Indigo could never have predicted she'd be running her own London events agency aged just twenty-seven. Organising celebrity parties and glamorous launches is the reward of years of hard work, and when restaurant entrepreneur Connor asks her to plan the opening of his swanky new Shoreditch nightclub, she knows this could be the high-profile event that puts Glamour to Go on the map. Gorgeous, successful...and attached, Connor is just as spirited as Indigo. She's determined to resist his advances, but it's only a matter of time before sparks start to fly. Will she risk putting everything she's worked so hard for on the line for Connor? Because as the temperature rises, it will soon become clear that someone is trying to sabotage Indigo's efforts from the inside. Things are hotting up, and there's everything to play for...

In the summer of 1947, an unidentified object crashed in Roswell, New Mexico. There were no survivors. Now it's happened again. But this time, two creatures have emerged from the wreckage alive . . . One is a small being that is kind and benevolent, brimming with intense emotion and intelligence. The other, however, is an animal of remarkable strength and power. It has been brought clandestinely to our world with one sole purpose: the total extinction of all life on Earth. It is called the Destroyer of Worlds. Only the Event Group, the most secret agency in the history of the U.S. government, is prepared to wage battle against such a creature. The Event Group is a

dedicated collection of the nation's most brilliant men and women of science, philosophy and the military. Their difficult task: solving the mysteries of the past and uncovering the hidden truths behind the myths and legends propagated throughout world history. In doing so they protect America from past mistakes---and ensure that history's errors will never be repeated. An act of war that started in New Mexico decades ago, and was covered up by another far darker organization, has been discovered by the Group at the same time as the new and seemingly identical incident threatens to wipe out the Earth's population. In the desert wastelands of the American Southwest, a battle is about to commence as the two creatures set out to fulfill their own destinies among the human race. Led by the valiant Major Jack Collins, the Event Group wages total war in the heat-soaked sands of the desert landscape. Using the benevolent creature as an ally and resource, they combine forces with the powerful might of the U.S. military and prepare themselves for an epic battle against the most dangerous threat against human existence that history has ever seen. Event tells of an epic struggle between two worlds. Author David Lynn Golemon has written a classic supernatural thriller, each page bringing human civilization closer to extinction, that proves a blistering roller-coaster ride of thrills and adventure.

NATIONAL BESTSELLER • WINNER OF THE PEN/FAULKNER AWARD • The Pulitzer Prize-winning author of American Pastoral delivers “a master novelist's haunting parable about our troubled

modern moment" (The Wall Street Journal). It is 1998, the year in which America is whipped into a frenzy of prurience by the impeachment of a president, and in a small New England town, an aging classics professor, Coleman Silk, is forced to retire when his colleagues decree that he is a racist. The charge is a lie, but the real truth about Silk would have astonished even his most virulent accuser. Coleman Silk has a secret, one which has been kept for fifty years from his wife, his four children, his colleagues, and his friends, including the writer Nathan Zuckerman. It is Zuckerman who stumbles upon Silk's secret and sets out to reconstruct the unknown biography of this eminent, upright man, esteemed as an educator for nearly all his life, and to understand how this ingeniously contrived life came unraveled. And to understand also how Silk's astonishing private history is, in the words of The Wall Street Journal, "magnificently" interwoven with "the larger public history of modern America."

The recent proliferation of events as a subject of study in its own right has signalled the emergence of a new field - event studies. However, whilst the management-inspired notion of planned events, which strives for conceptual slenderness, may indeed be useful for event managers, the moment we attempt to advance knowledge about events as social, cultural and political phenomena, we realise the extent to which the field is theoretically impoverished. Event studies, it is argued, must transcend overt business-like perspectives in order to grasp events in their complexities. This book challenges the reader to reach beyond the established modes of thinking about events by placing them against a backdrop of much wider, critical discourse. Approaches and Methods in Event Studies emerges as a conceptual and methodological tour de force—comprising the works of scholars of diverse backgrounds coming together to address a range of philosophical, theoretical, and methods-related problems. The areas covered include the concepts of eventification and eventual approaches to events, a mobilities paradigm, rhizomatic events, critical discourse analysis, visual methods, reflexive and ethnographic research into events, and indigenous acumen. Researchers and students engaged in the study of events will draw much inspiration from the contributions and from the volume as a whole.

From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with

sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

The year is 1861. Hervé Joncour is a French merchant of silkworms, who combs the known world for their gemlike eggs. Then circumstances compel him to travel farther, beyond the edge of the known, to a country legendary for the quality of its silk and its hostility to foreigners: Japan. There Joncour meets a woman. They do not touch; they do not even speak. And he cannot read the note she sends him until he has returned to his own country. But in the moment he does, Joncour is possessed.

Introduction to Cyber Politics and Policy is a comprehensive introductory textbook for cyber politics and security courses, and the perfect addition to any International Relations or Intelligence course. Written by Mary Manjikian, an expert in the field and an instructor who has taught the course for ten years, it assumes no prior knowledge of technical concepts, legal concepts, military concepts or international relations theory. Instead, she aims to bridge the gaps between the intricacies of technology and the theories of political science. The book emphasizes the importance of collaboration and understanding between the two fields - students from both technology and political science backgrounds need to understand the implications of technology decisions and the policy questions that arise from them in order to make a meaningful contribution to ever-changing field.
