erlang/OTP system. Download it from [erlang.org](http://erlang.org).

For readers who have achieved things in life but don't know how to enjoy them, this is a highly practical self-improvement book with a prescriptive

program for how readers can live life to the fullest. Joe Robinson is one of the world's experts on the balance of work life and down time. He writes that life satisfaction is more likely to come from your nonprofessional life than from your job, and that the happier you are in your personal life the more likely you are to be productive in all aspects of your life. Robinson's new book, drawing on the latest research in positive psychology, focuses primarily on what to do outside of your work life--in your down time--to make sure you have a fully rounded life. The book includes action steps and exercises to help you create a path to a happier, more fulfilled life.

Joe Bunch breaks down his life—and his secrets—for a school assignment in this second book of the funny, heartfelt, and beloved *Misfits* series by Bunnica author James Howe. What can I say? I'm a total original. Joe may only be twelve-going-on-thirteen, but he's known who he is from the time he was a little kid tottering around in his mother's high heels. Now in the seventh grade, he wears green high tops with pink trim, has a (secret) boyfriend, and tells it all from A to Z in the alphabiography assigned by his favorite teacher. The thing is, some of it is seriously private. It's one thing for Mr. Daly to read it, but what if it falls into the wrong hands? Will he be teased forever about those high heels...and even worse, what will happen if his secret boyfriend is no longer a secret?

 Why am I here? Many seek answers to this question but few find any that are fully satisfying. A soliloquy from the play *Man of la Mancha* reads: "I have seen men dying on the battlefield, their eyes filled with confusion, questioning why. I do not think they were asking why they were dying, but why had they ever lived." This book was written under the premise that life's deepest question, "Why am I here?" can be discovered each day. You will find a way of approaching life using wisdom that has been taught for centuries that provides you with an increasing ability to discover your place in the world. It may require some changes, but if you persist the result will be peace and purpose beyond anything you have previously experienced. Much like a global positioning system, it requires knowledge of where you are now and where you are going. Wikipedia says of global positioning systems (GPS): "It provides reliable positioning, navigation, and timing services to worldwide users on a continuous basis in all weather, day and night, anywhere on or near the Earth." This book teaches an approach to

life that might be called GPS or God's Positioning System.
